

Attorney General in conducting and presenting the suit directed to the Legislature
for procuring a final legal adjustment and settlement of said boundaries.

A copy of our communication to His Excellency Governor Lozano,
and of his reply acknowledging the receipt of the Report and Resolutions, and
being the only correspondence since your last session, upon this interesting
and delicate subject, are herewith submitted, which, it will be seen, are,
on both parts, couched in the terms of courtesy and respect which ought to
be observed between sister States.

Under the Resolution directing us to contract for the building
of a Gun House, and to have the outbuildings within, and Wall around, the
circle repaired, we advertised for proposals for said work, and
several drawings, plans and proposals having been submitted, it
appeared to us, however, that the interests of the State would be promoted by
the erection of a Gun House upon a plan and dimensions which required
a larger sum of money than had been appropriated for that purpose, that
we could not doubt that you would approve of the small additional
expenditure which it required, and Mr. Elijah Wells, who had proposed
to contract for building, according to the drawing which we approved, for
\$750 having expressed a willingness to proceed with the work, by our
paying him the sum appropriated and to look to you for the additional
amount of \$200, we closed a contract with him for its erection, which
is now completed, and the Gun and other public property intended to
be kept therein have been removed to it. The erection of this building
will save the State the annual expenditure of \$95 - the amount long
paid for rent of a Gun House and Magazine, besides being a much more
suitable and secure place of keeping the public property there deposited.
The outbuildings within the circle have been repaired, but we declined
accepting any of the proposals received for repair or covering the Wall
around: the sum appropriated for the purpose being wholly inadequate
to repair and cover in a suitable and substantial manner.

The full length painting of the likeness of the late honorable
Henry Gerrard, of Kentucky, by Mr. Kelly which had been contracted
for in the summer of 1833, has been received and placed in the State Chamber.

At a meeting of the Board of Revision, a Resolution was passed authorizing
the Governor to procure on behalf of the State, from Osborn & Raper
of New York a notice of the State, one of the most distinguished Offices of the
State of New York - formerly Chief Magistrate of the State, and at
all times one of the most honorable and important dignities. An
attention having been called to this Resolution by the letter of William
C. Stewart Esquire, a former member of the Executive Council, who
submitted, and which satisfactorily accounts for the delay in carrying it
into effect, we engaged Mr. Kelly to produce a portrait, which has been
received and placed in the hands of the Delegates as required by said Resolution.

We have the honor to beg of you a Report with several accom-
panying statements of the accounts of the various departments during the
annual period of its operations, its progress and present state
