Your Conferrees have calculated the growing Interest on the Sum proposed to be Emitted for Fifteen Years; and find, that the same, exclusive of incident Charges, will amount to about 34,278 l. (as will appear by the Calculation thereunto annex'd;) which will be so much clear Gain to the Country, upon a Supposition that the Credit of the Currency be well supported, and that it be taken out of the Office soon. And as the Support of the Credit of this Currency will be of very great Consequence to this Province, the Publick Faith thereof, ought to be engaged to support it. And if now, or at any Time hereafter, a sinking Fund of Eight Hundred or a Thousand Pounds per Annum could be established upon a good Foundation, it would be of very great Service. All which is submitted to the Consideration of both Houses.
