Since the exposure of the attempts made by certain unscrupulous local dealers to paira off their ecarse astringents, made from cheap and impure materials, in the place of the great national tonic, Hestetter's Stomach Bitters, public opinion has set strongly against these empirics and their preparations. HOW TO GO WEST. This is an enquiry which every one

should have truthfully answered before he starts on his journey, and a little care taken in examination of Routes will in many cases save much trouble, time and money. The "C., B. & Q. R. R.," running from Chicago, through Galesburg to Burlington and the "I., B. & W. Route," running from Indianapolis, through Bloomington to Burlington, have achieved a splendid reputation in the last two years as the leading Passenger Routes to the West. At Burlington they connect with the B, & M. R. R. and from the great Burlington Route, which runs direct through Southern Iowa to Nebraska and Kansas, with close connections to California and the Territories; and passengers starting from Cecil County, on their way westward, cannot do better than to take the BURLINGTON ROUTE.

This Line has published a pamphlet called "How to go West," which contains much valuable information; a large correct map of the Great West, which can be obtained free of charge by addressing the Burlington, Iowa.

Epizootic.—Not to be behind hand in National Affairs, we have had a sprinkling of the Epizoot, through this neighborhood, for some reason our borough being spared so far. Some cases have been quite bad, but all as yet tend to recovery.

Rain.—On Monday evening a fine rain commenced and continued through the night.

Signature of the characteristic of a good short should be the characteristic of a good short side, shoot at it by all means. The old system is to fire at those on your own side, which is a losing; for, if your friend brings down his bird, he bags it; whereas, if you fire also, you have the benefit of the doubt, which is settled by tossing up. Never mind the old gag of its being unfair—the ardor of a sportsman is a good excuse.

6. Never brag of being a good shot. Hold this as a maxim; if, for example, you have the short over a gentleman's grounds, and are successful, which you are pretty sure to be if you follow these rules,

Frost is the netural enemy of Malaria, but unhappily this agent cannot conquer the consequences of evil-originating before its alvent. New cases of intermit originating before its alrent. New cases of intermittent will become error of course as the month alrances. At least such will be the case energy-where north of the Ohoo, and east of the Stony mountains. But the arrest of the new cases gives no security against the continuance of the proxysmo of the disease when previously established. Those who have lacke during September or October, or both, and who have neglected the remedies fitted to destroy the periodical character of the disease, who now go on to shake till they have learned wisdom from latter experience. The period for the proper use of Paschalls Force and Agas Mixture is, therefore, for from having passed away. Moreover, throughout the Southern and Western States—wherever in fact, the strawberry blooms in January, February or early March—there new cases will continue to occur; while in the West Indies, Mexico, and tropical South America, they never wholly disappear, except during intensely hot weather. Then let those who are wise still turn their attention to the aumonomement of this most valuable remedy and the very strong professional and official testimony in its fator, as given elsewhere in this journal.
