

5. Long Neck Marsh, and cutting: excavation of 36 526.66 cubic yards, at 10 cent yard - - - \$ 3.652 66

At this place, as before stated, the Commissioners would propose experimenting on the efficacy of the current, as an agent for making the cut,

The Estimate should then be only \$ 547 90

4. Miller's Creek Route.

Excavation of 580,302 cubic yards, at 10 cents per yard - - - 58.030 20
 Rail-road, 4 5 - - - 5.555 55
 Removal of Rail-road, 3 times, - 1.350 00
 Cleaning of White's Creek and Assa- woman - - - - 1.137 00
 Dam and Weir across Miller's Creek, 1.500 00

\$67.572 75

5. Romney Marsh: § 3. - - - \$ 547 90

6. Berlin Route.

Excavation of 368 874.50 cubic yards 36.887 45
 Rail-road, 6 miles, - - - 7.250 00
 Removal of rails twice - - - 1.200 00
 Cleaning out Herring and Trap Creeks 2.000 00

\$47.337 45

7. White Rock, Mill's Island Thoroughfare, and Cat Creek.

In promising an Estimate for these Improvements, the Commissioners had expected to have made use of information on the subject, recent and practical. Not having had access to it, however, they would prefer omitting it for the present.

8. Cut across Cape Charles.

A Canal here of 60 feet would be desirable. The allowance then should be,

Excavation of 220,000 yards, at 10 cents per yard - - - \$ 22000 00
