the agriculturist, in its wonderful powers as a fertilizer. In this respect it is unequaled by any crop grown on the farm; and for this it is indebted to its capacity for foraging largely on the air. the "AGRICULTURIST," makes the folthe fertility of land are chiefly these:

1. Shading the surface of the soil.—

3. By effecting important chemical foliage enables clover to gather from the earth. Thus a clover-field becomes a great commissary, collecting food from the earth and air for whatever erron that may follow:

cents, you will have little to sell. It will rain porridge, but your dish will not be ready to catch it. History, experience, observation, and commonsense all demonstrate that good times a great commissary, collecting food from the earth and air for whatever come to poor farmers. If you can not do anything else towards importing the may follow:

Cents, you will have little to sell. It will have little have little have little have little have little with plant food. Its abundance of crop that may follow.

in a mat, as it were, thus preventing it from washing.

5. As a green manure. Perhaps, no crop is so valuable for turning under in green stage as clover. In addition growth of succeeding crops.

condition in the soil. The clover plants take nitrogen from the atmosphere, and manufacture it into their own substance which, on decomposition of the clover roots and leaves, produces abundance of obtain a larger quanity of manure than in the largest dose of Peruvian guano which a farmer would ever think of applying."

POTATOES.

Correspondent of Germantown Telegraph. First, to graw a potato of a good quality for the table, a high, airy situation should be selected, for it is useless to attempt to grow a tuber of fine quality on a wet, soggy soil.

I should prefere to have it plowed in

the Fall. I should choose a stubble or sod. If not plowed in the Fall, and as the weather will permit, it should be well done in the Spring after drying .-Harrow well, mark off with chains 3 feet between rows and drop the seed by the dropper striking his heel down on the line about twenty inches apart, dropping in a piece of potato. This physicians. It begins to be one of the the roots near the surface, is nothing drought equally as well.

TER has no superior applied when the plant is breaking ground. The superphosphates will hasten the crop ten days and avoid the rot best of the patient a delusive sensation of improvement. We do not doubt that in some diseases, alcoholic stimulant can be used. days and avoid the rot best on my soil, The Rose and Peerless at present seems to be the ruling varieties. The Garnet Chili is a good yielder, and of fair quality and seldom rots. The Rose requires an old rich soil to be productive.

The Peerless is affected a good deal by the soil on which it is planted. but adds nothing to the bulk of tubers.

The soil should be frequently stirred with a cultivator, but what earthing is

ject, a good many foolish nostrums and theories recommended, but after all has amounted to but little.

The first and all littles are subjects with alconol as a tonjudge, a good many foolish nostrums and theories recommended, but after all has amounted to but little. amounted to but little.

as many bushels, which answers very ough oxygenation of the blood.

well for our purpose. get the crop along as fast as possible; discredit it before the world.

dig early, and house in a cocl cellar in heaps not too large. But there is one thing I have forgot to mention, which is, that for seed, select some of the early varieties. When the planter has adhered to these conditions he can Clover is valuable from the rapidity have good potatoes and defy the rot.

WHITEWASH.

Take a clean, water-tight barrel, or Kinds.

Clover is an admirable soiling crop, coming in early, yielding two heavy water over it, boiling hot, and in sufficrops with good management, and in cient quantity to cover it five inches favorable seasons three crops. Mr. stephens estimates that in Scotland the average crop of green food from two cuttings is eighteen tons (of 2,000 lbs.) per acre. With liberal employment of sheets and liberal employment of sheets. say that this crop can, in most seasons in Canada, be exceeded. cated to the above wash, by adding to three pounds of yellow ochre; or a good AND COUNTRY MERCHANTS.

have something to say hereafter.

Clover in pasture lands is excellent for all descriptions of stock. Hogs are hundred dollars to the market value of gree by a run in the clover pasture
Clover, however, has a still higher
claim than any of these (possibly than
all of them together) to the affection of things more beautiful than clean, white

THE GOOD TIME COMING.

Mr. Harris, in his "Walks and Talks on the Farm," in the March number of The different ways in which it adds to lowing comforting prediction to farmers: We are going to have better times Owing to its rapid and luxurian growth it soon forms a close and heavy covernow is the time to prepare for them. ing over the soil, that acts as a mulch Get the land ready. Make it clean, and in protecting it from the scorching rays of the Summer sun. At the same time then be gaining in fertility, and when of the Summer sun. At the same time that the soil is protected the weeds are smothered out, and the land cleaned the will—this land can be plowed up.

2. Aerifying and disintegrating the soil. Clover possesses peculiarly long and powerful tap-roots, that personal tanney will—this land can be plowed with a reasonable prospect of producing a good crop. But if you continue to plow as many acres, and updates the proof of the property of the proof of to plow as many acres, and undertake to work it with less labor, the chances DR. R. F. TULL, and powerful tap-roots, that penetrate deep, loosening the soil and admitting are that you will get meager crops, the air, thus rapidly changing the physical deep, and the land will become more and the air, thus rapidly changing the physical condition not only of the soil, but of the subsoil also. comes for corn to bring a dollar a bush-el where it now sells for 20 cents, and changes necessary to enrich the earth pork and beef bring 10 cents per pound, with plant food. Its abundance of live weight, where they now bring 3 a great commissary, collecting food from the earth and air for whatever crop that may follow.

never come to poor farmers. If you can not do anything else towards improving your farm the coming season, 4. By preventing washing. The clover mulch breaks the force of the hard beating rains, while roots hold the soil This alone would add millions to the wealth of the country.

CHEAP POULTRY-YARD.—Set posts firmly in the ground, six feet high, eight feet apart. Take No. 9 wire, and to the immense amount of rich vegetable matter in its abundant roots, the plant itself is extremely rich in all the materials, necessary to the healthful apart and feet from the wires one inch materials necessary to the healthful apart, one foot from the ground; another three at three feet ten inches from 6. As a special preparation for wheat and corn crops. On this point Dr. Voeleker says: "All who are practically acquainted with the subject must have seen that feet high. Then take other laths, pickthe best crops of wheat are produced et one end, and chamfer the other like a the top wires; then shove the chamferd edge down beside the top of the very best manure, is a good crop of clover. * * * * A vast amount of mineral manure is brought within reach of the company to the top wires; then shove the chamferd edge down beside the top of the bottom lath, lapping under wires two inches. This makes a cheap, durable, within reach of the company to the top wires; then shove the chamferd edge down beside the top of the bottom lath, lapping under wires two inches. This makes a cheap, durable, within reach of the chamferd edge down beside the top of the bottom lath, lapping under wires two inches. This makes a cheap, durable, amount of mineral manure is brought pretty fence, that is seven fact and the chamferd edge down beside the top of the bottom lath, lapping under wires two inches. within reach of the corn crop, which otherwise would remain in a lock-up should be left somewhat slack, as interweaving the laths will take it up. J. W. Lang, in the Poultry World.

The current borer has been known for many years, but it does not ammonia. In reality the growing of seem to increase in numbers. It does clover is equivalent to a great extent to manuring with Peruvian guano; and in this paper of mine I show that you obtain a large result in the state of the state ens will soon clear an asparagus bed of FIRST GRAND CASH PREMIUM the much dreaded asparagus beetle.

GRAY PUDDING .- Take three eggs, weigh them in the shell; take an equal weight of sugar and of butter, and 2-3 of the weight of flour. Half melt the butter and beat it to a cream; beat the eggs also, and mix them with the butter and sugar, beating the whole to a froth; then add the flour and the rind of a lemon grated; beat all together.

ALCOHOL IN MEDICAL PRACTICE.

From the Methodist. It is time that plain words were spoken

avstem has an advantage to bringing great evils under which humanity sufthe roots near the surface, is nothing fers. The soothing of a patient is so near the labor to dig, and will stand a large a part of medical practice that rought equally as well.

I would discard all stable manure to prescribe whatever is available for the procedure of anaesthesia. Of late, al. grow a potato of good quality and avoid the rot. The fertilizers should all be minerals, for if the soil is of fair quality there will be enough humus in the soil for necessary and accomthe soil for potatoes. On our soil PLAS paniment of disease, and gives to the ment. We do not doubt that in some diseases, alcoholic stimulant can be (Successor to STANTON & MOORE,) made useful-especially when failing nature needs a brief yet powerful sup-

The Peerless is affected a good deal by the soil on which it is planted. On a high, dry soil the quality is good, while on the wet soils very poor. For two years with me it has no superior as a yielder of fine handsome tubers.

Of tissue; what, therefore, can be its use in consumption, we have always been at a loss to perceive. The experience of intemperate men has proved that it promotes the degeneration of tissue, and consequent bodily decay.

IN THE "HOLLOW."

FIGURE 1. THE "HOLLOW." It would seem, therefore, to our unprofessional judgment, to be the very remwith a cultivator, but what earthing is done should all be done at once and afterwards all weeds pulled out by land. In low fevers it may render a certain service. But the habit of plying convalescents with alcohol as a ton-

THE GREATEST DISCOVERY

OF THE AGE!

the complaint.

Ayer's Sarsaparilla

Is widely known as one of the most effectual remedies ever discovered for cleansing the system and purifying the blood. It has stood the test of years, with a constantly growing reputation, based on its intrinsic virtues, and sustained by its remarkable cures. So mild as to be safe and beneficial tel. ildren, and yet so searching as to effectually purge out the great corruptions of the blood, such as the scrofulous and syphillite contamination. Impurities, or diseases that have lurked in the system for years, soon yield to this powerful antidete and disappear. Hence its wonderful cures, namy of which are publicly known, of Scrofula, and all scrofulous diseases, Ulders, Fruptions, and eruptive disorders of the skin, Tumors, Blotches, Bolls, Pimples, Pustules, Sores, St. Anthony's Fire, Rose or Erysipelas, Tetter, Salt Rheum, Scald Head, Ringworm, and internal Ulcerations of the Uterus, Stomach, and Liver. It also cures other complaints, to which it would not seem especially adapted, such as Dropsy. Dyspepsin, Fits, Neuralgin, Heart Disease, Fennalo Weakness, Debility, and Lencorrhera, when they are manifestations of the scrofulous poisons.

It is an excellent restorer of health and strength in the Spring. By renewing the appetite and vigor of the digestive organs, it dissipates the depression and listless languor of the season. Even when no disorder appears, people feel better, and live longer, for cleansing the blood. The system moves on with renewed vigor and a new lease of life.

broken down and low-pirited horses, by strengthening and cleaning the stomach and intestines. It is a sure preventive of all diseases incident to this animal, such as LUNG

gives them an appetite, loosens their hide, and make them thrive much faster.

In all diseases of Swine, such as Coughs, Ulers in the Lungs, Liver, &c., this article acts as a specific. By putting from one-half a paper to a paper in a barrel of swill the above diseases will be radicated or entirely prevented. If given in time, a certain preventive and cure for the Hog Cholera.

PAVID E. FOUTZ, Proprietor, BALTIMORE. Md. For sale by Druggists and Storekeepers throughouthe United States, Canadas and South America. Nov 23, 1872-1y

which is due to merit alone. We can assure our old patrons that it is kent fully up to its high standard: and it is the only reliable and perfected preparation for restoring GRAY on FADED HAIR to its youthful color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourished the hair-glands. By its use, the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most eco-nomical HAIR DRESSING ever used, nomical HAIR DRESSING ever used, as it requires fewer applications, and gives the hair a splendid, glossy appearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the BEST PREPA-BATION for its intended purposes."

Sold by all Druggists, and Dealers in Medicines. Price One Dollar. Buckingham's Dye. FOR THE WHISKERS.

As our Renewer in many cases requires too long a time, and too ch care, to restore gray or faded Whiskers, we have prepared this dye, in one preparation; which will quickly and effectually accomplish this result. It is easily applied, and produces a color which will neither rub nor wash off. Sold by all Druggists. Price Fifty Cents. Manufactured by R. P. HALL, & CO., NASHUA, N.H. Jane 22, 1872-Iy

DR. CROOK'S WINE OF TAR! Ten Yenrs of a public feath as proved Dr. Crook's Wincoffar to have more merit than any similar preparation ever offered to the public.
