from shifts a small table with a peculiar matting, which at first glance strongly resembles the ordinary straw matting used in this country. When one steps on this matting, however, the sensation is delightful. It is soft and yields to the feet as if one were walking on a spring mattress.

The husking came off at the time appointed with all the fun of such gatherings. Ducley called for his pic. Mother and the foundable one for him. She had becautifully embroidered sover thrown over it, be all the useful furniture which the room contains. The floor is covered with a peculiar matting, which at first glance strongly resembles the ordinary straw matting used in this country. When one steps on this matting, however, the sensation is delightful. It is soft and yields to the feet as if one were walking on a spring mattress.

The husking came off at the time appointed with all the fun of such gatherings. Ducley called for his pic. Motherings. Ducle walking on a spring mattress.

This effect is produced by a number of layers of bamboo splits beneath. These straw mats are about two feet wide and four feet long, and instead of saying a room is six by eight feet, the Japanese say it is four mats, the regulation size of the results of the pie and went at it. He actually at three-fourths of the pie but had to give it up as a bad job, and, as the Norman way Advertiser tells the tale, had to do the day's work according to the bargain.—

Leviston (Ma.) Journal.

Australian creeper, and one or two others. In the tropics, where leaves are always green, we find whole groups of brids whose feathers are green; while many tree-snakes in that part of the world, comprising both harmless and venomous genera, are usually of a beautiful green color, and so perfectly does it conceal them that their prey con The other day Mr. Sim Bowles, who in easy reach unconscious of danger.

The other day Mr. Sim Bowles, who is easy reach unconscious of danger.

The only true arboreal snake whose colone of the Japanese arose and carried in from the ante-room the following articles in the order named: "An iron kettle was filled with elarcoal, and had a slit in one end to permit the smoke to escape, a fire being built in it to keep the water warm.

The other day Mr. Sim Bowies, who The only frue arboreal snake whose colives in Mitchell County, Ga., was walking around his mill-pond, which is situated at the forks of two creeks. In his peregriations he came across a cave. Leading from it through the earth was genus are all nocturnal, and by day hide in holes, so that a green disguise would a pole and began investigating. The After that he returned with two teas are cased in bags of brocade. These jars and incased in bags of brocade. These jars and incased in bags of brocade. These jars and ivery tops. Next in order came a peculiar looking vessel containing water, had ivory tops. Next in order came a peculiar looking vessel contains water, which was placed under the table. The next and last article brought in singly was carried with great care. It was a top was carried with great care. It was a top was carried with great care. It was a top was carried with great care. It was a top was carried with great care. It was a top was carried with great care. It was a top was carried with great care. It was a top was carried with great care in form, but remarkable for its antiquity and historical associations. This, it was explained, is always the gem of a Japanese of place knots to fill up their aching voids, and then take their olders the change of color is brought about to green of which we have no conception. These and a thousand other questions remain for solution. The familiar world which surrounds us may be a totally different from ours as some rare cases, as in the chameleon, a lizard-like animal which turns from dull the boundaries of our own senses there may be endless sounds which we cannot the boundaries of our own senses there may be endless sounds which we cannot the boundaries of our own senses there may be endless sounds which we cannot the boundaries of our own senses there may be endless sounds which we cannot the boundaries of our own senses there may be endless sounds which we cannot the boundaries of our own senses there may be endless sounds which we cannot the boundaries of our own senses there may be endless sounds which we cannot the boundaries of our own senses there may be endless sounds which we cannot the boundaries of our own senses there may be endless sounds which we cannot the boundaries of our own senses there may be endless sounds which we cannot the boundaries of our own senses there may be endless sounds which we cannot the boundaries of our own senses there white to a variety of tints in hard trust from ours as some rare cases, as in the chameleon, a lizard-like animal which turns from dull the boundaries of our own senses there may be endles down a number of piae knots to fill up their aching voids, and then take their movable pigment cells buried deep under their aching voids, and then take their movable pigment cells buried deep under the skin, which, when the helpless this would be a good opportunity to test this belief, and accordingly one of the reptiles was cut open. Within it was several lightwood knots, and now Mr. Bowles is ready to testify to the truth of the skin and the same power of taking a several lightwood knots, and now Mr. Bowles is ready to testify to the truth of the skin and the skin and then take their movable pigment cells buried deep under the skin, which, when the helpless tready to testify to the surface. There is a several lightwood knots, and now Mr. Bowles is ready to testify to the truth of the skin and the this theory as to the capacity of the alligator for digesting the knots of the pine
