Patent Iron-bound Boots, Bootees, and Shoes. JOHN BEDFORD,

PHILADELPHIA,

Respectfully informs the public in general, and Store-keepers in particular, that he is now prepared to supply them with the above valuabie goods, wholesale and retail, on miderte

Shoemakers, also, may be supplied with pa tent-rights, on easy terms, which they will find it highly their interest to obtain, as they can, by this improvement make four times the quantity of shoes, with their usual number of hands: for example, the usual work of three mon, is only three pair of common shoes per day; whereas, in the improved way, three men with the assistance of a boy, can make from twelve to fifeen pair per day. Thus the advantages resniting from this improvement are evidently of the most essential importance : in the first place, three-fourths of the labour is saved; in he second place, half the leather is saved (for one pair of shors, made in this way will wear as long as two pair, made in the usual way) are in the third place, there is a saving of flax Lit the rate of one pound, to twenty four pair of shoes) they are also much more water-proof tian the otiers, and easier menied.

These are well ascertained facts, proved by guital experience. The patentes therefore Leges, that an improvement, fraught with such important public utility, will not only engage the attention, but the encouragement of every friend to the in out manufactures of this counmy It may not be amiss to romark that the country Shoemaker, in particular, may derive incalcuiable advantages from the time he has usually devoted to that purpose, and have the other three-fourths for the cultivation of his farm, or other avacations.

Planters will find it much to their advan--tage to purchase a right for the use of their shives which they can obtain for the very low price of fifty dollars:

Price of patent-rights, for the country, 100 dollars. For states, districts, or towns, in proportion

Stop the Thief.

One Hundred Dollars Reward, FOR apprehending and securing in Baltimore jail, my apprentice boy, named JACOB VANFREISWACK, aged 18 or 19 years, about 5 feet 3 inches high; very stout and strong for his age; fair complexion, and good lextures; short thick brown hair, inclined to curl; his hands very large. He is a native of Holland, and was bound an apprentice to me on board of the brig George, oi-Baltimore, in the year 1800, at Rotterdam, from thence he made a voyage with me to Baithnore, and from thence to Amsterdam, and back to Baltimore in 1803. He was at school with Mr. Hargrove, where he remained for several months. He was always a thief, and finally stole a gold ring, and knowing that he would be fluged, he ran away from school, and entered in the United States navy, where he remained 2 or 3 years, and afternards sailed 1 or 2 voyages out of New York, to Antiqua, where he was impressed; and in a few days after, run away from the British man of war. About the 20th of August, 1807, after being gone about 2 years, he returned, expressing much concern for his past conduct, and begieve that I would lorgive him and take him under my protection again; I consented, and bearded him with Mr. Hagen, en Dugan's whart; and for 12 days he served as a perfer in the store-And on the 2d Sept. whilst I was at breakfard, learing the store in his charge, he asside! himself of the opportunity, broke open my cosk, sade 104 dollars, several silver table and tea becors, marked S and a small brass pocket pittol, makers name, Ryan and Watser, Lordon. The proprietors of the New Line in Baltimore, or some of them, having advertised that they have seaten the new s. op Sarah, ought to have noticed other particulars which I suppose 111 not occur to them. The President had got over to the glass-house before the Saranstarted. The Sarah stopped at the Point to tote in a passenger and when she started is all, the F. had got nearly to the Fort, at

terwards the wind increasing, the ladies on bourd in luced captain Parker to shorten sail, though except to assuage their fears there was no occasion to do so.

Every man who has the least knewledge of such matters, knows that the manner in which an avessel ought to be trimmed is not dis covered at once. I will suppose that in six weeks one may discover the trim of the Sarah. an ins soon after, as there occurs a wind with northing and easting, or northing and westing in it (these winds being commonly general & uniform, or rather increasing) we will run with any boat on the new line on this bay.
