CLAYSTILL, Wash, Co., Fa., Sept. 29, 1870.

Dr. J. Ball & Co.—Gentlemen: I have now theroughly ested the Patent Eye Cupe; they are the "Ne Plus Ultra' of all treatments of impaired vision from advanced to all treatments of impaired vision from advanced to tested the l'atent Eyo Cuper they are the "Ne Plan Ultra" of all freatments of impaired vision from advanced life or other causes, and an invariable cure for Myopla or Near Sight.

I have in the last few days entirely cured several cases both of Acute and what is called Chronic Inflammation. These had tried every known and available species of freatment without the slightest benefit, but on the contrary detrimental and great expense.

My mother, an old lady of 64 years, is an enthusiastle advocate of the Cupe. Three months since she could not read sletter or letters as large as her thumb, as she sometimes expresses herself. Certain it is that her eyes were unusually old and worn beyond her years to such an extent that she could not read the heading of the "New York Triblane," without her glasses, You may judge, therefore, the effect of the Cupe when I inform you that she can now read every portion of the "Tribane," even the small Planuch-type, without her glasses. She now halfurally reads her Testament, erdinary print, without her glasses. You cannot insagine her pleasure. Yours very truly, HORACE B. DURANT, M.D.

BENNETT.—In Elkton, on Tuesday, 22d inst., HENNY P. BENNETT, in the 56th vol. of the proper proper in the price of the son. Islange and Philadelphia every proper in the proper of the proper of the proper in the prop

named, will bettern those who are troubled with a torpid liver, a disordered stomach deranged lowels, over throat or cough, but for those whose lungs are diseased a more southern point is earnestly recommended.

For fifteen years prior to 1998, I was professionally in New York, Boston, Italiumer and Philadelphia every week, where I saw and examined on an average five hundred patients a week. A practice so extensive, embracing every possible phase of lung disease, has enabled me to understand the disease fully, and hence, my caution in regard to taking cold. A person may take large quantities of "Schenck's Pulmonic Syrup, Seaweed Tonic and Mandrake Pills," and yet die if he does not avoid taking cold.

In Florida, nearly everybody is using Schenck's Mandrake Pills, for the climate is more likely to produce billious habits than more northern latitudes. It is a well established fact that natives of Florida rarely die of consumption, especially those of the southern part, to the other hand, in New England, one-third, at least, of the population die of this terrible disease. In the Middle States it does not prevail so largely, still there are many thousands of cases there. What a wast percentage of life would be aveid if consumptives were as cally alarmed in regard to taking fresh cold as they are alout scarle fever, small pox, &c. But they are not—They take what they term a little cold, which they are residuous enough to believe will ware off in a few days. They pay no attention to it, and hence it lays the foundation for another and another still, until the lungs are diseased beyond all hope for cure.

My advice to persons whose lungs are affected even slightly is, to Isy in a stock of Schenck's Palmonic Syrup, Schenck & Daviese of Inc. In the complished, nature will do the work that is required. This accomplished, nature will do the work that is required. This accomplished, nature will do the work that is required. This accomplished, nature will do the work that is required. The secure of man acceptance in the la

rest. The physician who prescribes for cold, cough or nightsweats, and then advises the patient to walk or ride out every day, will be sure to have a corpse on his hands before long.

My plan is to give my three medicines, in accordance with the printed directions, except in some cases where a freer use of the Mandrake Fills is necessary. My object is to give tone to the atomach—to get up a good appetite. It is always a good sign when a patient begins to grow hungry. I have hopes of such. With a Friish for food and the gratification of that relish comes good shood, and withit more feath, which is closely followed by a healing of the lungs. Then the cough lossens and slates, the creeping calls and clammy night-sweats no longer prostrate and annoy, and the patient gratification provided he avoids taking cold.

Now there are many consumptires who have not the means to go to Florital. The question may be asked, Is there no hope for such! Certainly there is. My advice to such is, and ever has been, to stay in a warm room during the winter, with a temperature of alout seventy degrees, which should be kept regularly at that point, by means of a thermometer. Let such a patient take his exercise within the limits of the room by walking up and down as much as his strength will permit, in order to keep up a healthy circulation of the blood. It have cured thousands by this system, and can do so again. Consumption. The fact stands undisputed on record that Schenck's Palmonie Syrup, Mandrake Pills and Seaweed Tonic have cured very many of what seemed to be hopeless cases of consumption. Wo where you will, you will be almost certain to find some poor consumptility who has been rescued from the very jawe of death by their use.
