

BUTTER.

From the Report of the committee on Dairy Products...

Nothing has yet been discovered that adds anything to the natural flavor of butter...

Of what does one hundred pounds of butter consist? It will tell you a I understand it.

Take seventy-eight pounds of pure oil of milk (butyric acid) put it in a vessel, a common cheese-but...

Therefore, about seventy-eight pounds of oil of milk and twenty-two of oxygen will make one hundred pounds of the best butter that has yet been made.

While our June butter has from fifteen to nineteen per cent of oxygen in it, winter has only from five to twelve per cent.

How can we always have good butter? First, healthy cows, cream taken from the milk within twenty-four hours after milking...

Now I think, yes, a very important discovery in relation to milk, viz: That the butyric acid or oil of milk, from which our butter is made, never was and never can be made or turned into cheese...

Suppose we have a horse with his hind leg broken six inches above the fetlock. The first thing to do is make for him a firm, narrow stall, not much wider than is absolutely necessary...

Now having attended to the preliminaries we are ready to set the limb. See, first of all, that the leg is well cleared off the ground, making sufficient allowance...

Now take caution-flannel with a good nap, and wide enough to cover the entire bandage, cut it into the shape as will accurately fit around the leg...

There is nothing in the whole mineral, vegetable or animal kingdom, that man can take into his stomach, that is so well calculated to promote health as good new milk, good butter and good cheese.

Our physicians order barrels of cod-liver oil from a lower order of animal for their patients. Now, I am firmly convinced that a low order of animal, or cream, better still, the oil of milk is far superior.

Let the most confirmed dyspeptic take for supper stale bread well buttered, a small piece of cheese (butter and cheese made, as it should be, within twelve hours after milking)...

Col. Waring tells, in one of his "Oden Farm Papers," what he saw in England of farm-life.

entirely too fanciful and luxurious for a plain farmer. The meaning of this is that these men of character...

I am well aware that many American farmers, and perhaps some of my own readers, will exclaim, "Vanity of vanities, all is vanity..."

Another thing that struck me in England, and which indicated an encouraging frame of mind on the part of English farmers...

How to Set a Horse's Broken Leg. Suppose we have a horse with his hind leg broken six inches above the fetlock.

Now take caution-flannel with a good nap, and wide enough to cover the entire bandage, cut it into the shape as will accurately fit around the leg...

Col. Waring tells, in one of his "Oden Farm Papers," what he saw in England of farm-life.

One principal effect on my mind of what I saw in England was a reinforcement of my belief that it rests with farmers themselves to determine whether they shall take as good a position, socially, financially, and personally, as men of other professions.

Let the most confirmed dyspeptic take for supper stale bread well buttered, a small piece of cheese (butter and cheese made, as it should be, within twelve hours after milking)...
