To the Public.
AS the season is now approaching when the use of ICE will become necessary to the preservation in an agreeable state of many articles in daily use in families, viz. butter, sweet milk, &c. Last season through the medium of an advertisement, the inhabitants of Baltimore were informed of Moore's Patent Refrigerator. Several were supplied, but from the inside vessel being of Cedar, it was found to give a disagreeable taste to the provisions; to obviate which, oak has been substituted which will no doubt answer a good purpose. To those who can procure ice at an easy rate, the Refrigerator must be a great acquisition, as it is not only constructed for preserving fresh provisions for family use, but also for conveying butter to and from market, and cooling water, wine and other liquids. It is proper the public should be informed, that some attempts have been made to furnish vessels for these purposes, which have nothing of the principles of Moore's Refrigerator. The real Patent Refrigerator can only be had of *George Brantingham*, in Hill-street near Hanover-street; where they may be procured of any description, at a short notice.
