YOU CAN DO YOUR OWN PAINTING

These Paints are composed of PURE WHITE LEAD, ZINC and LINSEED OIL, with other materials which add greatly to the durability, elasticity, beauty and strength of the paint. The whole are chemically combined, so that the pigments are held in permanent solution, thus forming a new compound which dries upon the surface and adheres firmly to it, thus forming a smooth, glossy, firm elastic and durable Paint. The Oil, which is the real life of the Paint, cannot leave it and be absorbed by the substance to which it is applied, as it does in paints mixed in the ordinary way, and thus leave the pigment dead and brittle, to wash and rule off in a few months, or at farthest in three or four years. This paint is unaffected by changes of temperature, is perfectly impervious to the action of water, is well adapted to all classes of work, and is in every way a better Paint for either INSIDE or OUTSIDE WORK or BOAT PAINTING, than any other Paint known to the trade, and will last at least THREE TIMES AS LONG AS THE BEST LEAD AND OIL MIXED IN THE ORDINARY WAY.
