The "Maryland" is a rejurement and permanent improver of the soil. It stimulates equal to Peruvian Cunno, and unstains equal to Bone, being composed abnoot entirely of those ingredients, with a very liberal per centage of Potash in the residum. There is no addition to inferior article used—every particle of the Phesphate being of essential benefit to the land. Neither poins nor expense have been spared in its preparation, and we claim for it the greatest benefit to the farmer from the smallest outlay. For Cotton, WHEAT and CORN, and as a general stimulant and aliment for worn and impoveri-can be nothing superior. It is warranted to run as high in Ammonia and higher in Bone Phos
