

RECAPITULATION OF ESTIMATES.

The Canal Route (21.706 miles) as per Summary A.	9,309,127 17
For all the feeders connected with the above route and exclusive of all requisite, beyond the extents of route surveyed as per Summary B. (19.07 miles)	757,628 30
For all the Dams of Reservoirs whence these feeders are supplied as per Summary C.	1,602,617 38
Total,	\$11,669,372 85

The land occupied by the above extent of Canal (21 miles, 1242 yds) Route will be about 325 acres. The land occupied by the feeders will amount to about 108 acres. The land occupied by the Reservoirs, allowing 10 feet beyond the high water, will amount to 1753 acres—making a total of 2186 acres.

A great number of mill sites will be destroyed which we have no means of estimating.

The soiling of the slopes and the fencing are likewise omitted.
