The members bandied words over all manner of stale American polities, but few seemed to realize that they were engaged in the execution of a trust and that the questions involved were the security of the Filipinos in the possession of their public lands and the natural resources of their islands and the establish-. ment of a just form of civil government for ten million human beings in our wardship. Recent reports from Cuba tell of the cessation of work on the sugar estates where till now a hope has been entertained of a favorable reciprocity treaty with the United States. Stagnation of business, idleness and discontent are about to follow upon the brilliant hopes caused by our interference for the expulsion of Spain. The situation is a precarious one, and not without danger. If the Cuban government can feed the idle poor, it may get along well enough for a time, but the recent rebels against Spain may take to the woods again. with their rifles and machetes. Brigandage may take the place of the industry which our Congress discourages. Our reputation with the Cubans must suffer.
