NEW-YORK, October 2.

By the ship Two Friends, captain Latham, from Belfast, we have received Irish papers to the 18th of August, containing London dates to the 12th, from which we have made some extracts.

Captain Latham informs us, that Lord Nelson had lest Gibraltar for the northward.

LONDON, August 12 .--- The number of | be received at the Bank of Maryland. men embarked in the Texel, we understand exceeds considerably the number of 25,000, which was the number stated in the accounts of last week. Every vessel from 30 to 300 tons has been impressed to carry men, and the greater part here have been furnished with sweeps to facilitate their meyenients, should the wind full them. At Boniogne,and all along the French coasts, the preparations are in equal activity, and every thing-gives a show at least of an intention to invade us.

It is certainly possible that the whole may be only a feint, intended to turn the attention of this country and of Europe from other plans of the Corsican: but it becomes us to be on our guard, and to be so without alarm, useless hurry, and preeipitation.

Our different squadrons have been reinforced, and the necessary orders have been sent to the different maritime

counties to preparé a vigorous resistance. For the last two days there has been no continued bustle at all flie offices of government, and circular letters from the respective commanders have been written; and the lot 22, feet by 43. The situation is bury and inns of Court association i

BY PERMISSION. Mr. St. AUBIN, respectfully informs the citizens of Bultimore, that he intenus to exhibit a display of

Grand Fire Works,

Consisting of Eight Sky Rockets, with Masons and Stars. A whirling sun, alternately changing its colour, terminates with a magnificent fire and an explosion.

The lady's fancy, horizontally turning with surprising quickness, throwing its fire in different directions, sometimes appearing as a cascade, at other times as a water work. The beautiful cascade of Tiroli, its fire ascending to an extreme height, and now and

then throwing balls of blue fire. The cascade is decorated towards the end with a magnificent fountain. A new and large sun, perpetually whirling, it will change itself into a beautiful flower, and

the flower will change to a second sun, of the greatest brilliancy. Six Rockets, with stars, crackers and snakes,

will ascend in different directions. The wonderful candlestick, which turns every way with surprising quickness, and will conclude with a large Roman candle, throwing at different times, large meteors, announced each

time by an explosion. Two beautiful rockets, filling the air with

waving fires. A large wheel, 5 feet in diameter, decorated in the centre with 3 butterflies, which will not appear until the large wheel changes a third time its colour-it will then represent something surprising. The young man who made these Fire Works, will use his utmost endeavers to please those who may befriend him with their attendance.

Music will be provided. Box half a dollar, and pit one quarter.
