May 17. d6teo6t William Langdon

INFORMS the citizens of Baltimore, that he still continues the important business of SCHOOL-TEACHING, a few rods south of "hrist's church, and in a very healthy part of the city.

He presents his most sincere thanks to those who have obliged him with the tuition of their children, the year past, and further solicits the continuance of their kindness. He likewise presents himself to the public, and offers himself as a Teacher, in the following important and useful branches: Reading, Writing, Arithmetic, English Grammar, Geography, History, Logic, Rhetoric, and the Latin and Greek Languages.

Having himself first experienced the beauties and difficulties of attaining the sciences, at one of the first Universities, in the New-England states; he flatters himself that no one who shall place their children under his tuition, will be disappointed in his attention to the morals and manners of those young pupils committed to his care, and trusts that those who favor him with the important charge, will find every satisfaction from their improvement May 15. · ..
