POETRY.

THE CASE OF RUEL GREGG.

An Affectionate (or must-sweet) Ballad.

There was a man named Ru-fel,
Tall as their sheds was O'Fer;
He thought he was some pun-ki-nel
Till taken down a peg.
He loved a nice young dam-si-fel
Her pa wouldn't fol from a—
For he had such spondoo-li-ics,
And his maiden name was Brown.

Then Ruel was unhap-pi-e,
And Sophy was the same,
She wished to change the col-lo-or
Of the ancestral name,
At last a secret mar-ri-age
She did arrange with him,
She told she'd wed her lov-er,
Even if it took a—limb!

So Ruel got a lad-di-er,
And one dark cattish night
He stood beneath her casa-ni-ent,
All ready for their flight.
He clasped her head in sti-li-ness,
As she stepped trembling down;
Jerusalem! off dropped her hat and dress,
And there stood Mister Brown!

And there he want for Ru-fel,
And put him on a roof,
Also the ears ma-me-ti-cus,
As he is living proof.
He polished Ruel cru-ti-el,
He rolled him in the mire,
Till he stretched out quite lik-li-ess,
And nearly did expire.

When Sophy heard the rum-pi-us,
Her love she did bewail,
She joined the Universalists,
And finally took the veil.
So all fair maids and lov-e-ers,
Attend to me I beg;
Beware the heartless pa-ri-ent;
And the fate of Ruel Gregg!

AGRICULTURAL.

Manure Your Lands.

Does it require any more labor to cultivate rich land than it does poor land? Let our farming friends ask themselves this question, to which there can be but one answer. It being admitted, then, that no more labor is required to farm rich land than poor, the second consideration is the relative yield of the two soils. Look at your garden—a very small space indeed—where the soil has been enriched by manure of almost every description—Would you not think it the veriest piece of absurdity to attempt the cultivation of any thing in a garden where the soil was naturally poor and where no steps had been taken to enrich it? And yet you cultivate hundreds of acres of just such land, relying upon propitious seasons alone to make old mother earth beautiful.

And thus you go on, year after year, wearing out your land by continual drafts upon its life-giving properties, while all around you lie the materials for recuperating the exhausted soil. But these materials are allowed to remain untouched by you, or are washed away by the rains to fill up the water courses that intersect our country.

There is neither wisdom or profit in this policy. The same knowledge that teaches you to enrich your garden spot, should also teach you to employ manure as an agent for making your farming operations profitable. When you begin to do this, farming will begin to prove remunerative. How many spare hours have you which might be easily devoted to the formation of a compost heap? How many more spare hours you would have, and how greatly would your labors be lightened, if you would only reduce your acreage one-half, and instead of trying to see how much land you can cultivate endeavor to ascertain what amount of products can be raised from a given number of acres. The farming classes of Europe are living upon and cultivating lands that have been in use for centuries. Are these lands naturally any better than our own? Not a bit of it.—But look at the lands here among us that have been cultivated for less than forty years, and now turned out as utterly worthless. What is the cause? It is the ruinous system of taking everything from the soil without adding anything to it. A man who admits that it will require no more labor to cultivate rich land than it does poor, must also admit that it will pay him better to cultivate half the number of acres, and by manuring, secure the same amount of crops that would be gathered from twice the amount of poor land, because by so doing he would lessen his own labor one-half and lessen the labor of his stock.

SALT AND AGUE.—The following appears as a leading editorial in the Cleveland *Herald*:

We wish to give a very simple remedy for fever and ague, and wish to emphasize it by saying that it has, to our knowledge, proved very efficacious. It is simply common salt.—A teaspoonful taken in water, and a teaspoonful deposited in each stocking, next the foot, just as the chill is coming on. That's all there is of it; but knowing that it has been efficacious in breaking a chill and perfecting a cure, we put it in our editorial columns, where no humbug remedy shall ever find a place if we know it.

WOMAN'S RIGHTS.—A strong-minded woman in Detroit made the following gentle reply to a politician who had called at her house to get her husband to go to the polls and vote:—"No sir, he can't go; I'm washing now, and he's got to iron to-morrow, and if he wasn't doing anything, he couldn't go. I run this 'ere house, I do, and if any one votes it will be this same Mary Jane."

"Now, Johnny," said a venerable lady to her six year old nephew, who was persistently denying the offence of which she accused him, "know you are but filling me the truth; I see it in your eye." Pulling down the lower lid of the organ that had so nearly betrayed his veracity, Johnny exultingly replied, "You can't tell anything about it, Aunty—that eye of hers was a little streaked."

In the Supreme Court Judge ——— was speaking of the death of a mutual friend, and remarked: "He has gone to heaven." Judge Goldsborough immediately replied: "Then you will never meet him again." "Well, well, judge ——— quietly answered, "you will never be there to dispute on that point."

A merchant in a Northern city lately put an advertisement in the paper, headed: Boy Wanted. Next morning he found a note on his desk with this reply: "How will two do?"

Young Lover (who has just thrashed two ill-looking fellows)—"Dearest, I hope you are not hurt?" Mother (looking on)—"Hurt, indeed! I should hope not, indeed! Why, they haven't touched a hair of his head!"

A Missouri man has 160 acres of land for sale, and says he will sell it for $2 50 per acre.

DRY GOODS, GROCERIES, &c.

A SPLENDID STOCK OF
FALL AND WINTER
DRY GOODS,

J. R. O'NEALE'S COLUMN.

USE
Clark's Ammoniated
Dissolved Bone.

It is the Best Paying Article
In the Market.

READ THE FOLLOWING:

I have tried Clark's Dissolved Bone on my corn this year, and am much pleased with the result. I also used a higher priced article, and find Clark's the superior fertilizer for corn. W. H. REID.
Langley, Fairfax co., Va., Aug. 1, 1871.

I have used Clark's Ammoniated Dissolved Bone beside other higher priced fertilizers, and consider it the best now manufactured. R. W. MILLER.
Fall's Church, Va., Aug. 2, 1871.

MR. O'NEALE:—I used Clark's last year, and am much pleased with it. I put it on some potatoes, leaving one row without any. Where I applied Clark's I got a good yield of fine potatoes, but on the row where I used none, I got no potatoes. I consider it a genuine article, and shall use it again.
Very respectfully, JOHN FEBREY.
Fall's Church, Va.

I like Clark's Dissolved Bone better than anything I ever used. I used it with several others, and find it the best. I shall never use anyother as long as I can get it.
ROBT. WALKER.
Alexandria co., Va.

I tried Clark's, beside several others, and find it equal to any. It is a good thing.
ALFRED LEIGH.
Fairfax co., Va.

I used Clark's on late potatoes last year, and got finer potatoes than where I used Peruvian Guano and Bone.
THOS. J. PEACOCK.
Fairfax co., Va.

I have used Clark's alongside of ——, and like it very much, and can recommend it as a superior article. I shall use it in future. It pays.
WM. HUDDLESON.
Tennallytown, D. C., Aug. 23, 1871.

I have used Clark's Dissolved Bone side of several others, and think it the best I ever tried on corn. I made some of the finest corn I ever saw with it last year. I intend to use it in future. W. S. OLIVER.
Prospect Hill, Fairfax co., Va., Aug. 22, 1871

I find Clark's an elegant fertilizer; have used it on corn and wheat, and like it better than any other. A. H. C. DARNE.
Fairfax co., Aug. 26, 1871.

CERTIFICATE.

The State Inspector of Georgia, says:
The recent analysis of Clark's Ammoniated Dissolved Bone warrants me in pronouncing it a highly reliable compound, for the early and effective nutrition of crops, with a sufficient quantity of ammonia to stimulate, develop and sustain the plant. It contains a heavy proportion of Soluble Phosphoric Acid to sustain an ample fruitage. It, therefore, has an official sanction as a good fertilizer.
A. MEANS,
Inspector, Savannah, Ga.

Ask those who have used it. It is genuine. Every package warranted. Go and examine before buying.
