. WILLIAMS'S SURVEY OF N. YORK HARBOR. A survey of the harbour, hay and narrame of New York has been made pursuant to an order of General Dearborn, the Secratary of the War Department, by colonel Jonathan Williams, of the corps of enginers and a chart of the survey has been correctly drawn by captain Alexander Micomb. From this it appears, that the distance from the shore of Sigmal-Hill, on the east side of Staten-Isl nd to the western termination of Long-Island, near Denyse's, straight across the narrows, is 2000 yards; and the greatest depth of water at this passoge 16 fathems. Ilt also appears, that the distance from the ferry at Poweles-Hock to Governor's Island is 3270 yards; and the greatest depth of water, 14 fathoms. The passage between Governor's Island and Long Island formerly called Butter milk chainel and within the memory of man, both narrow and shallow, is now eight fathoms deep. The distance from Whitehall-slip to the wharf on Governor's Island, is 300 pards. - Adf. Intel.

About 3 o'clock yesterday morning. Miss Saruh Winchester daughter of William Winchester, esquire, of this city, departed this life, in the 29th year of her ege, after a most tedious and afflicting illness, which she bore with the greatest patience and most cinistian resignation. Her family and friends have the happy consolution of believing few liave left this transitory scene with fairer prospects of furure bliss; and few young ladies have departed this life more sincerely regretted by all their acquaintances.
