The office of Notary Public was held by Mr. McFarland, at the bank, a proper place when we consider the duties of a Notary. McFarland being a Radical, young Brown, a good Democrat, and Teller at the Bank, became a candidate. By some "hushing" piocess it was put in the Register's Office, where axive yit had no apparent connection. Reuben, Jr., is thus made Notary. This office, I am told, alono pays \$600. Here are six paying offices in one Elkton family. When we turn to the Circuit Court, every officer, the big fish and litte, are Elktonians; the Cleik—the Deputies—Commissioners at Law—Audito.—Crier—Baillifs. In Judge Price, the Crier and Bailiffs were distributed over the county, most generally among the constables of the different Districts.

We challenge a comparison of the expenditures of the two parties while administering the affairs of the county and State. In fact, the very name of Democratic party has become the synonym of public plunder and official theft. Look at Bahimore city and the State government of Maryland; look at the records of Cecil county; look at New York, at Brooklyn, at Albany,—in a word, anywhere that party has held power for any length of time, and you will find a wide-spread system of plunder in operation. The Thieving Democracy.

The New York Times has a reporter employed in making transcripts from the offlcial books of the city Government who shows up the stealing of Tammany; and no system of public plunder has ever equaled t before.

During the years of 1869 and 1870 an aggregate of \$5,663,616.83 was paid to one firm, Ingersoll & Co., which Mr. Wm. A schedule of the Individual entries is given with date of warrant, amount drawn, character of the work, and date on which the work was supposed to be done, specified in each case. A portion of the warrants were drawn directly to Ingersoll & Co, and checks for the remainder were all endorsed by the same firm.

The charges generally represent from ten to one hundred times what the work or articles could have actually cost, and the total is monstrously extravagant. But the exceedingly suspicious feature about it is the fact that over five and one-half millions of dollars were paid out of the treasury during two years to a single firm, and that firm a well-known agent of the Tammany ring. The inference that the bulk of this sum went into the pockets of the Democratic officials who approved the warrants forces itself upon the most obtuse and

THRASHER and CLEANER Caution to Farmers and Thrashermen.

The undersigned, Superintendent of the New Jersey Agricultural Works, respectfully cautions his friends and customers against the Falss stratestry and misrepresentations of the Trenton Agricultural Works in regard to the Albany Trasher and Cleaner, which we have the honor to represent. Their statement that Mr. Briggs would not allow the Albany machine to remain on his premises is Falss, as it still remains in his barn, doing good work, while the Trenton Agricultural Works have been compelled to remore their machine from the premises, and we do hereby challenge the Trenton Agricultural Works to disprove the following statement of facts and figures in regard to the recent trial:

Time of the Albany Thrasher and Cleaner in thrashing 200 sheares of oats, 22 minutes; time of the Trenton Agricultural Machine in thrashing 200 sheares of oats was 33½ minutes; difference of time in favor of the Albany machine, 11½ minutes. Both machines were run by the same power and team, and the grain was all taken from the same mow. The grain wasted from each machine was carefully weighed, when it was found that the Trenton Agricultural Works Machine had wasted more than three times as much as the Albany Machine. More than £000 of these machines have been made and sold by one firm, and since their introduction into New Jersey, they have fully proven their superiority, and are fast supplanting all others.

We warrant these machines to be superior to the Trenton Agricultural Works Machine on the following points:

EASE OF RUNNING, DURABILITY,
EFFICIENCY IN CLEANING, and
ECONOMY IN SAVING GRAIN Competition is invited, and a Preliminary Trial always granted, when, if their superiority is not fully proven as represented, they can be returned. Any person wishing to test one of these machines, with a view of purchasing, will ablress

Interesting Facts for Farmers.

Interesting Facts for Farmers.

A trial of Thrashers and Cleaners took place on the lith of April, at the farm of Benjamin Briggs, near Tullytown, I'a, between the Machine made by Wheeler, Melick & Co., Albany, New York, and the Machine made by the Trenton Agriquitural Works, Trenton, N. J., which resulted as follows: Each party had the privilege of thrashing twenty-five (25) sheaves before the trial, to give them an opportunity to regulate their machines, after which each machine thrashed two hundred (200) sheaves, of which an accurate account was kept of the time occupied in thrashine, cleanues of grain thrashed, and grain wasted. Both Machines were run by the same power and team, and the sheaves thrashed were all taken from the aame mow.

After the twenty-five (23) sheaver had been thrashed by the Albany Machine, the operators expressed themselves reacy for trial, Two hundred (200) sheaves were then thrown from the mow, which were thrashed and cleaned ready for market by the Albany Machine in twenty-two minutes. Twenty-five sheaves were then taken from the mow and thrashed by the Trenton Agricultural Works' Machine. The contrast between the work done by the two Machines was so great that the operators of the Albany Machine in (10) sheaves more before the trial, which was willingly granted by the operators of the Albany Machine.

After the ten extra sheaves had been thrashed, two hundred were then taken from the same mow, which were thrashed and cleaned (but not for market) in thirty-three and one-half minutes. The difference in the same mow, which were thrashed and cleaned (but not for market) in thirty-three and one-half minutes. The difference in the same mow, which were thrashed in the same mow, which were thrashed in the same mow, which were thrashed for the advance and one-quarter pounds in favor of the Albany Machines.

Statement of Committee on Thrashing Machines. NEAR TULITTOWN, Pa., June 19, 1871. We the undersigned Committee on Threshing Machines, at the trial held at the farm of Mr. Benjamin Briggs, near Tullytown, Pa., on the 11th of April last, having observed an advertisement published in the papers, signed by Bennington Gill, President of the Treuton Agricultural Works, charging Mr. John S. Beers, General Agent for the Wheeler, Meike & Co., of having given an incorrect statement of the recent trial, we therefore, as gentlemen, deem it our duty in justice to Mr. Beers and the company he represents, to inform the public that his statement of the facts and figures of the trial we believe to be all true and correct. MINOR II. IVINS, JOHN WHARTON, JOHN BURTON, Committee.

Statement of Mr. Briggs in regard to the Trial. NEAR TULLTTOWN, June 19, 1871.

Nas. Telltrows, June 19, 1871.

Ma. John Buttzeworm, Ja.—Deer Sir.—I am surprised to see a letter without date publish-d by Bennington Gill, President of the Trenton Agricultural Works, in the "Cerl County Whig." Maryland, purperling to be a copy of a letter that I sent to you before the trial of machines at my place.

This letter being published without date, I think is incended to mislead the public and leave the impression that it was sent to you after the trial. After witnessing the trial of both machines, I will say that the Albany Thrasher and Cleaner proved liself all that you represented it to be and will also say that your statements of facts and figures in regard to the recent trial, I believe to be true and correct.

The statement that I would not allow your machine to remain on my premises is not true, as the machine still remains in my barn.

Signed, BENJAMIN BRIGGS. BENJAMIN BRIGGS.

Figued, BENJAMIN BRIGGS.

By a careful comparison of the above facts it will be seen that the Albany machine did the same work in one-third less time, and in thrashing twenty-five hundred aboves, (an ordinary day's work) would save one bundled and forty pounds more grain than the machine made by the Trenton Agricultural Works.

After this conclusive trial we think that farmers and dealers will have no difficulty in deciding which machine it is their interest to purchase. isalers will have no difficulty in decling which machine
it is their interest to purchase,
A supply of Alliany machines will be kept constantly
in hand, at the New Jersey Agricultural Works, corner
