BY ALEXANDER HYDE. despised and much undervalued outer they are not hardy when young. She coating of wheat and other grains, which millers so carefully separate from the inner floor and foirer portions. the inner, finer, and fairer portions - from this statement what may be done Bran has a coarse, dark look, but, like a singed cat, it is better than it looks. It has long been condemned to humble uses, and we do not expect that the uses, and we do not expect that the business is one in which females may engage with success. The time predjudice against it on account of its occupied in caring for sixty to a huncolor and coarseness can easily be dred hens doesn't average more than an uprooted. Dr. Graham made a stren- hour or two a day. The exercise is uous effort, forty years since, to induce light and pleasant, and the change from the people to eat unbolted flour, and proved conclusively that in this form otherwise. Indeed, we consider the it was not only more healthy but more poultry business as an occupation, both nutritious; still nine persons out of ten prefer snow-white bread. Among the thinking and intelligent, Graham bread is slowly gaining a position, but it is rarely found on the tables of the lower profit, is calculated to please every lover

The nutritive value of all food depends much upon the amount of gluten which it contains, as this is the substance which goes to form muscle. The proportions of gluten in whole grain, bran, and fine flour are as follows:the just profits of the farmer.

Wheat bran may not put as much fat slops, dead animals, &c., &c. ting them. Bran furnishes just the turned over and more water added. any expense to the farmer.

bran one-third, or one-half corn-meal. take it up. In the Winter we should recommend mixing meal with the bran for a regular diet, as the highly carbonaceous character of meal tends to furnish per such high feeding.

or inorganic matter. Johnston's analy- With this arrangement, if you wash the sis of wheat-bran gives 7.3 per cent of saline matter, while corn-meal will bardly average one per cent. The oil healthy bed. Now, if you leave the use as a fertilizer. It is simply carbon, a substance abundant in most soils, and in the form of carbonic acid, constituted as the form of carbonic acid, co in the form of carbonic acid, constitu- greatly to the sweetness of your rest in ting 1-2,500 part of the weight of the consequence, and to the tone of your use grain in the cultivation of tobacco, we say by all means sourced. we say by all means save the meal, and Only those who have attended to this use wheat shorts, and we should recommend feeding both these articles to once on the general health and spirits. stock, and then using the manure in preference to applying either meal or bran directly to the soil.

favor of bran. In the monthly report of Mr. Watts, for January of this year, fore, of importance for the breeder to James M. Crafts, of Franklin County,
Mass.: "A member of our Club raised
an acre of tobacco with shorts as a fertilizer, and the crop was a good one, ed States, whole yards have been deestimated at 1,800 pounds. On another piece he tried Indian meal, at the same rate, with not nearly as good results. rate, with not nearly as good results. On four acres he used 800 pounds

A YOUNG LADY'S EXPERIENCE.

during the past year, had the care of his poultry-yard. In the Spring she commenced with about sixty fowls, of the common breeds, including one carly stage of the disease, every three Dominique rooster and several hens of that stock. She also had two roosters of the Partridge Cochin breed. From these she raised 350 chickens. When

young she fed on cracked corn, but when futtening them, gave whole corn and Indian meal. During the season she sold eggs to the amount of \$90, and from Sept. 20 to Jan. 17, she got ready for market 150 pairs of chickens, which We want to say a word for the much she sold for \$260. She thinks the Dom-inique much the best for market, but household duties rather agreeable than profitable and interesting. Gathering eggs, setting the hens, watching the hatching and tending to the young has profit, is calculated to please every lover of nature's great working world.

MAKING MANURE.

This work is always in order and you cannot be too assiduous or diligent Whole grain, 12 per cent.; bran, 14 per in accomplishing it. On every farm, cent; fine flour, 10 per cent. By sifting or within easy reach, and at the proper out the bran we, therefore, render the season readily handled, there is a great flour less nutritious as well as less amount of material often wasted, and wholesome. As bran constitutes from one-eighth to one-fourth of the whole weight of wheat, on the average onesixth, there is a great waste of muscle-forming material by bolting. True, it may go for the nourishment of inferior animals, but it sells for less price, does less good, and thus is a drawback on or barnyard manure. After this it may be put down as an axiom that every As compensation for this loss in the sale of his wheat and flour, the farmer whether of animal or vegetable origin. should use all his bran in feeding his To enumerate them would be tedious, stock, and if he purchases the bran of but we instance leaves, pine shatters his neighbors, those who live in Illinois, swamp muck, peat, weeds and briers or California, or any other country from the fence corners, marsh and river where manure is a huisance, both his mud, road scraping, old sods, waste stock and his farm will be benefited. from the house, ashes from the kitchen,

on cattle as does corn-meal, as it does not contain so much starch and oil, but kindred substances is to have prepared it will produce more muscle and more in the barn-yard a hollow, somewhat We have seen that it contains dished in shape, and mix in alternate more gluten (muscle material) than fine layers manure from the stables and flour, and if we burn any given weight of bran and fine meal, we shall find that the amount of ash (bone mateered together on or near the premises. rial) is at least six times as much in the former as in the latter. As it is this inorganic matter which is so much in accumulating materials. If the needed on our old soils, farmers can in no more economical way renovate their occasionally they can be wet with liquid old lands than by feeding bran heavily manure, or even with water, the ferto their stock. We know some farmers mentation will be more rapid. If, as in Massachusetts who feed to their the piles are built up as described, a cows, both Summer and Winter, from good sprinkling of plaster be added to four to eight quarts of bran daily, and each layer, its effect will be to save get great returns not only in the in-creased flow of milk, but in improved might otherwise be wasted. The ferpastures and meadows. We have look- mentation or decomposition must not ed over the pastures of some of these bran-feeding farmers, and are satisfied that there is no better mode of renova-stage is approached the piles should be

compensation that the pastures need, Where the liquid manure, or uring for the phosphates and sulphates of from the stables, cannot be saved in its lime, potash, and soda, which have been natural condition, provision should be removed from them in the from of milk made by which, by suitable absorbents, and bones. By feeding it during the Summer to cows, they scatter it in their If the stalls are so constructed that it excrements over the pastures without can be led off into pits or reservoirs it is then conveniently handled, but other-If the cows are found to lose flesh wise straw, leaves, pine shatters, muck, (fat) under a bran diet, mix with the or saw-dust are found convenient to

NOTHING LIKE STRAW.

Dr. Dio Lewis writes: "Of the warmth to the animal. Fed alone, and in large quantity, meal produces too drinks in a day, it is thought that not inflammatory a condition, tends to gar- less than five pounds leave his body get and other inflammatory diseases, through the skin. And of these five and runs the cow through life to fast. pounds a considerable percentage es Bran acts as an antidote to this inflam- capes during the night while he is in matory tendency in meal, and while bed. The larger part of this is water, stimulating a great flow of milk, keeps the animal in good health, and prolongs her usefulness to a good old age. If oil-cake, or cotton-seed meal is fed to young cattle or milch cows, there is followed. Thus all parts of the bed—mattress, blankets, as well as still greater necessity for mixing some bran with their feed, as these sub-stances furnish carbon in a more con-quite as much as the sheets. To allow centrated form than does meal, and the sheets to be used without washing consequently act on the animal much or changing three or six months would as abundance of coal and a strong draft be regarded as bad housekeeping; but do on a furnace-they burn it up quick- I must insist if a thin sheet can absorb ly. A cow driven to the top of her speed, poisonous exerctions of the body to with oil-cake, cotton-seed meal, or even corn meal, cannot be expected to last many years. Roots or bran must tem-thousand times as much of these poisonous secretions, needs to be purified We notice that some of our tobacco-growers are experimenting with corn-months. A sheet can be washed. A meal as a mannre for the weed, and re- mattress cannot be renovated in this port good success. It seems like a way. Indeed, there is no other way of waste to convert grain into tobacco, but, if it must be done, we advise the tobacco growers to use bran instead of meal. Tobacco is a great exhauster of the inorganic constituents of the soil.

It is my first to the meat way to accord to the soil. It is manifest to the most careless ob- ordinary mattresses, I am decidedly of server that tobacco, when burned, fur- the opinion that the good old-fashioned nishes a large amount of ash. We see straw bed, which can every three this every time we notice a man with a cigar or pipe in his mouth. This ash must come from the soil. It is of the and healthiest of beds. If in the Winearth, earthy. That which passed off ter season the porousness of the straw into the air in the form of smoke and bed makes it a little uncomfortable vapor, may come from the air again, spread over it a comforter or two of but the ash has no ethereal origin .- | woolen blankets, which should be wash-Now bran abounds in this same earthy, ed as often as every two weeks .-

CHICKEN CHOLERA.—The symptoms of this desease, which has during the Not many experiments have been last few years become quite prevalent tried in the use of meal or bran as fertilizers, but those that have been tried, months, are by no means uniform, and so far as we could learn, have resulted in in several instances do not present a we find the following statement from thoroughly understand the symptoms shorts and 100 to 150 pounds of super-phosphate. This gave him the best tobacco he ever grew."

attacked by enoisers the bit is seized with a sudden and violent thirst, acces-sion of thirst accompanied with diar-rhora; at first the droppings are of a greenish character, and by degrees beattacked by cholera the bird is seized come thin and whitish, much resembling similar discharges in the human The Delaware County (Penn.) subject. FOUTZ'S

This preparation, long and favorably known, will thoroughly re-invigorate broken down and low-spirited horses by strengthening and cleaning the stomach and intestines.

To keepers of Cows this preparation is invaluable. It is a sure preventire against Rinderpest, Hollow
Horn, etc. It has been poven by
actual experiment to increase the
quantity of milk and cream twell
per cent. and make the butter firm
and sweet. In fattening rattle, it
gives them an appetite, loosens their hide, and makes
them thrive much faster.

In all diseases of Swine, such as Coughs, Ulcers in the Lungs. Liver, &c., this article acts as a specific. By patting from one-half a paper to a paper in a barrel of swill the above diseases will be endicated or entirely prevented. If given in time, a certain preventive and cure for the Hog Cholera. PAVID E. FOUTZ, Proprietor,

BALTIMORE, Md.

FOUTZ'S

MEDICINAL

Vegetable Life Invigorator, Health Restorative,

composed of simple vegetable extracts; it contains nothing delectrious to any constitution, however delicate, its functions being to substitute strength for weakness, which it never fails to do. It has a most delightful, desirable and novel effect upon the nervous system, and is good for Fenniers, old or young.

As a simple appetizer it will replace with advantage any littric in the market, its use being perfectly safe, and its taste pleasant.

and its taste pleasant.

It is the best anti-Dyspeptic extant, and will cure
DVSPEISIA, LIVER COMPLAINT, GRNERAL DEBILLTY, DEPRESSION OF SPIRITS, LOSS OF APPETITE AND VITAL ENERGY, HEART DISEASE,
NERVOYS GRRITABILITY, DISEASE OF KIDNEYS
AND BLADDER, RHEUMATISM AND GOUT, and
Furifice the Blood. Purifies the Blood.

The Invigorator, by its harmless and exhibitating effects, makes life pleasant, by substituting the cheerfulness consequent upon vigor and health to the morbidingness of a shattered constitution, a disassed Liver Spleen. It will strengthen all who are in any way prostrated It will strengthen all who are in any way pressesses by nervous debility.

The feeble, the languist, the old and the young, all should give Fortz's Life Invitorators a trial. It will give relief in Dyspessia with the first dose. A brief persistence in its use will removate the stomach to a degree of perfect health.

A sure preventive of the weakness and diseases of women, and a positive corrector of the same. Ladies, send stamp for circular giving testimony of what it has done for vour exy.

DAVID E. FOUTZ, Sept 20, 1813-1y BALTIMORE, MD. Sold by DR. H. H. MITCHELL, ELETON, MD.

THE GREAT REMEDY FOR

which can be cured by a timely resort to this standard preparation, as has been proved by the hundreds of testimonials received by the proprietors. It is acknowledged by many prominent physicians to be the most reliable preparation ever introduced for the relief and cure of all Lung complaints, and is offered to the public, sanctioned by the experience of over forty years. When resorted to in season it seldom fails to effect a speedy cure in the most severe cases of Coughs, Bronchitis, Croup, Whooping Cough, Influenza, Asthma, Colds, Sore Throat, Pains or Soreness in the Chest and Side, Liver Complaint, Bleeding at the Lungs, &c. Wistar's Balsam does not dry up a Cough, and leave the cause behind, as is the case with most preparations, but it loosens and cleanses the lungs, and allays irritation, thus removing the cause of the complaint.
