

May I please I answer to your message of this Day by say that as to me
your Honours Carrells insisting on the patent is doing forth in the Act
their Mentioned petition Opinion that the same is highly ~~con-~~
gratory to the Office of Keeper of the great Seal; and likewise
that his refusing and Delaying to give the patents where the
people had taken the paper 1722 thro' towards the obtaining
them unless he was to depend the one half of the fees of the Seal
is a manifest prejudice as well to my Lord in the Discomproving
the Validity of his Patents as to the people in hindring them
from making their proper Improvements; and Observe that if
Carroll has seen the Law where he has not made out of patent
the people may take their Remedy by writ in Comon Law —
signed by order of the Right Honourable
Absent to the upper House by the Honourable J. J. Cap. & Saunders
They returned saying they decided it —
