

We shall always endeavor to be grateful to our Benefactors and
Benefit our Neighbours ~~with~~ ^{with} the present Judgments they enjoy; and we will that they speed not the
Rains of that Law which they once enjoyed as a favour and which
they better understand the Force of Establishment than to endeavor
only farther strengthening of it —

Your Majesty's frequent recommending to us the propagating
Learning is a further instance how much your Majesty has affected
generally with you of your Country: we want whereof is so evident a
proof as our respect how far below your Majesty has been in promoting
Learning for us and how wanting we have been to our selves in that part
we can scarce expect to reap the Benefit of: there we depend on: But
we must beg leave to thank his our Majesty in the great Encouragement
we have already met with in having Masters that are raised in this
Province Appointed to the Planting school in a Village of which we are
Inhabitants of this has cleared the Seat of our Advantage: this our
Application we are persuaded had never been used had not our
our Neighbours in Virginia made some representation concerning
it: We could be so happy by your Excellency's Providence to leave this
Country State and proper Application made for us: we are
should not doubt except from the Justice of our Cause and then we
should with great thankfulness report our Success in this endeavoring to
such an Establishment as might give our Present Youth and
Posterity an Opportunity of Learning: —

In the interim We shall be glad of Undertaking all
Opportunities to support the Point which we must be too
to the Publick and should be glad to receive such testimony as the
Factor and others shall think fits to make for our Justice in
consideration of that so important an affair —

We shall immediately proceed to do what may be done in
respect to the regulation of our Affairs — We again know
ledge their strict good government particularly in the Regard they have
had to the preservation of our Constitution and the continuing your
Rely their justice and of further loyalty Society Honors and Justice we
had had no Similiar Experience that we can think this the best of
of their strict observance especially since by the Influence of your Majesty
Administration and Plantations are managed with all freedom to
Dance our selves as we can do as strictly as we shall to his Majesty
Due to their strict and just to our Justice —
(which)
