Majority for Crowningshield 496

Return of votes for Electors of President and Vice President, from 54 towns in Massachuset's.

Anti 7227 Republican 8198 · There is no doubt of the re election of Seaver and Varnum from Norfolk and Mid. dlesex districts.

The Legislature of Vermont has rejected the proposition for the amend ment of the constitution of the United States, made by the Legislature of Massachusetts.

In consequence of Gen. Armstrong's acceptance, of the appointment, as ambassadur to France, a vacancy has taken place in the representation of the state of New York in the United States senate; we presume that by this time the vacancy has been filled by the legislature of that state. We have heard that Gen. Clinton, the republican candidate for Repold & Wasche. the vice presid ni's chair, would probably be appointed to succeed gen. Armstrong as senator, for the present session of course, as there can be no doubt of the success of the republican ticket for president and vice president.

SIR, The explanations which the government of France has given to his catholic majesty concerning the sale of Louisia na to the United States, and the amicable dispositions on the part of the king my master towards these states; have determined him to abandon the opposition, which at a prior period, and with the mos substaitial motives, he had man fes ed against that transaction. In convequence and by special order of his majesty, I have the pleasure to commu nicate to you his royal intentions on an affair so important ; well persuaded that the American government will see in this conduct of the king, my master, a new proof of his consideration for the U. States, and that they will correspond with a' true rec precity, with the sincere friendship of the king, of which he has given so many proofs.

PARIS, August 10.

Institute, intended, last Wednesday, in company with a f iend, to ascend from the observatory in the air, and to make their meteorological and physical expe riments. Government lent him, upon this occasion, its largest balloon, the same that had been in Egypt. But no sooner was this balloon filled, than a sudden gust of wind carried it away. and it has hitherto not been heard of or found. According to calculation, if it meets with no accident, it may arrive at or approach

some of the planets nearest to our globe; and as all our best mathematical, astronomical, physical and meteorological instruments were embarked, with several bottles of wines and liquors, should it arrive any where in universal space where the inhabitar to have not reached the same state of civilization as upon our planet, it may produce information which chance has so often produced in our arts and sciences. It is well know., that it is to chance along we are ind bled
