

the debt due to the Bank of Baltimore was paid. The Infirmary will then have cost the state more than it is worth, for it is charged with an annual ground rent of \$200, and a large sum exceeding 1320 dollars has been expended on the institution by the Trustees; besides \$1890 of old debts, including therein \$569 for signing lottery tickets, which have been paid by the Trustees.

They would prefer abandoning the whole structure, with all its permanent improvements, and undertake to build another, to the payment even of the debt to the Bank. The General Assembly are earnestly exhorted not to charge the small funds of the University with further payments on account of the Professors having title to the Infirmary; or, at present, on account of the Faculty of Physic.

The Trustees cannot take leave of the subject of the Infirmary without expressing their satisfaction at the excellent management of this institution, under a committee of their Board, of which Solomon Etting, Esq. has been always Chairman, aided by the benevolent Sisters of Charity.

The Trustees request that an amendment to the act constituting their Board may be passed, the effect of which will be to secure more certainty and efficiency to their meetings. A sketch of the proposed amendment accompanies this report.

The Treasurer's annual statement of the funds is herewith exhibited.

All which is respectfully submitted.

By order of the Board of Trustees,  
NATH. WILLIAMS,  
Vice-President.

Baltimore, 1st Jan. 1831.
