SAVED FROM THE FLAMES BY A BEAR-The following story comes from San Rafael: Sam Clarke, of Bolinas, was trying to prevent the fire from ascending the small gulch, when the wind suddenly changed and filled the air around him with dense and stifling smoke.-Almost suffocated, the young man did not know which way to turn for safety. While stumbling around half stupefied by the smoke, endeavoring to escape from the fast approaching flames, he ran against a large bear that was also running before the flames. Hardly knowing what he was doing, Clark jumped on the bear's back, and the frightened animal The ungrateful man, as soon as he found himself safe, turned on the bear, and, with

the help of some other men, tried to kill it with sticks and shovels, but Bruin retired from the scene in safety. [San Francisco Chronicle. -----According to the "American Banker." the public wealth is made up of ten items every one of which can be calculated to a nicety except the value of public works. Thus land is worth 40 times the assessed annual rental valuation. Houses are worth 18 times the rental. Furniture, according to insurance agents, is worth on an average half the value of the house. In the comparison of aggregate values arrived at by this computation our own country comes out ahead. The wealth of France is \$45,500,000,000, that of the United Kingdom \$48,000,000,000 and that of the States \$69,000,000,000.

MILK AS A FIRE EXTINGUISHER.-A serwant girl upset a burning kerosene lamp, and all attemps to quench the flames were useless. She finally seized a pot with milk and emptied it over them, whereby the fire was at once stifled. Another lady, whose house stood in great danger of being barned to the ground by the bursting of a kerosene lamp, and who had heard of the remedy, tried it, and in a letter to a friend said that all attemps made to stifle the fire were futile until she tried the milk. which did it at once.-Insurance Post.

A German scientist claims that by means of an acid process he can convert sawdust into a material firm in texture and extremely hard, impenetrable by a gimlet or nail, more impervious to the action of the elements than the ordinary metals or the common building stones, and practically indestructible by fire. It i claimed to be stronger than timber for joists and girders, and several times lighter than iron of steel, and, above all, the cost of manufacture is claimed to be so low as to bring it into competition with both wood and iron.

While dredging on the oyster beds near New London on oysterman brought up something which at first looked like a lifeless sea serpent covered with immense scales. but on examination it turned out to be a strip of hose, seven feet long and three inches in diameter, completely hidden by the bivalves which had become fastened to it. By actual | count there were over 1,000 oysters on that piece of hose.

The name of Poe is dear to Princeton in more ways than one. The senior class has selected as its President Edgar Allan Poe of poetical and football fame. Incidentally the choice is an honor to Baltimore as well. In looking over the names of the class officers, it seems that the athletes have been given the place of honor. - The Baltimore World.

"I wish to ask this court," said a lawyer who had been called to the witness box to tesas an expert, "if I am compelled to come into this case, in which I have no personal interest, and give a legal opinion for nothing?" "Yes, certainly," replied the mild-mannered judge, "give it for what it is worth." It is said that Mr. Maxim, the inventor

of the "Maxim guns," claims to have constructed an engine of 500 horse-power weighing only 1,100 pounds, or 2.2 pounds per horsepower. Some of the largest and most efficient engines have about 112 pounds dead weight per horse-power, including water. -----

ODD FELLOWSHIP. ITS HISTORY AND MANUAL, BY THEODORE A. ROSS. SECRETARY TO SOVEREIGN GRAND LODGE. This work is the most succinct and correct history and chronological record ever prepared by any historian of the Order. Mr. Ross, from his constant association with the internal workings of the Order for many years past, and his prominence in official station, makes him the best qualified person to prepare such a history as he presents.

The work, besides, is a complete Manual to the interested Odd Fellow. It corrects many facts as to the origin and wonderful progress of the Order.
