species of newspaper patron, who seldom or never trouble themselves to pay a subscription bill, have been lopped off-and the small remnant remaining will be speedily-our list has filled up with new subscribers who pay in advance, and has steadily increased. With the increase of subscription, advertising patronage has steadily advanced.

In the year which is just opening upon us, we contemplate other improvements, which will be inaugurated and carried out with the same steady and unremitting toil which has been devoted to our business in

As the business of farming is the main stand-by of the country, we have endeavored to make The Whig a medium of support and encouragement to that branch of industry, and have weekly furnished a column of the best selected or original matter we could command. Our practical knowledge of farming, gained by upwards of twenty years' experience in the business, enables us to judge of such matter as will be of most value to the practical agriculturist.

While the local affairs and business interests of the county have been kept constantly in view, and the latter encouraged and aided to the extent of our ability, The Whig has been firm and untlinching in its political course, and a constant and unswerving advocate of Republican measures, as the only sure basis for our Government and future greatness as a nation and a people. While opposing the nefarious prin cipies of the present so-called Democratic party, with all the power we possess, we have endeavored to avoid assaults on individuals, as far as the nature of the circumpast course of The Whig, and its efforts to stances would admit. We hope that the promote the domestic interests of the promote the domestic interests of the Messrs. Crowell & Co., late of New Jerlent and patriotic principles of the truly great Republican party, will be taken as an earnest of our future course; and confidently resting our hopes for the future on our experience in the past, we take leave, for the present, of our numerous friends and readers.

Co-Operation among Farmers. Our agricultural readers will find an excellent article on the "Improvement of Stock," in the farmers' column, on the fourth page.

This is the season to set about making such important changes in their future operations on the farm as will lead, if judi ciously managed, to results accompanied by satisfactory profits. Ten farmers, by combining and appropriating \$100 apiece, could start a course of improvement in not only their own stock, but the benefit would thousands of dollars have been thrown away in patent manures, which, if the amounts thus lost, had been judiciously invested in improved stock and a system of stock-raising and farming combined, inaugurated, the farms, whose owners have suffered from those free experiments in manures, would to-day have been one hundred per cent. better, while the stock would have shown a much greater increase in its comparative value.

Dr. Physick, the celebrated surgeon, of Philadalphia, owned a fine farm, a short spread largely over the county. Many

S. Richthe Alderny, or Jersey cattle. These celebrated breeds spread over the neighborhood, and the improvement in the native stock was very great. Had there been any care taken, and system adopted, by which to have profited to the fullest extent, by the following profited to the fullest extent, by the full profited to the fullest extent, by the full profited to the fullest extent, by the full profited to the full profited to the fullest extent, by the full profited to the full profit profited to the full profited these important opportunities, the increase in the value of stock in that neighborhood would have been to-day incalculable. By concert of action and adue amount of attentions of the concert of action and adue amount of attentions. concert of action and a due amount of atten tion, all kinds of stock could be increased two hundred per cent. above what it at present is, in a few years, throughout the county. At present where a single isolated farmer attempts to keep sheep and improve his flock, they have set upon and destroyed by the wollish beasts that rake the country over at night; but if a dozen adjoining farmers were engaged in the same pursuit and combined against the dogs the evil would soon be ahated. The project of giving a valuable magazine to overy subscriber who paid a year in advance for the paper, has been successful beyond our most sanguine expectations: and many who did not avail themselves of the opportunity to procure a magazine of choice reading for a year, "free, gratis—for nothing," will, when they consider the matter, regret their neglect. are warranted equal to any made. They are prepared
from the fruits, and will be found much better than
many of the Extracts that are sold. Ask your direcer
or Druggiest for Wilberger's Extracts. BARLOW'S
INDIGO BLUE is, without doubt, the best article in the
market, for blusing clothes. It will color have water
than four times the same weight of indigo, and much
more than any other scash blue in the, market. The
only genuize is that put up at ALFRED WILBERGER'S
