We never heard before that starvation would produce hydrophobia-hunger is very maddening though.

Mild Winter .- The present Winter promises to be as remarkable for mildness and Spring-like weather, oz last, and several preceding Winters were for the intense severity of their cold. . The ice man are beginning to cast gloomy looks at the murky skies and cousider their chances for reaping a harvest of crystals from pond and river as among the very doubtful by ballot. things. The cold snap of last week formed ice on Westamwell dam two or three inchas thick and some who procure ice from that place commenced securing their Summer's supply, but the warm sun and south wind dissolved in a day, the thin shell which had hardened over the pond.

Temperance in the Churches.-It is in cont emplation to organize a vigorous and conco. "ted movement in the cause of temperance among the christian congregations, and ther eby bring to bear upon the Legislature a m. oral support, or encouragement from a quart,'r that can not be charged as partisan, while at the same time the movement will be felt as an influence that will have power sufficient to secure members of the Legislature against the grog political power, so dreaded by political aspirants, in the absence of any counter weight exerted by a public sentiment above the low level of the rum interest. The direct object of this movement is to procure a change in the disgraceful license system of Maryland, by which the public will acquire some con trol in the matter of license issuing. It is estimated that the real estate of Elkton alone has, within the last decade been depreciated at least 25 per cent by the unlicense license allowed to the sale of spirituous liquors. The multiplication of greg shops where no shadow of demand requires public houses to be opened, becomes more and more every day a question of political economy, as well as mora; a and good neighborhood. Rum is driving out the best population of Elkton and diminishing the value of property; and the same influence is felt in every part of the State. The license laws of Maryland bind the hands of the order-loving people and are a disgrace, as well as an injury to the commonwealth. Maryland we believe has one of the loosest grog license systems of any

Ducking Under Favorable Circumstances.-On Thursday morning John E. Wilson, Esq., saw two wild ducks in "Howard's ice pond," opposite his house, where they were quietly feeding. Getting his gun he started in pursuit at once, and getting the bank between him and the ducks, succeeded in getting in range of them and bringing one down with each barrel. They proved to be bull heads-the snow white with a tuft of green on the

> Trunk Robbed .- Miss Joe Black, of Charlestown, had her trunk broken open and robbed a few days before Christmas, somewhere between Baltimore and North East. The trunk was not delivered at the Charlestown station where she left the cars, and did not turn up for four days after. After repeated inquiries and telegraphings it was found at North East, on the Tuesday after Christmas, broken open, the lock bearing marks of having been blown open by powder, and the whole trunk presenting the appearance of having been roughly handled. None of the clothing had been taken, but a card box containing several articles of jewelry had been rifled. Mr. Black reported the affair to the President of the P., W. & B. Railroad Company.
