

of them the promoters of which must deservedly feel  
the heavy censures of his Majesty for that the Officers  
must be accountable for all the mischief

That it is now a thing in America that the  
Boundaries of two Provinces should by so many years  
undetermined those of New York and New Jersey being  
so to this day yet this Board never heard that Hostilities  
or what amounts to the same were committed in such Cases  
or that Officers were employed to raise Levies by Force on  
the Settlements of each other

Upon these Considerations it is the advice of  
this Board that the Governor would be pleased to state  
these matters fully to the Governor of Maryland whose  
good and lawful ruling and humanity can never approve  
of such unprovoked, not to say Hostile Proceedings, that  
the Governor would also be pleased to give himself the  
trouble to meet that Gentleman and in the most friendly  
manner labour to discuss all former Complaints with  
the Occasion of them, and to stipulate such measures  
as may prevent them for the future until the Bound-  
aries are settled that in the mean time effectually to  
end these differences applications be made to the Pro-  
prietor at home to press a final Adjustment of the Bound-  
aries that in case the Province of Maryland hitherto  
our Good Neighbour should now so far change their  
measures as no longer to preserve peace with us, the Gov.  
would then be pleased to represent the matter effectually  
to the King and his Ministry and in the mean time  
by all Legal Methods to support the peaceable People
