DR. SCHENCK advises Consumptives

to Go to Florida in Winter.

nightsweats, and then advises the patient to walk or risk out every day, will be sure to have a corpee on his hands sefore long.

My plan is to give my three medicines, in accordance with the printed directions, except in some cases where a freer use of the Mandrake Pills is necessary. My object is to give tone to the atomach—to get up a good appetite. It is always a good sign when a patient begins to grow hungry. I have hopes of such. With a relish for food and the gratification of that relish for food and the gratification of that relish comes good blood, and withit more food, which is closely followed by a healing of the lungs. Then the cough loosens and abates, the creeping chills and clampy night-weats no longer prostrate and amony, and the patient gets well, provided he avoids taking cold.

Now there are many consumptives who have not the means to go to Fforida. The question may be asked, Is there no hope for such? Certainly there is. My advice to such is, and ever his been, to stay in a warm room during the winter, with a temp-rature of about seventy degrees, which should be kept regularly at that point, by means of a thermometer. Let such a patient take his exercise within the limits of the room by walking up and down as much as his strength will permit, in order to keep up a healthy circulation of the blood. I have cursed thousands by this system, and can do so again. Consumption is as easily curst as any other disease if it is taken in time, and the proper kind of treatment is pursued. The fect stanls undisputed on record that Schenck's Pulmonie Syrny Mandrake Pills and Saweel Tonic have cured very many of what seemed to be hopeless cases of consumption of where you will, you will be almost certain form the very jaws of death by their use.

I have abandoned my professional visits to Boston and New York, but continue to see patients at my office, No. 15 N. SIXTII Street, Philadelphia, every Saturday, from 9.4 M. to 10 P. M. Those who wish a thorough examination with the Respirometer will be charged five dollars. The Respirometer declares the exact condition of the lungs, and patients can readily learn whether they are curable or not. But I desire it distinctly understood that the value of my melicine depends entirely upon their being taken strictly according to directions.

In conclusion, I will say that when persons take my melicines and their systems are brought into a healthy condition thereby, they are not so liable to take cold, yet no one with diseased lungs can bear a sudden change of atmosphere without the liability of greater or less irritation of the brunchial tubes.

Full directions in all languages accompany my medicines, so explicit and clear that any one can use them without consulting me, and can be length from any druggist.
