The Vagabonds of Siberia In many parts of Siberia there wander about from village to village large numbers of men and women who are known as "vagabonds." Those are Russians and Poles -people who have either themselves been sent to Siberia, or are the descendants of

criminals or outlaws.

These "vagabonds" are passportless people, over whom the police cannot exercise any very (flective control. They are now to be collected and compulsorily settled in small colonies in those parts of Siberia where the climatic conditions most favor agricultural

The scheme, it is believed, has the hearty support of the czar, who is pre-rared to devote large sums from his private means to further its success.

Exotic Animals.

On the thousand acre menagerie farm in California will be tried an experiment in the breeding of elephants, hippopotami, lions, tigers, llamas, nilgaus, kangaroos, and other tropical and exotic animals, such as are in common demand for purposes of exhibition. The design is to obtain the conditions suited to every sort of animal used for exhibition, and the proprietor thinks that he can come nearer to realizing these conditions in California than anywhere else. Natives of the various countries from which the animals come, who are accustomed to their ways, will be employed to look

Tinicst Shears Ever Made. A clever workman in a cutlery factory in Sheffield, England, has recent ly made a dozen pairs of shears each so minute that they all together weigh less than half a grain. That is about the weight of a postage stamp. Each pair was perfect, and would cut if sufficiently delicate material could be found. Lying on a piece of white paper, they seemed no larger than fleas.

Good Looks. There are more wrinkles in the face of baby monkey than there are in that of an old baboon. And speaking of wrinkles, more of them can be wrought out in a fair voi them can be wrought out in a fair young face by neuralgia than will be found in that for an aged person. Constant pain will shrivel, and neuralgia neglected will plow its furrows deep. It not only wrinkles, but takes the bloom away and gives the skin a dull and yellow look. St. Jacobs Oil is a prompt and sure cure for neuralgia, and it should be used, as while it soothes and cures, it smooths out the tracks of pain and leaves the skin healthy and fair again; besides it rids his sufferer of much torment and restores a happier disposition. Good looks come only with good health, and health is found in the absence of pain.

"The foolish and the standard of the foolish and the side of the skin and the standard of the foolish and the standard of the standard of

"The foolish and the dead alone nevel change their opinion," once said Abraham Lincoln.

GIRDLING PRUIT TREES. There is a common opinion that

gizdling, or the removal of a small means over 17,000,000 gallons of water ring of bark from a limb or the body on every square mile. The plants ring of bark from a limb or the body of the tree, will induce fruiting the coming season, as the sap coming back from the blossom is retarded and blossom buds are formed for the next season. The common practice is to remove a ring of the bark. Mr. Dart, however, advices removing a spiral and finds that this gives better satisfaction from the fact that there is less dauger of injuring the tree. To make a barren tree bloom, girdling should be done the last of July or the first week in Angust. About the only excuse for this practice is when it is desired to induce early fruiting, so as to learn the value of a variety as soon as Work a little more by plan and system. sired to induce early fruiting, so as to learn the value of a variety as soon as possible. Cut out one-fourth inch of bark around some branch that will be removed anyhow in pruning. This has been practiced by experimenters, but it invariably results in causing a dead spot difficult to heal over when the branch is finally removed. It is generally agreed that the spiral system of girdling is the most satisfactory. of girdling is the most satisfactory .- better. Dunne Cook, of Minnesota.

GROWING JONQUILA.

Mrs. Margaret Deland, of Boston, menting to see what are the possibilities of making money in window flower raising by women and girls who live in one or two rooms. While there are not "lots of money" in it, quite a substantial bit may be added to a slender in own Tast Sentember about the live of money. The standard of the lot of money is in the ready buyer at a high price.

Flowers Delivered by Wire. income. Last September she planted two thousand balbs; about fifty failed to come up. The year before she planted twelve hundred, and only twenty failed to appear. The bulbs cost one to three cents apiece. In potting, a layer of moss is put in the bottom of the pot, then a spoonful of churcoal, then rich soil to within an inch of the top, in which are planted eight or nine builts. Water thoroughly, then leave in a cool, dark place six weeks to two months, until the roots come through the bottom of the pet and there is quite a bit of green. Then bring them out and keep well watered; keep water in the saucer. They do not need sunshine. There were eightyfive plants ready and in bloom the day of the sale, at \$1, \$1.25 and \$1.50. The proceeds went to help a woman make anccess of flower raising next year. A woman in one room can easily make \$15 on jouquil raising. The entire cost is about twenty ceuts a pot. and at wholesale they would bring

COLTS ON THE PARM.

profitable. A good team or teams of brood mares can do nearly or quite as much work as horses, and if kept in good condition and properly bred to a good sire will bring a good colt. Outside of the cost of service it will cost practically nothing to raise until it is ready to wean. Then after it is two and a half years old, if proper care has been taken in training, it will be able to do sufficient work to pay for keep until matured. So that under average conditions the cost of service and of feed-ling for two years will make the cost of the cost of service and of feed-ling for two years will make the cost of the cost of service and of feed-ling for two years will make the cost of the cost of service and of feed-ling for two years will make the cost of the cost of the cost of the cost of service and of feed-ling for two years will make the cost of two charges and the cost of the cost of the departed almost as if laid there by the loving hands of the sender.

We are driving a team of good young horses, one three and the other four years old, that were raised Carrier piecen lefts for the homing other four years old, that were raised in this way, and they are able to do a yery large amount of work. And any thing like a fair coit will sell for double the cost of tha feed for two double the cost of the feed for two

Shepherd, in Nebraska Farmer.

FARM AND GARDEN NOTES.

The planting of a tree, whether for The planting of a tree, whether for fruit, timber or ornament, increases the value of the land. The value of many farms could be almost doubled in a few years, at least in a generation, by judicious tree planting.

Comfort and convenience are most essential features to the country home. and if the farmer would keep the wrinkles of care from his brow and have those about him happy sud contented, he will look to these matters are planted.

As a usual thing the positions that one of them will carefully and well.

WHEN ROASTING MEATS. HOUSEKEEPING A PROFESSION.

very insignificant quantity, but it should have come from women.

If a farmer proposes to engage in dairying only to add to the stock of poor butter with which we are already deluged, he would better stay out; the well known writer, recently had but with our advanced knowledge her second annual sale of jonquils, eays the Advertiser. She has been experiments was a time in which there has never was a time in which there has been an over-supply of really good

Flowers Delivered by Wire.

If you wish to send a box of American beautics to some person in Sau Francisco to-night you can buy them in Chicago and have them delivered fresh and fragrant within half an hour.
If your fair one resides in New
Orleans, Boston or Philadelphia, or any other large American city, you can do the same thing in the same way. It can be done even in the Enropean capitals.
Florists of the United States are in

a pool for the rapid delivery of soms. The pay for the service is effected by a system of trade balances through a sort of clearing house. You go to a florist in Chicago and tell him you want to send two dozen American beauties to so and so in San Francisco. He makes out a bill, plus the cost of a telegram, takes the money, and the flowers are in the hands of the reci-pient almost as quickly as if delivery

were made in Chicago.
The telegraphic delivery of flowers is called into play frequently. If a friend is to be married and some one who hoped to sitend the ceremony cannot do so for any reason, it is a So long as leams are necessary on pleasure to know that a vase of roses the farm to do the work with proper takes the place of the absent one. If management the raising of good colts he likes, his card may be attached to made to some extent at least the white ribbon that binds the long ble.

thing like a fair coit will sell for double the cost of the feed for two years. By the time one team of colts has matured sufficiently to be ready to sell, another younger team can be ready to do the work.

Stations on the British coast by the British Admiralty. The Westminster Budgetsays: "We either actually have, or are shortly to have, pigeous stationed at Portsmouth, Sheerness and Devouport. In the French navy the Sarvier pigeon has been recognized for Of course good mares should be kept, and they should be bred to a good horse. It is hardly advisable to keep and breed a plug mare, and especially if she is bred to a scrub horse. A colt from a mating of this kind would hardly sell at a profitable price, but there is no good reason for raising a colt of this sort. Average good mares can be secured so cheap that it is good economy to have good mares and breed to good sires, using all reasonable care to raise good colts, and if there is any where that they can be raised profitably, it is on the farm where the mares can be used to an advantage in doing the work and the colts may be used sufficiently to pay for their keep ar soon as they are old enough.—N. J. Shepherd, in Nebraska Farmer. ganized pigeon services to aid in coast defense, and pigeons are regularly employed in the Italian naval maneuvers."

An Absolute Yacuum, An absolute vacuum, or what is believed to be one, was recently pro-duced by Professor Eimer Gates, of Washington, by a novel method. Into a test tube made of a kind of glass If you have a pear tree that bears cracked fruit scatter wood ailes all over the surface of the ground under the tree out about two feet beyond the outer limbs; then at fruiting time outer limbs; then at fruiting time air space. After melting this inner completely filling the tube, leaving no constitution the result. prowers of fruits, berries, and all kinds of vegetables, know that the largest yields and best quality are produced by the liberal use of fertilizers.

Indice the result. If the ashes can bo stirred two or three inches in the soil, all the better.

Live stock on the farm makes the larm capable of giving a profit. The animals provide a market at home for a large-share of the products and permit of selling in concentrated form that the end of the tube was completely closed. It was then allowed to cool. As no air cculd enter the space that which would otherwise be too but that a perfect vacuum was obtained.

A Tree Cleek. Without the liberal use of Pot ash on sandy soils, it is impossible to grow fruits, berries and vegetables of a quality that will command the best prices.

All about Potash—the results of its use by actual experiment on the best farms in the United States—told in a little book which we publish and will gald mail free to any farmer in America who will write for its load in a little book which we publish and will write for its load in a little book which we publish and will gald mail free to any farmer in America who will write for its farms in the United States—told in a little book which we publish and will gald mail free to any farmer in America who will write for its farmer to feed such cows very fact.

It is not best to milk a cow too close to the period of calving. She could be allowed to go dry for six hades a part of the piazza, while, as the sunlight changes, the "16 o'clock tree" shades a nother part, and so on through the day. On a bot summer than free to any farmer in America who will write for its farmer to feed such cows very day this "tree clock" insures a suscentific to any farmer in America who will write for its farmer to feed such cows very day this "tree clock" insures a suscension of shady p'acce around the louse at every hour of sunlight. For example, explains Rural New Yorker, at 9 c'clock tree" shades a part of the house at every hour of sunlight. For example, explains Rural New Yorker, at 9 c'clock tree" shades a part of the piazza, while, as the sunlight changes that one of them will shade a portion of the house at every hour of sunlight. For example, explains Rural New Yorker, at 9 c'clock tree" shades a part of the piazza, while, as the sunlight changes that one of them will nour of sunlight. For example, explains Rural New Yorker, at 9 c'clock tree" shades a part of the piazza, while, as the sunlight changes that one of them will nour of sunlight. For example, explains Rural New Yorker, at 9 c'clock tree" shades a part of the piazza. HOUSEHOLD AFFAIRS.

When meats are roasting and there is danger of their becoming too brown. place a basin of water in the oven The steam will prevent scorching and the meat will cook better.

According to Miss Talbot, of Chieago University, housekeeping is not irudgery, but one of the most comolicated and difficult of professions, nvolving the most intricate problems in economics. She is of the opinion that few women know anything about the chemical principles involved in the proper preparation of foods, and the recent discoveries along this line have been made by men, when they

HOW TO SWEEP AN INVALID'S ROOM. We all know how untidy a sick room becomes and how annoying the dust of the sweeping is to the patient. "To the sweeping is to the patient. "To remedy this," said a trained and capable nurse recently, "I put a little am-monia in a pail of warm water and with my mop wrung dry as possible go all over the carpet first. This takes up all the dust and much of the loos A broom will take what is too large to adhere to the mop and raise no dust. With my dust cloth well sprinkled I go over the farniture and the room is fairly clean."

A HOME MADE BEG

Have your blacksmith bend two heavy wires in the shape of a hair pin, twenty-four inches long and two inches between the prongs. On these wind woolen rage cut half an inch wide, winding them in and out as you crimp your hair. Prepare a foundation -- a piece of old ingrain carpet or a coffee sack answers well, the carpet being the best. Lay one of the filled pins on one end of the foundation and stitch down through the center on the machine. Pall ont the pin and lay the other, similarly filled, in place, pressing back the loops from you pulled the wires, so as to bring the next row close to them. The rows of stitching should not be more than three quarters of an inch spart. The loops may be cut or left whole. Two persons can work at this advantageons ly, one winding the pins, the other doing the stitching. The rug thus made is very durable. Dark colors are preferable; hit and miss gives a good effect. — Detroit Free Press.

POST ON THE REPRISERATOR. Keep the refrigerator in a cool, dry place, near a window if possible. Heat and moisture cause rapid melting of ice and decomposition of food.

Flood caveral times a week with cool, dry, outdoor nir. Wipe shelves, floor and cailing of food chamber with a dry cloth daily. Once a week clean thoroughly with trong sud.

The ice-pan and waste-pipe require special care. Wash the latter with a swab, and flood with strong solution of bicarbonate of soda. Rinse every compartment with hot

and cold water once a week, and then air at least an hour. Never attach drain-pipe to sewer or drain. A few few pieces of charcoal in the food chamber aids in freeing it from

same as atrawberry abortcake. Bake in two layers, and spread the chopped pineapple between the layers after the

Breaded Potatoes-Peel small potatoes and boil them in salted water. Do not let them boil soft. Dip in beaten egg and fine cracker crumbs, and fry in hot fat, turning frequently, that the

color may be a uniform one. Peach Meringne Pie-Slice good canned peaches into deep pie plate lined with rich crust. Sugar well and stir into the juice a heaping teappoon cornstarch. Bake slowly. Make meringue of three egg whites for a large pic, flavoring with lemon. Serve cold with cream.

Custard Corn Cake-Two eggs, onehalf cup sugar, one cap sweet milk, one cup sour milk, one teaspoon sods, salt to taste, one balf cup flour, one and one-half cups corn meal. Mix thoroughly, pour into heated buttered the man and then pour into the middle pan, and then pour into the middle without stirring, one cap sweet milk. Bake in hot oven one half hour.

Rice Milanaise—Chop fine a good-sized onion and fry in butter until a golden color, then add a cupful of rice and half a dozen mineed musbrooms. Stir for two minutes, and add a quart of boiling broth. Stir lightly once. Cook for twenty-five miuntes. Senson with one teaspoonful of salt, one-tourth of a teaspoonful of pepper and

half a cup of grated Swiss cheese. Lettace and Grape Fruit Salad-Tear a head of washed and drained lettuce into pieces. Pare and divide into carpels one grape fruit. With a peaknife, slit the white skin that envelops each carpel, take hold of the two ends, bend it back and the fruit will fall out in little pieces, when the seeds may be easily removed. Pour fenit and juice over the lettuce and serve with a French dressing containing very little vinegar.

Fow! and Rice Croquettes-Put one half cupful of rice in one pint of stock, and let it boil gently for one hour; then add two tablespoonfuls of butter and simmer it till quite dry and soft; when cold, make it into balls, hollow out the unside and fill with minced fowl delicately seasoned; cover over with rice, dip the balls into beaten egg, then into bread crumbs; fry them carefully to a nice brown and serve

War Vessels Being Built,

There are now in process of building for the British navy 89 ressels; for the French, 33; for the Russian, 39; for the German, 19, and for the Italian, 13. Of the vessels which are being built by Great Britain, 45 are torpedo boats, while of the other Powers Italy is the only one building any and she only 1. Of battle-ships, England is building 12; France, 6; Russia, S; Germany, 3, and Itply, 2.

Firing Under Water:

A stage was erected in the harbor of Portsmouth within the dide mark: on this an Armstrong gun of the one hundred and ten pound pattern was mounted. The gun was then loaded and carefully aimed at a target while the tide was low. The target itself was placed only twenty-five feet from the muzzle of the gun. It was composed of oak beams and planks, and was twenty one inches thick. In order to make the Griper invulnerable, a sheet of boiler plates three inches thick was riveted to the water-logged hull in direct range with the course the ball was expected to take if not deflected by the water.

On all of these-the oaken target.

the beiler plates, and the old vessel's hull-the effect of the shot from the submerged gua was really startling. The wooded target was pierced through and through, the boiler iron target was broken into pieces, and driven into its "backing," the ball passing right out through both sides of the through which the wall poured in torrents. Taken altogether, the experiment was an entire success.

The Greatest of Rivers. The Amazon is the king of streams From first to last it receives over twelve hundred tributaries, of which more than one hundred are large-sized rivers and rise so far apart and have their floods and clibs at such different seasons that the Amazon is at bout the same height the year round. At some points on its lower course one bank is invisible from the other. The beholder seems to be looking on a great yellow sea of fresh water. When discovered, some tribes of Indians on the lower portion knew nothing of the existence of the opposite shore and did not believe that it existed, saying that "the great river flowed all around the world." Its mouth, including that of the Para, is one hundred and eighty miles in width, and it is navigable for large-sized steamers for one thousand miles from the sea, and so vast is the flood that the ocean is tinged yellow for four hundred miles from the coast Brazil.

Successful l'ailures.

Columbus discovered America through his failure to reach India, as he hoped to do by sailing westward. David Livingstone studied for three years with the sole aim of being a mis-donary to China. It was only be-cause his hopes were crushed by the "opium war," which made it impossible to enter China, that he thought of going to Africa and was the means of

opening up a whole continent to Christianity and civilization. Some years ago an ingenious plan was proposed by a man named Jog-gins for sending logs from Canada to New York by towing them, bound together by cables and iron girders, as rafts. The plan failed, as the first raft sent out met with a storm near the end of its voyage, the iron girders snapped and the logs were scattered far and wide. Eundreds of captains in the Atlantic, the Mediterranean and the South seas noticed these logs and reported on them. The reports were collected and systematized and deductions made from them as to the course of ocean currents. So the failure of the Joggins raft led to one of the greatest discoveries in modera marine geography and navigation.

Used by All Cinsers.

The tomato is popular with all classes in King Humbert's realm. In every home and cottage in Italy preserving of tomatoes is carried on. Terraces, balconies, and even the flat roofs of the houses are half covered with plates containing the deep red substance. It is a picturesque sight when the women are to be seen flitting about on the roofs and terraces, attending the deep red preserve, their colored handkerchiefs flung over their heads to screen them from the rays of the burning sun when it is at its flercest. Though the preserve is used by all classes of persons, it is more necessary to the poor than to the rich, for the latter can make use of the fresh tomatoes preserved in tins. Tomatoes may be tinned whole, as we know from those usually imported into England from America. But in Italy the fruit is generally passed through a sieve, the pulp being then placed in tius, which are immediately soldered down and then put in boiling water for five minutes. The cost of a small tin is ball a franc, so it is as a rule beyond the means of the poor.

In the Sup. Scarlet seems the color most con-spicuous in bright sunshine, and scarlet flowers are commonest in dry and sunny climates, where their color gives them an advantage in their struggle with other flowers for the attentions of butterflies and other pollen bearers.

His Verdiet. An artist went to dine with a parvenu who invited him to look through his picture gallery. The painter did as he was bid, but never uttered a word. At last the host exclaimed, "Don't you think it is a tolerable collection?"
"Tolerable?—yes," allowed the artist: "but what would you think of a toleralle egg?"

Ponder Over It.

A prominent building owner, with years of experience, gave the following instructions to his architect: "I have had my experience with kalsomine and other goods claimed to be just as good as Alabastine. I want you to specify the durable Alabastine on all my walls; do not put on any other manufacturers' dope, if they furnish it for nothing. Alabastine is right, and when I cease to use it I shall cease to have confidence in myself or my own indgment." dence in myself or my own judgment.

Lots of people tell you they are bustlers when they know very well they are only

THE "GROWN-UP" DAUGHTER'S DUTY TO HER MOTHER.

You can only have one mother; therefore, when her step is growing slow and her mind gloomy with forebodings, and you can see that her whole nervous system is upset, it is your filial duty and privilege to attend to her in time! Mother is approaching the most critical period of her life.

The change of life.

is dreading, and no wonder, for it is full

of peril to all but the strongest There are some special and very wearing symptoms from which mother suffers, but she will not speak of them to any one. Help her out; she doesn't know what to do

for herself! Shall I advise you? First, send to the nearest drug store and get a bottle of Lydia E. Pinkham's Vegetable Comregularly, then write to Mrs. Pinkham, at Lynn, Mass., giving all the symptoms and you will receive a prompt reply telling mother what to do for herself. In the meantime the Vegetable Compound will make life much easier

for her. It tones up the nervous system, invigorates the body, and the "blues" vanish before it as dark-

ness flees from the sunlight. You can get it at any reliable druggist's. Mrs. Louis Schoon Harris Hill, Erie Co., N. Y., says: "I have been troubled with falling of the womb for years, was advised to take Lydia E. Pinkham's Vegetable Compound. I took thirteen bottles and received great benefit. When the time for change of life came I suffered a great deal with faintness and palpitation of

the heart. I got one bottle of the Vegetable Com-pound and one of Blood Purifier and was relieved again. I was thereby enabled to pass through that serious period very comfortably. DANDY CATHARTIC
