FOR VICE-PRESIDENT, HENRY WILSON, OF MASSACHUSETTS.

"Gen. Grant never has been defeated and he never will be."-Houace Greeley.

"While asserting the right of every Republican to his untrammeted choice of a candi lican to his untrammeled choice of a candi-date for next President until a nomination is made, I centure to suggest that Gen. Grant will be fur better qualified for that momentous trust in 1872 than he was in 1968."—Horace (IREKLET, speech on 5th January, 1871.

We propose to expose the Democracy in their new role of attempting to steal to power, disguissed in the old white hat and coat of Horace Greeley. We are fighting the same old party of "treason, strategem and spoils," and clean to best them by exposing their "little game" to cheat unsuspecting Republicans by adopting the farmer of Chappaqua as a billing.

The friends of GRANT AND WILSON, and of the Republican party in Cecil, cannot sid the cause more effectually than by making an effort to get up Campaign Clubs for The Whig at every Post Office in the county.

And yet he says: abide Greeley without loathing, it is impos-sible to conceive; and that they do loath majority of our countrymen.' abide Greeley without loathing, it is impossible to conceive; and that they do loath the candidate which has been forced upon them, we have abundant declarations every hour. What good can be expected to result to the public from such a coalition with each party despising the other, and both expecting by some turn of affairs to get the advantage of the other? The Democrats assert that Greeley is their candidate and they will compel him to follow their dictation. Greeley claims that the whole party are Lu followers and they shall abide his dictation in case of his election. Salt Lake has been scourged soverely by this Egyptian plague, but we have not heard that Colorado has ever suffered from their visits The potato bug, however, is very troublesome, and if not checked will in a few days destroy the crop they attack. The settlers have discovered a poison remedy which destroys the insects, and by dusting

the tops of the potatoes with this poison their depredations are soon checked. The demand by the mining regions of the Rocky Mountains takes all the produce in grain vegetables and fruit which can be raised in Colorado at remunerative prices; and this will ever supply a convenient market for all that can be raised in the territory.
