WATCHES. Ohio, contributes to the Germantown Tele-The extensive use of these watches for the last fifteen graph the following plan, adopted by the tears by Railway Conductors, Engineers and Express farmers of that section for improving their men, the most exacting of watch-wearers, has thoroughly stock. A similar plan has been suggested demonstrated the strength, steadiness, durability and by The Whig to the farmers of this county. accuracy of the Waitham Watch. To satisfy that class The plan has worked to the profit of the all these respects, is to decide the question as to the Clermont county farmers, and would prove as advantageous to those of Cecil, if they More than 500,000 of these watches are now speak. would adopt it:

More than 500,000 of these watches are now speaking for themselves in the peckets of the people—a proof and a guarantse of their superiority over all others.

The superior organization and great extent of the superior organization and great extent or t The superior organization and great extent of the Company's Works at Waltham, enables them to produce watches at a price which renders competition fattle, and those who buy any other watch merely pay from 25 to 50 per cent, more for their watches than is necessary.

These time-pieces combine every improvement that a long experience has proved of real practical use. Having he it the refusal of nearly every invention in watch making originating in this country or in Europe, only three or four cows, or one or two sows, cannot afford to keep a fine built or boar to serve them. Few persons comparatively are willing to share a reasonable part of the expense by paying a liberal fee for the use of such animals. Hence the habit of depending upon inferior specimens becomes fixed, and in many places people think they possess advantages, especially to small farmers, over the best of the improved breeds. But after all there are not many persons who do not feel well-pleased to get a calf, a lamb or a litter of pigs from an improved stock. The preju-

FARM AND HOUSEHOLD.

The invention and use of a centre-pinion of peculiar construction, to prevent damage to the train by the break go of main-spinies, is original with the American Watch Company, who, having hed the refusal of a other contributiones, adopted Forz's patent pinion as being the best and fulfiless. over these mattes for a few moments. This waked up a new idea, or rather was the means of putting one that was not quite new in working shape. We called a meeting, and half-a-dozen farmers attended it. A committee was appointed to draw up a plan of organization, and another to ascertain what steps were necessary to secure a legal corporate existence. These things accomplished, a president, vice-president, secretary and treasurer, with a board of managers, were selected, a few shares of capital stock paid in—five dollars constituting a share—and a committee appointed to make purchases for the company. As a beginning this committee procured a fine Short-Horn bull, eighteen months old, and the best boar they met with in a tour of some days among the breeders of Hamilton and Buttler counties. This was in May last. We have more recently procured a Hardened and tempered hair-springs, now universally dmitted by Watchmakers to be the best, are used in raches of Waltham Watches. Our new pat int stem-winder, or keyless watch, is already a decided success, and a great improvement on any stem-winding watch in the American market, and by far the cheapest watch of its quality new oferest to the public. To those living in portions of the United States where watchmakers do not abound, watches with the above mentioned improvements which tend to ensure accuracy, cleanlines, durability and convenience, must prove invaluable. The trademarks of the various styles made by the company are as follows: Examine the spelling of these usues carefully before buying. Any variation even of a single letter, indicates a counterfeit.

and Buttler counties. This was in May last. We have more recently procured a superior sheep—cross-bred Leicester and Cotswold—and another pig, a pure Essex. The objects of the company are so highly appreciated that another bull is about being obtained, and in various directions the questions of extending our enterprise is being agitated.

"Not only thus are the benefits being diffused, but inferior females of all classes of animals included in the range of our company's sphere, are being disposed of, and better ones purchased to supply their places. The original idea was to supply the demands of a single neighborhood.—Less than a year has seen it spread beyond

belonging to the company are entrusted to safe and judicious members for keeping, and reliable Seels, and the board of managers allow them a Market Garleners wanting fresh and reliable Seels, should hav of the growers. We grow the finest varieties of Beet, Cabbage, Carrot, Sugar Corn, Kale, Lettines, Melon, Onion, Paruinja Rollida, Spinach, Spinach, Turnip and other Vegetable Seels. Catalogues with Price List mailled free, WADE & ARMSTRONO, Seedsmen, 1120 Market street, Philadelphia, Pa. fair compensation for the care of them. A fee is charged for the use of the animals, not so large as to induce patrons to go elsewhere, but sufficient to pay all expenses and a reasonable profit. This fee, in our company, is the same to stoedholkers and others. Most farmers who are able take, or are expected to take, one or more shares of stock. Persons who cannot do this ought not be required to pay a large fee. The property of the company and all profits belonging to members, and this compensates them for any apparent injustice in this arrangement." \$5 TO \$10 PER DAY, MEN, WOMEN, who engage in our new business make from \$5 to 810 per day in their own localities. Full partiars and instructions sent free by mail. Those in ned of permanent, profitable work, should address at once, GEORGE STINSON & CO., Portland, Maine.

Sowing Grass-Seed.

Rufus Peet, of Wyoming county, New York contributes the following to the Germantown Telegraph on sowing grass-seed: As I perceive that a correspondent hailing from Montgomery county, Pa., has expressed views upon seeding ground with grass, I am led to offer a few remarks upon the

same subject.

The results of labor depend greatly upon the field in which we labor. The time of seeding must be varied by the latitude. It Nos. 10 and 41 Park Row, New York.

Ayer's Hair Vigor, For restoring Gray Hair to

its natural Vitality and Color. A dressing which is at once agreeable,

ness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted

merely for a HAIR DRESSING, nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts

long on the hair, giving it a rich glossy lustre and a grateful perfume. Prepared by Dr. J. C. Ayer & Co., PRACTICAL AND ANALYTICAL CHEMISTS,

LOWELL, MASS. PRICE \$1.00. Sold by H. H. MITCHELL, Elkton, and all Druggists in I dealers everywhere. [Nov 19, 1870-19

EAVE FOR BALTIMORE-

RENOVATE YOUR FEATHERS. And remore a most prevalent cause of disease The New Machine, patented September 24th, 1867, by O. C. Monroe, will most effectually accomplish this, without the least possible injury to the Feathers.

The subscriber offers to the citizens of CECILTON and vicinity a rare chance to avail themselves of the unparalleled benefits of this unrivaled FEATHER Dressing & Renovating Machine,

the most successful patent of the kind ever effered to the public. And I venture the prediction that it user will be excelled, for it proves to be exactly what all conditions and qualities of Feathers, from entirely new to old and much worm need to render them as perfect as age, quality and condition will admit of their being made. The Cleansing is done entirely by the action of Steam & Vaporized Carbolic Acid;

giving the appearance and essential qualities of NEW FEATHERS, and relieving them from all liability to moth by the removal of all gummy and glutinous mat-ter from the quill. Our facilities are such that by short notice we can take and return lieds the same day, well dressed, ready for Two Dollars per Bed.

Physicians and scientific men in hundreds of towic throughout the United States, who have had Feather Cleansed by this process, have given it the very highest recommendations.

Feathers exiled for and returned in town without a tra charge.
