Mr. Rodrigeus,
FRENCH PHYSICIAN.
RECENTLY arrived in this city, takes this method of acquainting the public, that he has various medicines for the cure of Venereal affections, Cancers, Ulcers, Itch, Scabs, Ringworm, Gout, Fevers, Consumption and Dropsies. These medicines are innocent, not impairing the constitution, and no ways disagreeable to the taste; as they are equal to being kept a long time at sea, without losing their virtues, they are very convenient for sea-faring men. The ingredients he employs in his compounds are roots and herbs, without any mixture whatever of Mercury. From his experience of the mode of treating the Yellow Fever in the West Indies, he flatters himself that he can effect a cure when reasonably informed of the symptoms indicative of that disorder. He composes also, a liquid to destroy bed bugs or cimexes, which is already known by several families of this city. This truly useful liquid may be had of Mr. Alexander Roman, 147, Market street, and at the physician's abode.

Sulphur or Owings' Spring.
THE subscriber respectfully informs the Ladies and Gentlemen of the city of Baltimore, that the spring, of which the late John Owings was the proprietor, is now carried on and superintended by himself.
This Spring, as it is known by the name of "Owings' Spring," is situated between five and six miles from Baltimore, with an excellent carriage road, and an inviting shade, after noon, the whole was from the city.
None who have frequented the convenient watering place, situated at the Spring, are willing to question its virtues. So many are the invalids who have visited this Spring, and drank freely of its water, that have been brought to a state of convalescence, that its efficacy is attested by none. The diseases proceeding from a surfeit and acrimony of bile, general debility from a weak stomach, gradual decay from causes not immediately of a contagious nature, this Spring has proved itself an antidote. It has been found to be so powerful a tonic, that stomachs, diseased all kinds of substance for weeks, have been so effluvia restored, and strengthened, as to resist the most unwholesome influences. It is such that the unexhausted benefits of its mineral waters, bears ample testimony of its virtues and restorative qualities.
Good accommodations may be had for gentlemen and their families, and every exertion shall be made to afford general satisfaction.

Family Guide,
TO AVOID INFECTIOUS DISEASES.
PREPARED BY
FOR PUBLISHING BY SUBSCRIPTION,
A. E. V. WORK,
ON THE DISCOVERY OF A SPECIFIC
FOR THE CURE AND PREVENTION OF
The Yellow Malignant Fever,
AND DISORDERS OF THE BILIOUS,
FULGID AND MALIGNANT KIND.
As described by a Physician in the Canton of Fribourg, the City of Turin, &c. and a new Method for the certain cure of it.
ADAPTED TO PERSONS OF EVERY CAPACITY
Addressed to the citizens of the United States of America
By Dr. JOHN J. GRAUD.

The basis of the specific remedy, is simply Sarsaparilla, which is acknowledged to be a great purifier of the blood. That without the use of such, there can be no cleanliness, and without cleanliness, no health; and it is of no account to supply the system with medicine, if the medicine is not pure, and if it contains a more or less of impurities, which will be of no service. This medicine is a long series of success, and a well-earned reputation, it possesses an eminent antiseptic virtue, which renders it a valuable medicine in all diseases produced by a corrupted and a bad blood.
CONTENTS.
1. The basis of the specific remedy, is simply Sarsaparilla, which is acknowledged to be a great purifier of the blood. That without the use of such, there can be no cleanliness, and without cleanliness, no health; and it is of no account to supply the system with medicine, if the medicine is not pure, and if it contains a more or less of impurities, which will be of no service. This medicine is a long series of success, and a well-earned reputation, it possesses an eminent antiseptic virtue, which renders it a valuable medicine in all diseases produced by a corrupted and a bad blood.
2. The receipt to compose the specific remedy.
3. The receipt to compose the specific remedy.
4. The use of it as a preventive of the disease.
5. A list of persons effected by the use of it in the epidemics.
6. The receipt adapted to Bilious, Putrid and Malignant Fevers, Cholera, and other affections of the sanguiferous system, which are produced by an obstructed perspiration.
7. The means of preserving health in the critical season of summer.
8. An address to the public, with a view to guard them against the dangerous and common abuse of some means generally selected, as well to prevent sickness, as to cure it. This address is of the last importance, because it corrects a popular opinion, that a productive of infectious diseases is quinine.
9. The receipt for the most valuable and best among all kinds of Sarsaparilla, as the Compound prepared by a new method equally secure and easy for curing it. And also, the means to prevent and cure the Cholera Infantum. This will render the treatment of the disease a utility, as well to private families as to three in the hospital, removed from the sickness and assistance which the faculty usually afford.
10. Lastly, will be presented a demonstration of the necessity of assisting a temporary administration in the Yellow Fever; without which there follows a total dissolution of our fluids, which nothing can stop. And this will more forcibly notice the advantages of an antiseptic to be found, prepared and containing the same means of preserving the fluid in the disposition to it, and of removing it after it has made its appearance.
No person of sense, father of a family, or other person, can be indifferent to the use of a similar remedy, which assures his well being and that of his children and neighbors.
CONTENTS.

1. The work shall be put to press with all possible speed.
It shall be handsomely printed in one volume octavo, on good paper, and will be delivered to subscribers weekly bound, at 2 dollars and 50 cents each copy, payable on delivery.
At present the number of pages, that the work will contain, cannot be ascertained, the probability is it will exceed three hundred.
Proposals for receiving subscriptions, are left with the principal book-sellers in Baltimore.
Printers of new-spapers who choose to obtain subscribers to the foregoing work, are requested to give the proposal a few insertions in their papers. They will be allowed a discount of 20 per cent. on as many copies as they may see proper to take.
500 upwards of 141 persons cured by means of this remedy, is only one specimen. I have obtained and published the certificates of more than 100, merely with a view to establish and prove the merit of my discovery; and in my work I will make mention of a great number cured in like manner in other epidemics. For the details of this, see the American and Evening Post of June 12, 1806.
