

J. R. O'NEALE'S COLUMN.

USE

Clark's Ammoniated

DISSOLVED BONE.

It is the Best Paying Article In the Market.

READ THE FOLLOWING:

I have tried Clark's Dissolved Bone on my corn this year, and am much pleased with the result.

I have used Clark's Ammoniated Dissolved Bone beside other higher priced fertilizers, and consider it the best now manufactured.

Mr. O'NEALE—I used Clark's last year, and am much pleased with it. I put it on some potatoes, leaving one row without any.

I like Clark's Dissolved Bone better than anything I ever used. I used it with several others, and find it the best.

I tried Clark's, beside several others, and find it equal to any. It is a good thing.

I used Clark's on late potatoes last year, and got finer potatoes than where I used Peruvian Guano and Bone.

I have used Clark's alongside of —, and like it very much, and can recommend it as a superior article.

I have used Clark's Dissolved Bone side of several others, and think it the best I ever tried on corn.

I find Clark's elegant fertilizer; have used it on corn and wheat, and like it better than any other.

Ask those who have used it. It is genuine. Every package warranted. Go and examine before buying.

CERTIFICATE.

The State Inspector of Georgia, 1872: The recent analysis of Clark's Ammoniated Dissolved Bone warrants me in pronouncing it a highly reliable compound for the early and effective nutrition of crops, with a sufficient quantity of ammonia to stimulate, develop and sustain the plant. It contains a heavy proportion of Soluble Phosphoric Acid to sustain an ample fruitage. It, therefore, has an official sanction as a good fertilizer.
