THE PROPRIETORS

OF THE

## Mineral Water Warehouse

Are now engaged in the introduction of all the Medical Gases, which have been administered with the greatest success in England, by Drs. Beddows, Thomson, Stranger, Dobson and Samuel Varley, professor of chemistry, and many others. That the public may form some idea of the efficacy of these Gases, they submit the following extract of a letter from Mr. Varley to his daughter, Mrs. Hawkins; as well as several extracts from the manuscript of his lectures, delivered in London.

Crossing House, Jan. 19, 1809

My dear Jane,

If you could make a connection with a medical person of character, who would deal honorably with you, I think you might introduce the Medical Airs with advantage to yourself and the public. The greatest cures that have of late been effected with them, is truly astonishing, in almost every species of inflammation; even inflammation of the brain, in a case where every other application was despaired of. Deaths of more than 20 years standing; and in the most obstinate ulcers, when every medical application had failed, in putrid fevers and in mortifications. You will know many others, so that I need not mention them particularly, as well as the great cure you effected in Fouth-street (Soho) square, when salivation had been tried without effect.

Extract from Lecture No. 10.

Gentlemen,

I shall begin my narrative with the case of Mr. Newman—He was dangerously hurt in his leg by his stable boy; the wound increased rapidly; his leg up to his knee was full of ulcers—there was no want of surgical assistance, but all attempts towards his cure proved fruitless. He was advised to go to bath, where he bathed and drank the waters from whence in three months he returned rather worse, and he continued for three years. At last I was consulted, and had the happiness of curing him by the application of Medical Gases.

From page 56.

Mr. Wilson's malady was also very remarkable, which was the Leprosy of 23 years standing. He was full of sores and ulcers, in some parts were holes which gave out pus—his back was particularly offensive. He heard of Dr. Thomson's recommending facitious airs, and for this reason he called for my assistance. I administered to him a species of Medical Gases, with as equal success as in all preceding cases, and it deserves particular notice, that the cure was effected gradually, though the Gases was applied only to one leg and one thigh.

From page 53.

Another instance to prove that Facitious Airs may be employed with safety effect, I have experienced in a lady labouring under an Oedema. She was almost up to her neck in the abdominal fluid. I administered to her the Hydrocarbonate; she recovered, and is now perfectly well.

Letter 4, page 20

Oxygen is of a great use in asthmatic complaints. A Mr. Hill, one of the life guards at St. James's, had long lingered under this disease, given over by his physicians, and intended to go to Nottingham, his native place, to die amongst his friends; he was told of oxygen gas, and applied to me—I had a small portion prepared for another purpose, which I willingly gave him. He came the next morning, felt much relieved, and had a better appetite for breakfast. I administered to him another portion, and he on successively for some time; he was cured, and has been well for several years past.

I also administered the oxygen gas with equal success to Sir H. Fletcher, Sir Richard Neave, Dr. Lynd, Lady Stanhope, &c. &c. who were all cured (by inhaling this gas) of this or other complaints.

Many other striking instances might be referred to, in scalded heads, mortifications, diphtheria and ulcemic affections; but the foregoing are deemed sufficient to prove the utility of the gases, which can be taken with the greatest safety and ease, without any disagreeable sensations. Those who wish to be further satisfied, can see the manuscript from which these extracts were taken.

It is not the intention of the subscribers to administer these gases indiscriminately; and that they may not be accused of using them empirically, they will refer in all cases to Dr. Potter, and other eminent Physicians, who are well acquainted with the theory of Drs. Hay, of Leeds, Dufon, of Liverpool, Beddow, Stranger and Thomson, of London, who have all administered them with the greatest success, in Europe.

These Gases will be prepared and administered by the subscribers at No. 11, South Calvert street, in private rooms appropriated for that purpose.

## THE TORIAD;

A SATIRE—POETICAL AND POLITICAL.

WITH NOTES—IN FOUR CANTOS.

By PASCHAL FANTOMME, ESQUIRE.

With the following motto—

"I leave you here a little book,

For you to look upon;

That you may see old Tories tricks

When they are dead and gone."

The poem is introduced with a sweet line, from an ingenious song, always grateful to Tory ears—'Tis first verse:

"Rule Britannia, rule the wave,"

Is sung by every arrant knave;

Yet knows the British arms are hurt'd

To crush the freedom of the world."

It will be published in a neat duodecimo volume of about 150 pages, at 62½ cents in boards, 75 cents bound.

A subscription paper has been forwarded to this office.

## Roger's Patent Vegetable Pulmonic Detergent,

For sale at P. BYRNE'S Law and Miscellaneous Book-store, No. 130, Market-street—either by the dozen or single cake.

P. BYRNE does not undertake to expatiate on the merits of this justly celebrated medicine; its best praise will be found in its effects—and the reliance of the inventor on its merits in all pulmonary complaints, will be seen in the following advertisement.

## No Relief—No Pay. TO THE PUBLIC.

There is perhaps no medical observation better established, none more generally confirmed by the experience of the best physicians, of all ages and countries, and none of more importance to the practitioner, than the fact; that many of the most difficult and incurable complaints originate in neglected colds. In a climate as variable as ours, where the changes of weather are frequently sudden and unexpected, it requires more care and attention to guard against this subtle and dangerous enemy of life, than most people imagine, or are able and willing to bestow. Hence the number of patients afflicted with coughs, catarrhs, asthmas, consumptions, and other affections, and hence the prodigious quantity of absurd remedies, tried up by the learned and illiterate. The most cases of the kind which fall under my observation, the pro-osterosus compositions of officinal drugs, which are in vogue, the disappointments I experienced in practice from remedies highly recommended, and my own positive opinion, in pulmonary complaints, were strong inducements for me to consider, whether a compound consisting of mild vegetable substances, could not be invented, more free from the well founded objections of practitioners, and better calculated to avert the threatening destruction of the lungs.

I have the satisfaction now to offer to the public such a remedy, under the name of the VEGETABLE PULMONIC DETERGENT, well adapted to various constitutions and habits, and to declare with the fullest confidence that I found this composition in a great variety of cases far superior to others intended to answer the same purpose. Aware of the immense benefit of universal remedies, destitute of the despicable and venal talents of a Quack, I am too proud of the character of an honest man, ever to desire to profit by the ignorance of the weak and afflicted, whilst I confine the use of my medicine to the effect of a suppressed perspiration, in their incipient state of the disease, and that this candid appeal to the understanding of an enlightened public will ensure to my discovery a better fate and longer life, than the greater part of their boasted panaceas deserve. I am perfectly satisfied, that such practitioners, who have frequently to combat the effects of a suppressed respiration, and do not neglect the use of the above mentioned medicine, when they are indicated, will place this medicine, provided they give it a fair and impartial trial, in the list of their most favorite remedies; that families will substitute it for their heating Elixirs, pectorals and asthmatic, for their cough drops, pectoral Balsams and Symples; and that the manifest benefit derived by such, who use it according to my directions, will prove a far better test of its value and usefulness, than ever so many certificates I could pain upon a discerning public.

GEORGE ROGERS.

## No Relief—No Pay.

This motto may be deemed ostentatious by some, and amounting to a positiveness that the medicine will invariably effect a cure in any state of disease, like a miracle; the proprietor is far from believing that this medicine will render mankind immortal, but he is fully sensible if taken seasonably, and according to the directions, it will either prevent or cure, and if unseasonably, it will most sensibly alleviate distress and prolong life; this is an inducement for him to make the above overture. Should the contrary appear in any instance, as in some it possibly may, the money for the medicine will be cheerfully refunded by the person who may send the same.

G R

N. B. The above named medicine is secured to the subscriber by letters patent from the President of the United States, and prepared at his dispensary in Northampton, county of Hampshire, and State of Massachusetts.

\* \* \* The above terms will be complied with by the subscriber, in the sale of the above Medicine.

## MINERAL WATERS.

WE are happy to present to the public the following respectable and satisfactory testimony from some of the most eminent physicians of Baltimore, which must sufficiently establish the utility and medical virtues of the Artificial Mineral Waters, as prepared by us, and which places us beyond the reach of envy or calumny.

HANNA and HAWKINS.

No 1.

BALTIMORE, July 19, 1809.

Messrs. Hanna and Hawkins,  
HAVING had frequent occasion to prescribe the facitious waters manufactured at your laboratory, I take great pleasure in testifying their virtues. I can assert, with truth, that my expectations have not been disappointed in a single instance, and I have no doubt, but (when judiciously administered) they will become a valuable acquisition to our city. I cannot but anticipate a sufficient liberality and discernment in the citizens of Baltimore to remunerate you for your labour and expense, and beg of you to accept of the assurance of my disposition to promote the interest of so useful an establishment.

Signed NATHL. POTTER.

No 2.

Messrs. Hanna and Hawkins,  
THE establishment of your facitious mineral water warehouse, cannot fail to be highly beneficial to such citizens of Baltimore as labour under debility of the stomach or bowels, with the various concomitant complaints of such affections. Long since the celebrated Bergman (I shew, that every natural mineral water could be successfully imitated by every intelligent chymist, if accurate analysis had discovered its component parts.

I am, Gentlemen, your obed't serv't.

Signed JOHN CAMPBELL WHITE, M. D.

Baltimore 22d July, 1809.

No 3.

BALTIMORE, July 21, 1809.

Messrs. Hanna and Hawkins,  
I AM of opinion, that the artificial mineral waters prepared under your direction, will be found highly beneficial to the citizens of Baltimore, and very little inferior in medicinal virtues to the natural mineral waters of our country. They are prescribed, therefore, by me, in all cases where mineral waters have proved salutary.

Your obedient servant,

Signed ASHTON ALEXANDER.

No 4.

Messrs. Hanna and Hawkins,  
IT gives me very sincere pleasure to find an establishment such as yours, so likely to become permanent in Baltimore; as it affords to invalids, whose cases require the use of mineral waters, an opportunity of receiving all the advantages they produce, without the necessity of taking a long journey to obtain them at their source. I do not consider them inferior to those produced from the Springs, and shall think it my duty to recommend them to all those whose cases require such remedies.

With every wish for your success, I remain, Gentlemen, your obed't serv't.

Signed A. HAMILTON,

N. Gay-street.

No 5.

Messrs. Hanna and Hawkins  
HAVING examined the artificial water as prepared by you, I am of opinion they are a very good imitation of the natural waters of those Springs, and can recommend them as not only salutary but highly beneficial in all those diseases where the natural waters have been found useful.

Signed JAMES SMITH.

July 26th, 1809.

No 6.

Messrs. Hanna and Hawkins,  
YOUR preparations of mineral waters I consider near imitations of their originals, they will therefore, no doubt, be often referred to by the Faculty, and add very much to the comfort and convenience of the public.

Signed JNO. OWEN.

August 2.

The above WATERS are sold, by appointment, by JOHN WELLS, Druggist, Church-street, Annapolis, in bottles, containing a quart each.
