What to Do With Wet Boots When a man arrives home with wet oots he will usually either stand them in the fireplace or simply throw them of the way. The former method does harm to the boots, and the latter to should be set at a distance of about two feet away, with soles toward the fire; they will then dry gradually. If trees are available, put them in when the boots are about half dry; but it is to for the purpose a large, enclosed space with an arched roof, at least one hundred feet above the floor, and there should be very few two feet away, with soles toward the of no use treeing boots that are sod-

Keep in Shape. From the largest cities down to the mallest towns this is the month for the beginning of out-door sports of all kinds, and also the beginning of the season when sprains, bruises, hurts and mishaps are as plentiful as huckberries. Every spring this is a common experience, and the common experience has settled down to this that the best thing to do is to be provided with a supply of St. Jacobs Oll for emergencies of the kind as an especially sure cure for the worst sprain or the blackest bruise. Sportsmen, athletes, ball players and onrsmen have known this for many, many seasons, and reference to it is now only a reminder to get your supplies. Hard strains and over-work of the muscles will bring pains and aches, and sportsmen know what's best and are never without the surest cure in the use of the great remedy. also the beginning of the season when

pillars or other obstructions den if it is desired to wear them next floor may be sanded or not, as suits the

players.
The same rules that govern the national game apply in the indoor game. There are some few modifications, however. The ball is much larger and s softer, and the bat is smaller. This s to avoid the smashing of windows and the like. The bases on a regular ball ground are ninety feet apart. In the indoor game the distance is regulated by the size of the building, but forty-five is an average. Not only is the shortening of the bases due to the diminished space, but also to the diffi-culty found in throwing the big ball

any great distance.

While the length of the base line is diminished, the distance between the pitcher's box and the home plate is also correspondingly decreased. All the other rules of the outdoor game stand for the indeor game. There is little advantage in the outdoor game of a professional over the amateur.
The handling of the big ball is about as difficult for one as for the other. The pitcher cannot curve, and it is for this reason that the smaller bat is used. If a large bat was used there would be too much home-run getting. The game is played in the West-in Chicago principally | and is very popular there, but has not found much favor in other sections.

Her Only Criticism.

Miss Cayenno was very hungry, and c young gentleman's gallant efforts to be entertaining were not appreciated, says the Washington Star. He gave what he thought was a very hap-py imitation of the comedian at the play they had just seen, but she only sighed and looked wistfully at the nenu card. A cough from the waiter wakened him to the duties of the our, and he said. -

"Oh, excuse my thoughtlessness, won't you? What would you like to "Anything !" was the answer.

"But havn't you any preference?".
"No. I am sure I shall enjoy whatver you order."
"There's plenty of things to select from," he went on, as he glanced over the list. "Oysters, green turtle soup, bass, terrapin, filet of beef with mushrooms, Chateaubriand with trufflesby the way, speaking of steak reminds me of a conversation I had with a

The unbappy young woman looked like a shipwreeked sailor who had opened a hamper and found a comic paper in it.

'It was really clever," he went on-"I give you my word it was. It may not have been original, you know, but it was clever. We were taking break-fast together, and he asked me if I liked my steak rare. And I said no; I liked it frequent. First rate, wasn't

She nodded a pathetic assent. "I do say good things once in while, don't you think so?" "My dear Mr. Jinkles, you said ever so many good things earlier in the evening. The only trouble is-"
"Go on. I'm not afraid of criticism, you know."
"That you don't order any of.

them. Many regard themselves as moral, disinterested, truthful and gentle merely because they inexorably insist that others shall be so.

Life is continually weighing us in sensitive scales and telling everyone of us precisely what his real weight is, to the last grain of dust.

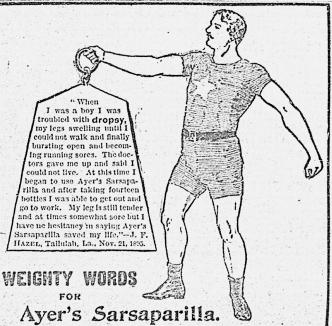

Merit Wine.

The invention of Alabastine marked a new ora in wall coatings, and from the standpoint of the building owner was a most important discovery. It has from a small beginning branched out into every country of the civilized world. The name "kalsomine" has become so offensive to properly owners that manufacturers of cheap kalsomine preparations are now calling them by some other name, and attempting to sell on the Alabastine company's reputation.

Through extensive advertising and personal use, the merits of the dumble Alabastine are so thoroughly known that the people insist on getting these goods and will take no chance of spoiling their walls for a possible saving of at the most but a few cents. Thus it is again demonstrated that merit wins, and that manufacturers of first-class articles will be supported by the people.

No human life would be possible if there were not forces in and around perpetually tending repair to the unds and breaches that he mimself makes.

Listen not to the tale-bearer or slanderer, for he tells thee nothing out of good will; but as he discovereth of the secrets of others, so he will of Nexe.

tis possible that by delaying plowing intil nearly June the clover will begin the control of the clover will begin the control of the clover will begin the control of the clover will begin the clover will be clover w to head out then, and it may be plowed inder in time for a late crop of potatoes. But that is wasteful of the lover, as its manurial value after being cut and fed is very nearly as great is that of the green herbage. It also wastes fertility, for after the clover is ent its second growth develops soil ertility much more rapidly than did the first. This leaves, to make the nost of the clover, only the alternative of cutting two crops of clover the secstubble in spring for corn or potato ground, as is the general practice mong the best farmers.

Good Roads.

It is now becoming evident that the ormers and others interested are beinning to move in the right direction secure for themselves good roads. n some States, especially the newer nes, in order to guard against appropriations by their State Legisla tures to railroads and other internal improvements which may have only a local value, the constitutions are framed to prohibit expenditures for

uch purposes.

In Wisconsin the prohibition seems o include public roads of all kinds. it is now proposed by some of the Asemblymen, in order to meet the needs ind demands of the farmers and others or good roads, to have the Constitution of the State so altered as to make an exception in the prohibition of State expenditures in favor of "wayon coals designed to be used for free publie travel.

If this change should be made it will allow State appropriations for this pur-pose, which will no doubt inaugurate a new system of road making in this State, that will, if wisely adjusted, soon lead to constructing good roads where-in the citizens are willing to join in elping to bear the expense.

New Jersey has tried the plan of aiding in the building of roads when petitioned by the property holders along and adjacent to the road to be built, these paying ten per cent, of the cost, and the State the larger part of the remainder, the county being taxed for a small portion. This legislation is in the right direction, and although it may not be fixed on any fast lines by a statute applicable everywhere, yet it may be so modified by other States as to suit circumstances so that farmers may always expect State and county asistance in their earnest efforts to make good roads.
It is said that the farmers in New

Jersey are enthusiastic in favor of ex-tending this system, which has been so successful in their own State.

In this connection it should be re membered that the cost of building roads has been greatly reduced from what it once was, and from what it would be to the farmera if they should undertake it alone. Machinery for digging, for scraping and for placing the dirt for the road bed in place has been invented which works like a charm, under the operation of steam or horse power. Besides stone crushers and methods of handling the crushed together works. crused stone have made all this work

Finally steam rollers have been constructed and successfully used, which will make the road solid and ready for se in a few days, leaving it as smooth as a race ground. All this machinery an be secured by the State or county at a comparatively small cost, and will When you enable them to build good reads at a call to sympteraction of what it would cost without particulars. their use. With State or county ownership, these indispensable helps

can be used anywhere.

The ball seems to be statting to roll in the right direction; let each one in favor of good roads help to push, and it will soon roll over the whole country and leave good roads everywhere in its track.

It will be worth many millions of gold and silver to us as a people to have good wagon roads everywhere over the country.

In some counties of Northern Alabama, and in North Carolina where good roads have been made, farmers now had ten bales of cotton with the same team and with less trouble than she has a sad face she always go they could haul two bales before the around trying to look sorrowful. roals were improved. Their voice is now for good roads, and so it will be everywhere where a change has been nate in the right direction.-Farm

Home Gardens.

In making home gardens in the wards of the city houses or in the grounds of the suburban houses the first thing to do is to prepare the earth where the seeds, bulbs and potted plants are to be planted.

running y round the yard against the All these beds should be filled to the depth of a foot with good earth.

are put in before the first of May they It is always a mistake to plow the lover seeded a year ago unless it is Sweet pear should be planted first, and they may be put in if the weather There is little plant food in a very warm in the latter part of watery growth. It lacks nu- April. Seasons vary in this climate,

first of May.

In yards surrounded by high walls and where the modern extension is built, where the sun gets little chance, the best plants for borders are bego-nias, fuchias and ferns. It is better to buy these plants potted, as they develop quicker. Remove them from the pots, dig a hole in the earth and set them in in the early evening. Do not pack the earth too tight round Water them well. plants do not blossom their foliage is decorative and luxuriant.

There is not tauch use in trying to

grow flowering sines on the walls of fences of city houses. For walls fences and racks, where there is suffiient light and air, the best hardy vines are climbing roses, honeysuckles and the different varieties of clematis and convolvulus. Plants to be grown from seeds which

re prolific in flower are the mignontte, portulacca, candy tuft and sweet lyssum. These are suitable for both ity and country gardens, and the eds should be put in early in May. Later in May, or the first of June, plant balsam seeds, then plant them phate bassum seeds, then phate them successively for two or three weeks; then you will have blossoms all the time. Verbenas, heliotrope, monthly roses, geraniums and pausies are all desirable flowering plants for home gardens, and it is best to put them in as small potted plants instead of seeds. May is the month for planting them. Select pausies with a view to making an artistic color display. Nothing is more beautiful in a garden than a bed

Salvia is a lovely garden plant, a lux-uriant grower and flowerer. It may be raised from seed or plants; the beat results are from small, sturdy plants. Set them out late in May. Set out verbens plants in the middle of May. the variety may be as large as possi

Bulbs of gladiolas and tuberoses may of planted in succession from the middle of May to the first of August. The first year you plant your garsults. The plants which grow the best should be renewed the following year. If a certain plant does not grow well in one part of your garden, try it in another next year. City gardens need more frequent watering than suburban ones, as the soil is not so deep. Add fresh composts when needed to keep out the weeds. Turn up the earth lightly round the roots often and the result will be stordy and countless blossoms .- Gilmore Clarke, Florist, in New York Journal.

WISE WORDS

Silence seldom makes a mistake. To have a ball habit is to have ! Some of our happiest moments are spent in air castles.

People make a great mistake in thinking any earth is good chough for grass. You want as rich soil as for plants. Have the loam well sodded and seeded and rolled. Keep the grass well watered. May, from the first to the last, is a good month to sod and seed the grass plot. The first week in April is the time-to get the carth ready. Phosphates and other carth rearly. Phosphates and other composts should be freely used. Roses require strong fertilizers. All the carth in flower gardens should be light and friable, so the water will filter walls of vessels. It is believed, how-After the earth is all fertifized, spaded, mellowed and raked it must lie exposed to the influence of the sun and air till it is thoroughly warm before the seeds are planted. If seeds

None to Waste. The author of "Campaigning iq South Africa and Egypt" gives a pertinent illustration of the virtue here is in necessity. He had been asked by a friendly Boer in Africa to go out shooting. Accordingly, he writes, he took a rifle and a bag of cartridges and set out for the appointed spot. When I met my friend, he

"What have you got in that bagour dinner?" "No," I answered, "cartridges." Whereupon he roared with laughter

"You Englishmen must be very rich," said he. "They cost sixpence apiece here."
"Where are yours?" I asked.

"In this." he answered, tapping his double-barrelled rifle. "You don't intend to shoot much?" "Two spring bucks are all I can

Suppose you miss?" "Nobody misses when a cartridge cost sixpence."

There was something instructive in the remark. It perhaps proved why the Boers had, in 1881, beaten the English, for the Boer, unwilling to waste his ammunition, will aim and take down his rifle adozen times, until he is satisfied that he is going to get something for his cartridge. On the occasion in question my friend got his two bucks, while I fired

When Tea Drinking Started. A pretty legend is told of the origin of tea drinking. The story runs that a daughter of a certain Eastern potentate was enamored of a young noble man, and one day her admirer, without the knowledge of her attendante, presented her with a few green

five cartridges and got one.

oranches.
One of these she treasured, and when she reached her apartments she placed the twig in a gobiet of water; there it remained some hours, the object of her tenderest care.

Toward evening she was seized with very sentimental attack, during which she drank the water in which the twig had been kept. It had a most agreeable taste, and then she ate the leaves and stalk. The flavor pleased her greatly, and every day, in memory of her admirer, she had bunches of the tes tree brought to her, and ate them r put them in water and drank the

The ladies of the court were moved to try it themselves, and did so with such pleasing results that the practice spread throughout the world.

to be my neighbor? Every person is car to you whom you can bless. He is the nearest to you whom you can

A SCIENTIST SAVED.

President Earnaby, of Hartsville Colleg Survives a Serious Illness Through the Ald of Dr. Williams' Pink

From the Republican, Columbus, Ind. The Hartsville College, situated at Harts ville, Indiana, was founded years ago in the interest of the United Brethren Church, when the State was mostly a wilderness and colleges were scarce. The college is well known throughout the country, former students having gone into all parts of the

PROF, ALVIN P. BARNABY. A reporter recently called at this famous eat of learning and was shown into the room of the President, Prof. Alvin P. Bar-naby. When last seen by the reporter Prof. Barnaby was in delicate health. To-day he was apparently in the best of health. In response to an inquiry the professor said:
"Oh, yes, I am much better than for some time. I am now in perfect health; but my recovery was brought about in rather a po-

culiar way."
"Tell me about it," said the reporter. "Well, to begin at the beginning," said the professor, "I studied too hard when at school, endeavoring to educate myself for the professions. After completing the common course I came here, and graduated from the theological course. I entered the ministry, and accepted the charge of a United Brethren Church at a small place in Kent County, Mich. Being of an ambitions nature, I applied myself diligently to my work and studies. In time I noticed that my health was falling. My trouble was in-digestion, and this with other troubles brought on nervousness.
"My physician prescribed for me for

some time, and advised me to take a change of climate. I did as he requested and was some improved. Soon after, I came here as professor in physics and chemistry, and later was financial agent of this college. The change agreed with me and for awhile my health was better, but my duties were heavy, and again I found my trouble returning. This time it was more severe, and in the winter I became completely prostrated. I tried various medicines and different physicians. Finally, was able to return to my duties. Last spring I was elected President of the col-lege. Again I had considerable work, and the trouble, which had not been entirely cured, began to affect me, and last fall collapsed. I had different doctors, but none did me any good. Professor Bowinan, who is professor of natural science, told me of his experience with Dr. Williams Pink Pills for Pale People and urged me to give them a trial, because they had benefited him in a similar case, and I concluded to try them.

"The first box helped me, and the second gave great relief, such as I never had experienced from the treatment of any physician. After using six boxes of the medicine I was entirely cured. To-day I am perfectly well. I feel better and stronger than for years. I certainly recommend this medicine."

To allay all doubt Professor Barnaby cheerically made an affidavit before Lyman J. Scudden, Notary Public. Dr. Williams Pink Pills for Pale People are sold by all dealers, or will be sent postpaid on receipt of price, 50 cents a box or six boxes for \$2.50 (they are never sold in bulk, or by the 100), by addressing Dr. Williams' Modleine Co., Schenectady, N. Y. the trouble, which had not been entirely

Pertinent Questions. Why Will a Woman Throw Away Her Good Looks and Comfort?

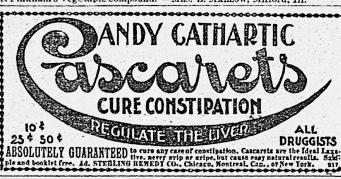

> Why will a woman drag out a sickly, half-hearted existence and miss three-quarters of the joy of living, when she has health almost within her grasp? If she does not value her good looks, does she not value her comfort? . Why, my sister, will you suf-fer that dull pain in the small of

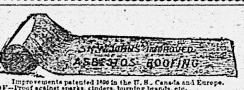

your back, those bearing-down, dragging sensations in the loins, that terrible fullness in the lower bowel, caused by constipation proceeding from the womb lying over and pressing on the rectum? Do you know that these are signs of displacement, and that you will never be well while that

fected is to strengthen the ligaments so

they will keep her organs in place. There is nothing better for this purpose than Lydia E. Pinkham's Vegetable Compound. The great volume of testimony which is constantly rolling in, proves that the Compound is constantly curing thousands of just such cases. The following letter from Mrs. Marlow is only one of many thousands which Mrs. Pinkham has received this year from those she has relieved—surely such

estimony is convincing: "My trouble commenced after the birth of my last child. I did not know what was the matter with me. My husband went to our family physician and described my symptoms, and he said I had displacement and falling of the womb. He sent me some medicine, but it did little good. I let it go on about two years, and every time I did any hard work my womb would come down. Finally a lady friend advised me to try Lydia E. Pinkham's Vegetable Compound, which I did. The first bottle helped me so much, I continued to take it right along. My back was almost the same as no back. I I am well of my womb trouble, and have a good, strong back, thanks to Mrs. Pinkham's Vegetable Compound."-Mrs. L. Marlow, Milford, Ill.
