all the week, get your washing nicely done by 10 o'clock Monday morning and have the clothes ironed and put away before night. Now if you don't know how to do this, just inquire at Moore & Bro., who manufacture that famous "Wilmington City Soap." Ask your grocer for it.

Important step is for the patient to avoid taking cold, and the least of all places on this continent for this purpose in winter, is Florida, well down in the State, where the temperature is regular, and not subject to such variations as in more Northern latitudes. Platks is a point can recommend. A good hotel is kept there by Peterman. Last winter I saw several persons there whose manufacture that famous "Wilmington City Soap." Ask your grocer for it.

One hundred miles further down the river is a point

be hopeless cases of consumption. Go where you will, you will be almost certain to find some poor consumptive who has been rescued from the very jaws of death by their use.

So far as the Mandrake Pills are concerned, everylesly should keep a supply of them on hand. They act on the liver better than caloniel, and leave none of its hurring effects behind. In fact they are excellent in all clases where a purgative medicine is required. If you have partaken bos freely of fruit and diarrhose ansures, a does of the Mandrake will cure you. If you are subject to ick heashed, take a does of the Mandrakes and they will cure you in two hours. If you would obviate the effect of a change of water, or the too free indulgance in fruit, take tone of the Mandrakes every night or every other night, and you may then drink water or earl water melons, pears, apples, plums, peaches or corn, without the risk of being nade sick by them. They will protect those who live in damp situations against chills and fevers. Try them. They are perfectly harmless, They are you good only.

I have abandoned my professional visits to Beston and New York, but continue to see patients at my office, No. 16 N. SIXTII street, Philadelphia, every Saturday, from 92. N. to 10 P. N. Those who wise a thorough examination with the liceptrometer will be charged free hollars, the Heeptrometer declares the exact condition of the lungs, and patients can readily learn whether they are curable or not. But I desire it diethrotly understood that the value of my medicine and their systems are brought into a healthy condition thereby, they are not so liable to take cold, yet no new with diseased image can be used to have a condition of the brought in the subject of the brought in the languages accompany my medicines, so explicit and clear that any one can use them without the liabilit
