This famous horse (tho' the great progress he has made in arithmetic and the art of boxing, may justly be entitled,
The Great Horse of Knowledge.
He will be exhibited every day (Sundays excepted) at Mr. Cook's Tavern, Market space, Baltimore.
This beautiful animal was caught on the Coast of Africa; and from the beauty and peculiarity of his colour and shape, was imported to this country, and exhibited as a natural curiosity. He is variegated with four very rich and distinct colours, which are formed into circular spots, similar to those of the Leopard, and his tail resembles that of the Elephant. Exclusive of these peculiarities, he will add, subtract, multiply and divide, tell the hour of the day by a watch; the number of buttons on a gentleman's coat, and the number of persons present; with many other pleasing manuevres and marks of sagacity, which excite great admiration.
No danger need be apprehended during the performance, as the apartment is rendered very convenient.
Doors will be opened from 8 until 12 o'clock in the morning, and from 3 until 6 in the afternoon.
Price of admittance twenty-five cents only—Children half price.—Tickets to be had in the bar room.

Stop the Thief.
One Hundred Dollars Reward,
FOR apprehending and securing in Baltimore jail, my apprentice boy, named JACOB VANFREISWACK, aged 18 or 19 years, about 5 feet 3 inches high; very stout and strong for his age; fair complexion, and good features; short thick brown hair, inclined to curl; his hands very large. He is a native of Holland, and was bound an apprentice to me on board of the brig George, of Baltimore, in the year 1800, at Rotterdam, from thence he made a voyage with me to Baltimore, and from thence to Amsterdam, and back to Baltimore in 1803. He was at school with Mr. Harprow, where he remained for several months. He was always a thief, and finally stole a gold ring, and knowing that he would be flogged, he ran away from school, and entered in the United States navy, where he remained 2 or 3 years, and afterwards sailed 1 or 2 voyages out of New York, to Antigua, where he was impressed; and in a few days after, ran away from the British man of war. About the 20th of August, 1807, after being gone about 5 years, he returned, expressing much concern for his past conduct, and begged that I would forgive him and take him under my protection again: I consented, and boarded him with Mr. Higgin, on Deegan's wharf; and for 12 days he staid as a prisoner in the store—And on the 21 Sept. what I was at breakfast, leaving the store in the charge, he availed himself of the opportunity, broke open my desk, stole 104 dollars, several silver table and tea spoons, marked S and a small brass pocket watch, makers name, Ryan and Watson, London. Jacob came near a hitting, and some times attempts to write, but cannot make his letters plain enough to be understood; when he first came to this country, in 1801, I bought him of Captain Geese on the Pent; and he was to school a few months to Mr. Gardner; he speaks the English language very profly, but has but little of the Dutch; and I think that he has forgot the great part of his mother tongue. If any in this state will be so good as to take out of the state of any of the above said 104 dollars, 100 dollars will be paid.

John Bedford,
PHILADELPHIA,
Respectfully informs the public in general, and Store-keepers in particular, that he is now prepared to supply them with the above valuable goods, wholesale and retail, on moderate terms.
Sweetmakers, also, may be supplied with patent-rights, on easy terms, which they will find to highly their interest to obtain, as they can, by this improvement, make four times the quantity of shoes, with their usual number of hands: for example, the usual work of three men, is only three pair of common shoes per day; whereas, in the improved way, three men with the assistance of a boy, can make from twelve to fifteen pair per day. Thus the advantages resulting from this improvement are evidently of the most essential importance: in the first place, three-fourths of the labour is saved; in the second place, half the leather is saved; for one pair of shoes, made in this way will wear a long as two pair, made in the usual way; and in the third place, there is a saving of Wax (at the rate of one pound to twenty four pair of shoes) they are also much more water-proof than the others, and easier mended.
These are well ascertained facts, proved by actual experience. The patentee therefore hopes, that an improvement, fraught with such important public utility, will not only engage the attention, but the encouragement of every friend to the infant manufactures of this country. It may not be amiss to remark that the country Shoemakers, in particular, may derive inestimable advantages from the time he has usually devoted to that purpose, and have the other three-fourths for the cultivation of his farm, or other avocations.
Planters will find it much to their advantage to purchase a right for the use of their slaves which they can obtain for the very low price of fifty dollars.
Price of patent-rights, for the country, 100 dollars. For states, districts, or towns, in proportion.
