The following is the report of an investigating committee, presented on the 21st ult., to a meeting in Marlborough. The committee visited the factory

milk of 100 cows was made into cheese last year. At this time about three hundred are offered, which is the best evidence of its being a paying business; and also the erection of a large costly factory, with all the most approved conveniences, proves very conclusively that the Messrs. Worth have entire confidence in its being a permanent and pro-fitable enterprise. The dimensions of the new factory are 33 by 60 feet, two stories high of eight feet each, hathed WOOLEN GOODS, LIFE INSURANCE COMPANY, Stories and plastered. The first floor is divided into a make room, 33 by 30 ft., with an office about 10 by 12 feet. The balance of the lower floor is the drying room. The second floor is devoted entirely to drying cheese, which will accommodate

> about \$2,000. From 2 1-2 to 3 pounds of cheese can be produced for each pound of butter made in the dairy. The average number of pounds of milk last season to is below the average of dairies in other Chester county can compare with any

We publish the above statements for the benefit of the farmers of this county, and trust that the movement in the cheese and butter business, recently spoken of by our correspondent at Risplace for the cheese and butter business can any where be found in the State

al andonment of mixed husbandry for the dairy and stock business; but stock on every farm in the county should supply all of the fertilizing material (except lime) to manure liberally every crop that the farmer cultivates. If our farmers would adopt a system of cultivating Reading Matter for One Dollar!!! three-fourths or more of their farms in grass, and appropriate not more to such the plow and harrow till gathered, than they could abundantly supply with in such a state of fertility as to insure

A farmer in the neighboring county of Lancaster, gives his opinions, in the Germantown Telegraph, on corn culture, which are doubtless in the main correct: "As the period of spring planting is now approaching, when all farmers will have to prepare for the crops they desire to cultivate through the season, I would respectfully urge upon farmers the continued profitableness of corn, the great grain staple of the country. After all the objections urged against the produc-tion of this grain; of the immense Nov 19, 1879-5m Parki series, Chester county, Pa. amount of labor requisite in its cultivation; of the impoverishment of the soil, and the unpromising and uncertain ap-pearance of the growing plants if the spring should be cold and backward, Rhode's Saper Phosphate,

must mostly rely. Hence, the lest DRY GOODS and GROCERIES. methods of its cultivation must always be sought for by the enterprising farmer.
That it requires a deep, rich soil, no one
SAFE HOME INVOSTMENT

In this county the frequent practice is to haul out manure in the winter or "In September last the boiler in the the corn is cut, and shocked in thick CASH OR PRODUCE, Davis cheese factory, in Herkimer coun-rows, separated by wide middles; these ty, N. Y., gave out, and operations had middles or intervening spaces between to cease until replaced by a new one.—
Meantime Mr. Davis, not wishing to decline the usual supply of milk for the factory, concluded to go on receiving it, the plow. This is thoroughly pulsated by the harrow and drilled in

pounds of excellent butter, being twenty ble production of oats, the above plan pounds of milk to a pound of butter— has very much to recommend it, and in it taking nine and ahalf pounds of milk time must become the true and common to a pound of cheese. Hence, the 200 rotation of corn and wheat. As for oats pounds of butter at 40 cents per pound, the price at which it sold, yielded \$80; proved and richer, its culture will have their wants for the remaining but the milk converted into cheese, at to be abandoned to poor farmers and 15 cents per pound, would have yielded but \$63.15! Thus by the fact of the tracts of naturally poor and mountainrenewal of the boiler, a mere accidental our lands in the country, fitted for the circumstance, the discovery was made production of oats or buckwheat, and that by the manufacture of butter upon such lands they should be grown instead of cheese, the actual increase of as they are grains hardly suited to profit per day was \$15.62, besides the increased value of the skimmed milk wheat.

As regards the depth to plow for corn Col. Freas, the able editor of the there is no question I presume so much disputed among farmers, but in my Telegraph, thus remarks on the above: uspared among upon the opinion it altogether depends upon the "This discovery-for discovery it was, depth of the soil. If that be four inches instead of being a well-established fact, deep you need not plow it much deeper

prepare their manures and fields for a between making cheese and butter, as large average of this great American cereal for the season of 1871."

Ayer's Cherry Pectoral, For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping

Probably never before in the whole history of

arred by it.

Bronchitis is generally cured by taking the Cherry Pectoral in small and frequent doses.

For a Cough and Cold, no better remedy can be had. Take small doses three times a day and

lungs, take the same course.

For Whooping Cough, give small doses three or four times a day.

For Croup, give large and frequent doses until

For Crowp, give large and frequent doses until the disease is overcome.

No family should be without the Cherry Pectoral on hand to protect them, in case of attack, from the above complaints. Its timely use often spares the patient a great amount of suffering and risk, which he would incur by waiting until he could get other aid. Parents, keep it in your houses for the exigencies that arise. Lives dear to you may be saved by it.

So generally are its virtues known, that we need not publish certificates of them here, or do more than assure the public that the best qualities it ever possessed are strictly maintained.

Prepared by Dr. J. C. AYER & Co., Practical and Analytical Chemists, Lowell, Mass., and sold all round the world.

Cough, Bronchitis, Asthma. and Consumption.

Probably never before in the whole history of medicine, has anything won so widely and so deeply upon the confidence of mankind, as this excellent remely for pulmonary complaints. Through a long series of years, and among most of the races of men it has risen higher and higher in their estimation, as it has become better known. Its uniform character and power to cure the various affections of the lungs and throat, have made it known as a reliable protector against them. While adapted to milder forms of disease and to young children, it is at the same time the most effectual remedy that can be given for incipient consumption, and the dangerous affections of the throat and lungs. As a provision against sudden attacks of Croup, it should be kept on hand in every family, and indeed as all are sometimes subject to colds and coughs, all should be provided with this autidot for them.

Although settled Consumption is thought incurable, still great numbers of cases where the disease seemed settled, have been completely cured, and the patient restored to sound health by the Cherry Pectoral. So complete is its mastery over the disorders of the Lungs and Throat, that the most obstinate of them, under the Cherry Pectoral they subside and disappear.

These Goods he guarantees to sell cheaper than any one else.

His Mesta is a Never to be Undersold.

Broken is great production.
