THE PROPRIETORS

Mineral Water Warehouse

Are now engaged in the introduction of all the Medical Gaffes, which have been administered with the greatest success in England, by Drs Beddows, Thornton, Stranger, Dobson and Samuel Varley, professor of chemistry, and many others That the public may form forme idea of the efficacy of those Gasses, they substit the following extract of a letter from Mr. Variey to his daughter, Mrs. Hawkins; as well as feveral extracts from the manuscript of his lectures, delivered in Loudon.

Ceevening House, Jan. 19, 1509

My dear Jane, If you could make a connection with a medical person of character, who would deal honorably with you, I think you might introduce the Medical Airs with advantage to yourself and the public. The greatest cures that have of late been effected with them, is truly aftonishing, in almost every fpecies of inflamation; even inflamation of the brain, in a case where every other application was definited of Desfness of more than 20 years flanding; and in the most obstinate ulcers, when every medical application had failed; in putrid fevers and in mortifications. You well know many others, so that I need not mention them particularly, as well as the great cure you effected in Frith street (Soho) square, when saliration had been tried without effect.

Extrast from Lecture No. 10.

Gentlemen. I shall begin my narrative with the case of Mr. Newman-He was dangerously hurt in his leg by his stable boy; the wound increased rapidlyhis leg up to his knee was full of ulcers-there was un want of chirurgical affiffance, but all attempts towards his cure proved fruitles. He was advised to go to bath, where he bathed and drank the waters, from whence in three months lie returned rather worse, and so continued for three years. At last I was consulted, and had the happinels of earing him by the application of Me-

From page 560 Mr. Willim's malady was also very remarkable, which was the Leproly of 23 years flanding. He was full of fores and ulcers, in some parts were holes which gave out pus-his back was particularly offenfive. He heard of Dr. Thornton's recommending facticious airs, and for this reason he called for my affiffance. I administered to him a species of Medical Gals, with as equal success as in all preceding cales, and it deferres particular notice, that the cure was effected eradically, though the Gais was applied only to one leg and one thigh.

From page 33.

Another inflance to prove that Factitious Airs may be employed with falutare effect, I have etperienced in a lady labouring under an Ohthilis-She was given up as loft and incurable by the phy: firians. I administered to her the Hydrocarm : nate; the recovered, and is now perfettly well.

La. Aura de page 20.

Oxygene is of a great use in afilmatic complaints. A Mr Hill, one of the 'lle guarde at ht James's, had long lingered under this disease, gir en over by his phylicians, and intended to go to Nottingham, his native place, to die amongst his friends; he was told of oxygene gals, and applied to me-I had a small portion prepared for annther purpose, which I willingly gave him. He came the next morning, fest much relieved, and had a better appetite for breakfast. I administered to him another portion, and so on successively for some time; he was cured, and has been well for feveral years past

I also administered the oxygene gass with equal success to Sir H Fletcher, Sir Richard Neave, Dr Lynd, lady Stanhope, &c &c. &c. who were all cured (by inhaling this gals) of this or other com-

Many other fleiking inflances might be referred to, in scalded heads, mortifications, debility and pulmonic affections; but the foregoing are deemed sufficient to prove the utility of the galles, which can be taken with the greatest lifety and eale, without any disagreeable lensations. Those who wish to be further latisfied, can see the manuscript from which these extracts were taken.

It is not the intention of the subscribers to administer these gasses indiscriminately; and that they may not be accused of using them empyrically, they will refer in all cases to Dr. Potter, and other eminent Physicians, who are well acquainted with the theory of Drs Hay, of Leeds, Dobson, of Liverpool, Beddows, Stranger and Thornton, of London, who have all administered them with the greatest success, in Europe

Those Gasses will be prepared and administered by the subscribers at No. 11, South Calvert street, in private recens appropriated for that purpose.

TO THE PUBLIC.

There is perhaps no medical observation better established, none more generally confirmed by the experience of the best physicians, of all age and countries, and none of more importance; to the practitioner, than the fact, that many of the most difficult and incurable complaints originate in neglected calle. In a climate as variable as ours, where the changes of weather are frequently sudden and unexpected, it requires more care and attention to guard against this subtle and dangerous enemy of life, than most people imagine, or are able and willing to bestow. Hence the number of patients afflicted with coughs, catarrhs, asthmas, consumptions, and other affections, and hence the farrago of rational and absurd remedies, eried up by the feamed and illiterate. The many cases of the kind which fell under my observation, the preposterous compositions of inflaming drugs, which are in vogue, the disappointments I experienced in practice from remedies highly recommended, and my own predisposition to pulmonic camplaints, were strong inducements for me to consider, whether a compound consisting of mild regetable substances, could not be invented, more free from the wellfounded objections of practitioners, and better calculated to avert the threatening destruction of

I have the satisfaction now to offer to the publie such a remedy, under the name of the VEGE-TABLE PULMONIC DETERGENT, well ada; ted to various constitutions and habits, and to declare with the fullest co..ndence that I found this compositon in a great variety of cases far superior to others intended to answer the same purpose. Aware of the impossibility of universal remedies, destitute of the despicable and versatile talents of a Chailman, I am too proud of the character of an honest man, ever to desire to profit by the ignorance of the fick and afflicted, whilst I confine the use of my medicine to the effects of a suppressed perspiration in their incipent state noly, I flatter myself with the hope, that this candid appeal to the understanding of an enlightened publie will ensure to my discovery a better fate and longer life, than the greater part of their boasted panaceas deserve. I am perfectly satisfied, that such practitioners, who have frequently to combat the effects of a suppressed respiration, and do not neglect the use of the lancet and other evacuations, whenever they are indicated, will place this medicine, provided they give it a fair and impartial trial, in the list of their most faror ite remedies; that samilies will substitute it fir the heating Elixir, paregone and asthmatic, fir their cough drops, pectoral Baisams and Syrups; and that the manifest benefit derived by such, who use it according to my directions, will prove a far better test of its value and usefu'ness, than ever so many certificates I could palm upon a discerning public.

GEORGE ROGERS.

No Relief-No Pay.

This motto may be deemed oftentatious by some, and amounting to a positiveness that the medicine will invaribly effect a cure in any state of disease, like a miracle; the proprietor is far from believing that this medicine will render mankind immortal, but he is fully sensible it taken seasonably, and according to the directions, it will either prevent or cure, and if unleafonably, it will most sensibly allerrate distress and prolon; life, this is an inducement for him to make the above overture should the contrary appear in any instance, as in some it possibly may, the money for the medicina will be cheerfully refunded by the person who may read the same.

N. B. The above named medicine is secured to the subscriber by letters patent from the President of the United States, and prepared at his dispensity in Northampton, county of Hampshire, and flate of Massachusetts.

MINERAL WATERS.

W E are hippy to present to the public the from some of the most eminent physicians of Bal-Emore, which muft sufficiently establish the utility and medical vinues of the Artificial Mineral Watter, as prepared by us, and which places us beyond the reach of envy or calumny.

HANNA and HAWKINS.

BALTIMURE, Jaly 19, 1809. Me fis. Hagna and Howkins,

HAVING had frequent occasion w prescribe the factitious waters manufacturert at your laboratory, I take great pleasure in tellifying to their virtues. I can affert, with truth, that my expectations have: not been disappointed in a fingle instance, and I have no doubt, but (when judiciously administered) they will become a valuable acquisition to our city. I cannot but anticipate sufficient liberality and discentment in the citizens of Baltimore to remunerate you for your tabour and expenfe, and beg of you to accept of the affurance of my dispusition to promote the interest of ra useful an establishment.

NATHL. POTTER

Mefis. Hanna and Hawkins. THE establishment of your salitions mineral water warehouse, cannot sail to be highly benencial to fuch citizens of Baltimore as labour under debility of the flumach or bowels, with the various concomitant complaints of such affections. Long since the celebrated Bergman shewed, that every natural mineral water could be Juccessfully. initated by every intelligent chymitt, if accurate analysis liad discovered its component parts.

Baltimore 2td Jaly, 1809.

BALTIMORE, July 21, 1309.

Meffer. Harra and Hanking, I AM of opinion, that the artificial mineral waters prepared under your direction, will be found highly beneficial to the citizens of Baltimore, and very little inferior in medicinal virture to the natural mineral waters of our country. They are prescribed, therefore, by me, in all cases where mineral waters have proved falutary.

Your obedient fervant. Signed ASHION ALEXANDER.

Meffer Harra and Hawkins,

Il gives me very sincere pleasure to find an establishment such as yours, so likely to become permanent in Baltimore; as it affords to invalids. whose cases require the use of mineral waters, an opportunity of receiving all the advantages they produce, without the necessity of taking a long journey to obtain them at their fouce. From the manner in which they are prepared, I do not consider them inserior to thate produced from the Springs, and shall think it my duty to recommend them to all those whose coles require

fuch somedies. With every with for your fuccess, I remain, Gentlemen, your obed't ferv's,

A. HAMILTON,

McTis Hinna and Hawkins HAVING examined the artificial water as prepared by you, I am of opinion they are a very good imitation of the natural waters of those Springs, and can recommend them as not only falutary but highly beneficial in all those diseases where the natural waters have been found useful.
