By the upper house of Assembly Aug 25 1716

May it please yr Hon^{ty} In reading your message of this day by the
Hon^{ble} Sr Holland and three others of the upper house we agree that the
sending into this Province instructions and should administer as Government
in case of his Grays death or absence has been a great impeding way
prove of every well consequence unless provided agt. for prevention whereby
we agree to make a provision for the same by a Law and cannot think
of a better method than what has been asked when the Government was in
the Crown but that is suitably submitted to his Grays and your hon^{ty}.

the following endorsement was devised to be made (Birt)

By the Lower house of Assembly 2 of Aug 1716.

May it please yr Hon^{ty}:

Your endorsement on

this bill has been Considered and we are of opinion that particular
Orders for keeping the records belonging to the several officers specified
in this Bill are already fitted up and signed and therefore think that
there is no occasion of any further provision in that particular and as
to a Clause to be added concerning any person but the several Courts
to make searches, we think that the Law proposed obliging the officers
to make the records good will prevent any Inconvenience that may arise
cannot think that making said new Warrants to any other Courts
