Putting the population of New York city this year at 1,675,000 the Sun calculates that there are more people in New York than in any one of the following States: Alabama, Arkansas, Calitornia, Colorado, Connecticut, Delaware, Florida (more than the total population of the last four combined), Kentucky, Kansas, Louisians, Maine, Maryland, Minnesota, Mississippi, Nebraska, Nevada, New Hampshire, New Jersey, Oregon, Rhode Island, South Carolina, Vermont, West Virginia, or in the four new States of North and South Dakota, Washington and Montana.

The New York Sun says: "Delightfullest among the humors of the census s the case of the Minneapolis enumerators who came poaching within the limits of the fival city of St. Paul, seeking whom to enumerate. Promptly St. Paul arrested them. Then St. Faul carried the war into Minneapolis and seized more enumerators with their plant, Part of this consisted of lists of Scandinavian surnames and forenames, the which, being compounded after the manner of drugs, created enumerated officers of Minneapolis. St. Paul had no mind to take any such medicine and shrilled exexcedingly. Then Minneapolis found a Minnespolis dog enumerated on St. Paul's list as 'Carl Baxter,' colored, and St. Paul drooped.
