

To make a mad dog order, to a man to his list. A man made mad is one who, after suffering 10, 15, 20 years with rheumatism, finds that by the use of a bottle of St. Jacobs Oil he is cured. He feels the waste of his life in pain, with the loss of time, place and money, and then reflects that for the expense of 60c. he could have saved all this and lived free of pain; it is worth knowing that for the cure of rheumatism, and throbbing pain that we find out at last only by the use of the best cure. It is worth knowing that for the cure of rheumatism, and throbbing pain that we find out at last only by the use of the best cure. It is worth knowing that for the cure of rheumatism, and throbbing pain that we find out at last only by the use of the best cure.

Be careful where you stop, and those who follow you will stumble less.

How's This.

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

We, the undersigned, have known J. C. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions, and financially able to carry out any obligations made by him in respect to the sale of Hall's Catarrh Cure.

AGENTS: We want one agent in this County to sell to families. Best paying GUY'S CHERRY CO., Washington, D. C.

### The Best Rest Test.

There are two kinds of sarsaparilla. The best—and the rest. The trouble is they look alike. And when the rest dress like the best who's to tell them apart? Well, "the tree is known by its fruit." That's an old test and a safe one. What's the rest of the record of these sarsaparillas? The one with the deepest root is Ayer's. The one with the richest fruit; that, too, is Ayer's. The one with the richest half a century of cures; a record of many medals and awards, culminating in the medal of the Chicago World's Fair, which admitting Ayer's Sarsaparilla as the best—shut its doors against the rest. That was greater honor than the medal, to be the only Sarsaparilla admitted as an exhibit at the World's Fair. If you want to get the best sarsaparilla of your druggist, here's an infallible rule: Ask for the best and you'll get Ayer's. Ask for Ayer's and you'll get the best.

### Free From Care

He went back to the farm, a wise man. It was only an arm's length from the village; when he drove in for the July magazine and daily paper, the basket of eggs and the tub of butter under the buggy seat paid his grocery bills. While he was listening to lectures on those and pigs were growing in the fence corner. There was always a pumpkin in the cornshock just when the good wife needed one. He could sit up till ten o'clock at night, reading, without any worry as to how the ten barrels of apples in the cellar were to be paid for to-morrow. As the squire said, "There was always a little something coming in." First in the spring were the apples, and potatoes out of the pit, then a bunch of fat sheep, next the wool clip, maybe some old wheat, then the new wheat, a few hundred bushels of corn, some fat steers, and lastly the pork. And the wonderful stories of sausage, scrapple, spareribs on ice, winter turkey, and so forth, provided for winter—somehow it seemed as if they had not cost anything in particular—just grown!—for even the eggs and the fowls of the stubble came from the farm. It is true he worked hard all day. But after a bath and change of apparel he could sit in the parlor and enjoy his daughter's piano-playing, or meet with his neighbors in the little girl's room; the pieces of cane, if rubbed together quickly, give a tiny light. Then he set to work to find out the reason; and after some time—thanks to the observing powers of his little friend, and his own kindness to her in not impatiently telling her not to "worry" as so many mothers have done—Humphrey Davy made the first of his interesting discoveries. Every red, cane, and grass has an outer skin of flinty stuff, which protects the inner tissue, and also helps the frail-looking leaves to stand upright.

### An Accidental Discovery

When Humphrey Davy was a boy of sixteen, a little girl one day came to him in great excitement and asked why, when he rubbed two pieces of cane together, they should make a spark of light. Humphrey was a studious lad, who spent his hours in thinking out scientific problems. He noticed the child's curly head and said: "I do not know, dear. Let us see if they really do make a light, and then we will try to find out why." He soon found that the little girl was right; the pieces of cane, if rubbed together quickly, give a tiny light. Then he set to work to find out the reason; and after some time—thanks to the observing powers of his little friend, and his own kindness to her in not impatiently telling her not to "worry" as so many mothers have done—Humphrey Davy made the first of his interesting discoveries. Every red, cane, and grass has an outer skin of flinty stuff, which protects the inner tissue, and also helps the frail-looking leaves to stand upright.

If called upon to give an unfavorable opinion as to a saying or a work of which you disapprove, do not be eager to communicate your disapprobation merely because your self-love is flattered by the appeal made to your judgement.

All things are good and beautiful to those who have the talisman which transforms the common into the rare, the accustomed into the precious; and that talisman is love—the love which selfishness is only too apt to destroy.

### Life Isn't Worth Living

to one who suffers the maddening agony of eczema, itchy eruptions of the skin from a simple chafed skin, or a long standing eczema completely, quickly and surely cured by Testosterone.

What is the price of Testosterone at drug stores? It will cost you from 2-7-1/2 Shuppette, St. Francis, Ga.

The man who robs another of his right loses most by the transaction.

No-To-Bac for Fifty Cents.

Regular or extra. Why not let No-To-Bac regulate or remove your desire for tobacco? It cures eczema, restores health, and unloads the system. 50 cents and 1.00, at all druggists.

The world has learned more from its poor than from its kings.

It is permanently cured. No fits or nervousness after first day's use of Dr. King's Great Nerve Restorer. Trial bottle and treatise free. Dr. J. C. King, Ltd., 301 Arch St., Phila., Pa.

To close your heart against a brother is to shut heaven against ourselves.

CASARET stimulates liver, kidneys and bowels. Never sicken, weakens or gripes; 10c.

No prurient meeting was ever killed by the proper medicine, but it is too short.

I cannot speak too highly of Pink's Cure for Consumption. Mrs. FRANK MORSE, 215 W. 23d St., New York, Oct. 29, 1894.

Persons of the skin whose only defense is that it is highly respectable.

When billions of cures, cast a Casaret, casti cathartic, cure guaranteed, 10c, 25c.

Looking a difficulty upon the face will often kill it dead.

Mrs. Winslow's Soothing Syrup for children, cures all colic, soothes, reduces inflammation, always brings wind and colic, 25c a bottle.

No sin is so little that it may not become the soul's master.

Just try a box of Casarets, the finest liver and bowel regulator ever made.

Friendly Feeling For Weather Vanes.

In this country weather vanes are sold everywhere, and persons of all sorts buy them, but there are no better buyers than the Germans and the Hollanders, in whose lands vanes are more commonly used than here. They look a fondness for vanes, and they like to see one turning over some part of their possessions. A native of either many or of Holland who has a place of his own here, even if it were only a little house in some small town, would very likely to have a weather vane upon it.

### Intelligence in Hens

It may not seem to be of much importance that hens should be intelligent; but it is. I find the best layers are, as a rule, the most teachable and every way wisest. I have a little busy-body hen, called the "Intelligence" egg, and she is nearly as intelligent as my Scotch collie. She speaks to a human friend in tones unlike those used to the flock. Another, in a flock of Plymouth Rocks crossed with Light Brahma, proved to be a special wise creature, and as companionable and affectionate as a cat. By some accident her leg was broken. We splinted it; but the leg through sits out in a sack stretched over the top of a box. She laid for three weeks, talking with us, and apparently fully comprehending the situation. She, too, is an excellent hen for eggs, for, although she lays but for meat instead of eggs, I believe that intelligence is of special importance with cows; and I will not say one that is not first of all satisfactory in the face and head. It will pay, apart from milk and eggs, to have all our dairy cows of a companionable and kind disposition.—E. P. Powell, Onida County, N. Y., in New England Homestead.

### Help Your Neighbor Along

It is to be regretted that in many of our rural districts there exists a feeling of jealousy which should not be there, writes P. P. Dunham. Why should any farmer, or anyone else for that matter, be jealous or envious of anything but a kindly feeling toward his brother in the same line of business? Yet it is no uncommon thing to see farmers, living on the same street, and some of them who are well-to-do, and who should be able to help one another, but who are so full of jealousy that they will not speak, or if they do, they are so full of jealousy that they will not speak, or if they do, they are so full of jealousy that they will not speak.

### Lived Three Centuries

At first thought it appears well nigh impossible that one human life could touch three centuries before death came. The English papers have recently published a list of names of persons who lived three times change the last numeral in the year date.

Mr. John White, a Cambridge-shire lady, died on March 23, 1893, in the 104th year of her age, which facts are recorded on her gravestone in the southwest corner of the churchyard of Little Waltham, about six miles from Cambridge.

Thomas Parr, more familiarly known as "Old Parr," was born in 1483 and died in 1657, at the age of 162 years and 16 days. He lived 162 years, 16 months and 16 days, or 195 months and 16 days, or 730 weeks and 4 days.

On a tombstone in Llandaf Centre, N. H., is the following: "Willow Green, the wife of John White, born August 31, 1699, and died June 12, 1862, aged 103 years." She thus lived in the seventeenth, eighteenth and nineteenth centuries.

### To Preserve Flowers' Colors

The natural colors of flowers may be preserved with almost their original brilliancy after being dried, by thoroughly in sand. The Gardener Monthly, which suggests this simple process for manufacturing artificial flowers, states that the most delicate flowers can be made in this way to look for several years as though they had been freshly gathered. The flower should be placed in a pan or other dish and covered with perfectly clean, dry sand. This should be sifted over the flower so as not to break or bruise the petals. Every clink and cranny should be filled without disturbing the natural position of the leaves. When the pan is full and every crevice has been filled solidly the flowers are allowed to dry for several days. It is often effective to warm the sand and keep the buried flower in a warm oven. The sand should not be removed, great care being taken not to break or bruise the leaves, which will be very brittle.

### The Artful Alligator

Even the ugliest of creatures must live, although some people may fail to see any necessity for their doing so. Anything more evil looking than an alligator it would be hard to imagine, and, like other loathsome beings, it has great powers of mischief. So the animal that lives near it, how a reasonable distance from it. If, however, it does get footed, it is a creature of Nicaragua, in Central America, uses a variety of dodges. For instance, it lies as if dead on the river banks, and sooner or later is able to snap up some foolish animal; or it floats like a log on the water, with only its eyes above the surface, and when it sees a nice family party of water fowl it measures their distance, quietly sinks, then rises just below them, grabs a few legs and drags their owners below. It also dodges wild pigs by almost burying itself in the mud and taking off its victims as they come to drink.

### On the Shores of Maryland

As the waters of Maryland produce one third of the oyster supply of the world, the quantity of shells landed on her shores is enormous, and the shell mountains, like Doffin's dust heaps, are no inconsiderable features of the landscape. Until very lately the oyster canning firms had much trouble in getting rid of the shells, having to pay, in fact, for the removal of all they could not give away. Recently, however, they have been able to sell them. They are now shipped to all parts of the country and are utilized variously for roads, for lime and for making coal gas. They have been found also to serve almost as well as stone in the manufacture of special grades of iron for railroad beds. Cultivators of oysters also employ them, having found that they afford suitable surfaces for young oysters to attach themselves to. They are likewise used to some extent as chicken food. They are very good for hens, the shells of eggs being largely made of them. The trade received twenty-five thousand dollars in a single year for the empty shells.

### A Remarkable Discovery

Two remarkable discoveries of a long distant past have just been made in Rome. At the back of the Pincian Hill, where it overhangs the Via Margutta, excavations have recently revealed the existence of a villa which is attributed to the first century of the Christian era. It is a sumptuous construction which no returns to the light. Two bas-reliefs of about five square yards, one of which is broken in fragments and the other intact, exhibits a series of designs which are said to illustrate scenes in the life of the owner of the villa. This owner is said to be Trinitus Montanus, an artist of considerable reputation whose mural paintings adorn many houses of the imperial period. A gold grained mosaic decorating the interior of a niche, and some painted walls were also discovered, as well as two Hermes or terminal marble posts which stand at the corners of garden walks, and are surmounted by busts. It is expected that a series of columns in their original sites will soon be brought to light.

### A Problem

Talking of the hat, it is sometimes hard to know what to do with it. In church, the man who puts his hat under the seat invariably finds, at the end of the service, that it is wandering about about the spot where he placed it, and that some heavy-footed lady has mistaken it for a footstool. Sarah Bernhard, in her reciting days, used to relate a story of a man at a musical who lost a charming young lady because he couldn't see her. Her carriage without his hat, and he couldn't get his hat because a stout man had fallen asleep in a chair planted directly by a chandelier on which the hapless man had placed it. It was a terrible tale, and true, and because it might so easily have been sadly true.

### Much Cause For Gratitude

Of a certain bishop the following anecdote is told: While presiding over a conference, a student began a tirade against the universities and education, expressing thankfulness that he had never been corrupted by contact with a college. After proceeding for a few minutes the bishop interrupted with a question: "Do I understand that Mr. X is thankful for his ignorance?" "Well, yes," was the answer, "you can't put it that way if you like." "Well, all I have to say," said the prelate in a sweet and mild tone, "all I have to say is that Mr. X has much to be thankful for."

### A VETERAN'S WIFE

Affected With Heart Disease and Given Up to Die. Saved in a Wonderful Way.

From the Press, Union, N. Y.

There is no one better known or respected in the village of Brookfield, Madison Co., New York, than John E. Park, who was an old resident and veteran of the war of the Rebellion. In April of this year, Mrs. Park lay at death's door from neuralgia and heart disease, the family physician having recommended that she settle all her worldly affairs, as she was unable to take any more food, and her friends expected at each visit to hear that she had passed away.

But Mrs. Park, to the surprise of her neighbors and physicians, suddenly began to mend, and now she is in strong and healthy condition. Her husband, aged 75 years, a woman of her advanced age, and who could be found, and really does not appear nearly as old as she is. The following is her own story of how she was cured, and the community to tell of my extraordinary recovery from what was thought by my physicians, my husband and friends to be a fatal disease. I had long been suffering from neuralgia in the head, and had been told that only those who have had neuralgia such as I have, could understand my case. I was affected functionally and occasionally, but the doctor said I was in a way that I was to pass away. He had done all that was possible for me, and I thank him much for his kindness and attention, and believe him to be a good, faithful physician, and one who is disposed to do all he can for his patients. I have had, however, if I could help it, and he having done all he could, I felt at liberty to use any other means that held out a chance of life, and determined to try a remedy that had been recommended by a friend who had been cured of neuralgia and heart disease, and who now is in good health.

"Whatever doubt I may have had as to this remedy's efficacy for a dismiser disease," to that from which I had suffered, was dispelled on reading in the Press of a case identical with my own being cured, with the same and in less time. My husband who now was anxious that I should at once take the medicine, purchased for me a box of Dr. Williams' Pink Pills. I took them according to the directions, and within a very short time the pains began to disappear, my heart's throbs became normal, and four weeks ago I was able to do my usual household work, and able to do my own work as well as when I was a young woman.

"I have always," said Mrs. Dr. Williams' Pink Pills, looked with suspicion on all advertised proprietary medicines, but now my mind has been undergoing a wonderful change, and that direction, for under God's all wise direction, Dr. Williams' Pink Pills have renovated me, and I have been able to do my usual household work, and able to do my own work as well as when I was a young woman.

"This is no secret in this locality, and I trust the certainty that may be the means of other sufferers in distant places securing the same benefits that I have received.

Pink Pills are sold in boxes (never in loose form) by the dozen or hundred, and the public are cautioned against cheap imitations sold in this shape at 25 cents a box or 50 cents a dozen, and may be had of all druggists, or direct from Dr. Williams' Pink Pills (Medicine Company).

### Motherhood.

A mother who is in good physical condition transmits to her children the blessings of a good constitution. The child fairly drinks in health from its mother's robust constitution before birth, and from a healthy mother's milk after.

Is not that an incentive to prepare for a healthy maternity?

Do you know the meaning of what is popularly called those "longings," or cravings, which beset so many women during pregnancy?

There is something lacking in the mother's blood. Nature cries out and will be satisfied at all hazards.

One woman wants sour things, another wants sweets, another wants acids, and so on.

The real need all the time is to enrich the blood so as to supply nourishment for another life, and to build up the entire generative system, so that the birth may be possible and successful.

If expectant mothers would fortify themselves with Lydia E. Pinkham's Vegetable Compound, which for twenty years has sustained thousands of women in similar condition, there would be fewer disappointments and more healthy children.

In the following letter to Mrs. Pinkham, Mrs. Whitney demonstrates the power of the Compound in such cases. She says:

"From the time I was sixteen years old till I was twenty-three, I was troubled with weakness of the kidneys and terrible pains when my monthly periods came on. I made up my mind to try Lydia E. Pinkham's Vegetable Compound and was soon relieved. After I was married, the doctor said I would never be able to go my full time and have a living child, as I was constitutionally weak. I had lost a baby at seven months and a half. The next time I commenced at once and continued to take your Compound through the period of pregnancy, and I said then, if I went my full time and the baby lived to be three months old, I should send a letter to you. My baby is now seven months old and is as healthy and hearty as one could expect."

"I am so thankful that I used your medicine, for it gave me the robust health to transmit to my child. I cannot express my gratitude to you; I never expected such a blessing. Praise God for Lydia E. Pinkham's Vegetable Compound, and may others who are suffering do as I did and find relief, and may many homes be brightened as mine has been."—Mrs. L. Z. WHITNEY, 3 George St., E. Somerville, Mass.
