Verily, we are utterly at a loss to account for sensible people supporting such a party. If a merchant or master mechanic should employ laborers who cost him thirty to fifty per cent. more than he could get the same work done better for by employing another set of hands, and

CONSUMPTION. ITS OURE AND ITS PREVENTIVE. BY J. H. SCHENCK, M. D.

Many a human being has passed away, for whose death there was no other reason than the neglect of known and indisputably proven means of cure. Those near and dear to family and friends are sleeping the dreamless slumber into which, had they calmly adopted

DR. JOSEPH II. SCHENCE'S SIMPLE TREATMENT and availed themselves of his wonderfully efficacious medicines they would not have fallen.

Dr. Schenck has in his own case proved that wherever sufficient vitality remains, that vitality, by his medicines and his directions for their use, is quickened into health-ful vigor.

l vigor. In this statement there is nothing presumptuous. To In this statement there is suming proceed that is not a thousand times substantiated by living and visible works. The theory of the cure by Dr. Schenck's medicines is as simple as it is sufalling. Its philosophy time is as simple as it is unfailing. Its philosophy requires no argument. It is self-assuring, self-convincing. The Seaweed Tonic and Mandrike Pills are the first two weapons with which the citadel of the nalady is assailed. Two-thirds of the cases of consumption originate in drspepsia and a functionally disordered liverswith this condition the bronchial tubes "sympathize" with the stomach. They respond to the morbidic action of the liver. Here then comes the culminating result, and the setting in with all its distressing symptoms of

CONSUMPTION.

The Mandrake Pills are composed of one of Nature's noblest gifts—the Polephillum Peltatum. They possess all the blood-s-arching, alterative properties of calomel, but unlike calomel, they

"LEAVE NO STING BEHIND." The work of cure is now beginning. The vittated and mucous deposits in the bowels and in the alimentary canal are ejected. The liver like a clock is wound up.—It arones from its torpidity. The stomach acts responsively, and the patient begins to feel that he is getting at hot

A Supply of Good Blood. A Supply of Good Blood.

The Seaweed Tonic, in conjunction with the Pills, permeates and assimilates with the food. Chylification is now progressing without its previous tortures. Digestion becomes painless, and the cure is seen to be at hand. There is no more flatulence, no exacerbation of the stomath. An appetite set in.

Now comes the greatest Blood Purifier ever yet given by an indulgent Father to suffering man. Schenck's Pulmodic Syrup comes in to perform its functions and to hasten and complete the cure. It enterest once upon its work. Nature cannot be cheated. It collects and rigens the input rel and diseased portions of the long, in the form of gatherings it prepares them for expectoration, and lot in a very short time the mulady is vanished, the rotten throne it occupied is renovated and made new, and the patient, in all the digitity of regained that was

GIVEN UP AS LOST.

GIVEN UP AS LOST.

The second thing is, the patients must stay in a warm room until they get well: if it almost impossible to prevent taking cold when the lungs are diseased, but it must be prevented, or a cure cannot be effected. Fresh of and riding out, especially in this section of the country in the fail and winter season, are all wrong. Physicians who recommend that course lose their patients, if their lungs are body diseased, and yet, because they are in the house they must not sit down quiet; they must walk about the room as much and so fast as the strength will bear to get up a goed circulation of blood. The patients must keep in good prints-be determined to get well. This has a great deal to do with the appetite, and is the great point to gain.

To despair of cure after such evidence of its possibility in the west cases, and moral certainty in all others, is sinful. Dr. Schenck's personal statement to the Faculty of his own cure was in these molecule words:

"Many years ago I was in the last stages of consumption: confined to my bed, and at one time to physicians throught that I could not live a week; then tike advowning man catching at straws, I heard of and obtaining the preparations which I now offer to the public, and they made a perfect cure of me. It seemed to me that I could feel them penetrate my whole system. They soon ifpend the matteron my lungs, and I would spit up more than a pint of offensive yellow matter every norming for a long time.

"As soon as that began to subside, my cough, ferring for a long time.

"As soon as that began to subside, my cough, ferring for a long time.

"I was weighed shortly after my recovery," added the Doctor, "then looking tike a mere skeleton, my weight was only midty-seven pounds; my present weight is two hundred and twenty five [228) pounds. And for years have enjoyed uninterrupted health.

Dr. Schenck has discontanced his professional visits to New York and Boston. Hero his one, Br. J. Il. Schenck, Jr., still continue to see patients at their office, No. I'

sey, known as the "Pertiess," make the following report.

Each party had the previlege of threshing 50 sheares of wheat before the trial; after which each machine threshed 1,200 pounds of aleares, which were carefully wrighed, and an accurate account was kept of the time occupied in threshing, cleanliness of the grain threshed and grain wasted. The shearest thratied were all taken from the same now, each machine teking the shearest alternately. Both machines being on the flor at the same time, were run by the same team and fed by the same feeder. The time occupied by the "Pertiesa" machine in threshing 1,200 pounds of sheares was 14 minutes and 33% ecconds. The Allany machine threshing the same smount in 15 minutes and 31% ecconds.—The difference in favor of the "Pertless" was 443% pounds.—2 pounds of which were cartiel over in the straw. The Allany threshed 443% pounds.—2 pounds of which were cartied over in the straw. Difference in favor of the Allany machine, 45 younds, 35 bounds of which were cartied over in the straw. THE AMERICAN WASHER! PRICE, \$5.50.

The American Washer Saves Money, Time and Drudgery. THE FATIGUE OF WASHING DAY NO LONGER DREADE BUT ECONOMY, EFFICIENCY, AND CLEAN CLOTHING SURE.

BUT ECONOMY, EFFICIENCY, AND CLEAN CLOTHING STAF.

In calling public attention to this little machine, a few of the invaluable qualities, (not possessed by any other washing machine yet invented,) are here enumerated. It is the smallest, most compact, most portable, most simple in construction, most casily operated. A child ten years old, with a few hours' practice, can thoroughly comprehend and effectually use it. There is no adjusting, no screws to annoy, no delay in adapting! It is a lways really for use! It is a perfect little wonder! It is a miniature giant, doing more work and of a better quality, than the most clab-rate and coulty. One-half of the last is fully saved by its use, and the clothes will last one-half longer than by the old plan of the rub board. It will wash the largest blanket. Three shifts at a time, washing thoroughly! In a word, the ablution of any fabric, from a Quilt to a Lace Curtain, or Cambrie Handwerthief, are equally within the capacity of this LITTLE (EM! It can be fastened to any tub and taken off at the largest how deep provided a prejudice, may exist.

will.

No matter how deep-rooted a prejudice may exist against Washing Machines, the moment this little machine is seen to perform its wonders, all doubts of its cleaning efforce; and utility are banished, and doubter and detractor at once become the fast friends o doubter and detractor at once become the fast friends of the machine.

We have testimonials without end, setting forth its numerous advantages over all others, and from hundreds who have thrown saids the unwieldr, unites machines, which have signally failed to accompliab the object pre-mised in prominent and loud counding advertisements. It is as perfect for weaking as a wringer is for winging. The price another paramount inducement to purchasers, has been placed so low that it is within the reach every housekeeper, and there is no article of domestic economy that will repay the small investment so soon.

All that is asked for this GREAT LABOR SAVER, is fair trial. We guarantee each machine to do its work serfectly. SOLE AGENTS FOR THE UNITED STATES, A. H. FRANCISCUS & CO.,

About 180 or 200 acres of this land is cleared and in fine state of cultivation, advantageously divided into fields. The residue of the land is well as the Woods, among which is some very heavy Oak timier, as well as abundance of chestout.

This farm is located 10 miles from Eikton, 6 miles from North East, directly on the ELK RIVER, where vessels can be looked and unloaded immediately on the shore.—Regular lines of atemboats from Baitimore to New York and Philadelphis stop at Port Herman, on the opposite side of the River.

This farm has always been very productive, both for Grain and Grass, and it is believed that no more valuable plantation can be found in the Riste.

There are on one part of the farm large deposits of Clay, well adapted to the manufacture of eartherware of fine quality.

The lathlings, which consist of DWELLING.

Barn, Stabiling, Granary, and Sheekling are all comparatively new. Fine Apple Orchard on the farm.
