IN THE MARKET. AT YEARS OF EXPERIENCE

VATOR OF WORN-OUT SOILS. IT-IS COMPOSED OF

Sandy Spring, Montgomeny Co., Md., 5th Month 10th, 1870.

My friend, E. G. Edwards, Agentfor Wilton, Whom & Co., Bultimere, Md.:

At thy instance I was induced to try a small quantity of a fettilizer prepared by the above Company, at the Spring of let 9, and was so will excited with its effects on corn and potators, that I used at on my wheat in the Fall following, and also induced several of any neighbors to use several tone. I put no other manate on too pointors, and herer had a better cogn. I put the same ground, (which was thin) in whose last Fall, with no additional manate, except a smill sprinkling of the same manate and the result, so far, is that if is the best wheat I have seen this Spring, how heading, and other whost six to twelve inches light and, as a general thing, in the section of country where I reside, wheat looks unusefully backward, and prospect of a short copy. I have wheat in the same field, that they make manared from Barn Yard, Bone and Peruvian Gosno, and it is very much telind Whann's. I have called the attention of the neighboring farmers to see the wheat, and, without an exception, they say it is the best they have seen.

I am now using Whann's Raw Bone Super Phosphate as the only manare for my corn and postitous. I losed it on an arre of over, stubble ground, with no additional manure of any and judge any other feetilizer this fall for wheat. I this ait that is needed, for fathers to see the effects to the them to use it; and, further, I have been to see the manufactory, and gam perfectly satisfied that the public may rely upon being supplied a chargementucitie.
