men's Association, is furnishing the top. 'If timothy is meant (which we "American Farmer" a series of articles on the above subject.

The system of co-operative or associated dairying was practically developed in Central New York some twenty years ago, though like most other new inventions, this is now claimed for some former period: At whatever period, or in whatever country, the idea may have first been conceived, it remained for Jesse Williams, a practical farmer of Oncida County, N. Y., to put it into successful operation. He was skilled in cheese making, and his product invariably commanded a better price than his son's or his neighbor's. Instead of attempting to inveigle the middlemen and the community better than the property of the middlemen and the community beautiful point in point perpenditude of the property of and the consumers into purchasing the inferior goods, in the sale of which he had become interested, upon the repu- our estimate of profit the interest on tation acquired for his own, as hundreds their cost rarely enters into the calculaand thousands of others have done to tion as a charge upon the receipts; yet he determined to bring it all up to his the complaint is general that our farmown standard of excellence. To handle the milk of two or three large dairies, be something in our want of managein as many different dairy houses, was his primary intention; but the idea of ods followed by some English farmers hauling it from the different farms to ods followed by some English farmers one central place of manufacture, forced itself upon his attention, and was final-prize of \$200 offered by the English ly adopted. The very large additional quantity of milk thus thrown upon his hands, necessitated a remodeling of his buildings and apparatus; but Mr. Williams was equal to the occasion, and occupied by Mr. W. G. Walgate, of Office—On Main street, opposite National Bank, Eleton, Md. [jan 4, 1862—16.] his experiment, from the first, proved a 460 acres, of which 120 are in grass. great success, even far exceeding his His rotation is one of five years, viz.: most sanguine expectations.

Of all classes, farmers are, as a rule most conservative. They always look with disfavor upon any innovations upon the established routine. But such was Jesse Williams' character and reputation, that while his neighbors commiserated his folly in branching out so freely in the new business, they maintained a respectful demeanor and watched the result of his experiment with the keenest interest. Success is a tremendous stimulant, not only to the successful party, but to the lookers-on, however incredulous they may have been to begin with. The skeptic of yesterday is convinced to-day, to-morrow becomes al least a quasi disciple, and the next day sets up for himself in opposition. In all the history of industries, we fail to find another which has had so large, so rapid, and withal so healthful a growth as that of Co-operative Dairying. The data at command are not entirely trustworthy, but there cannot be any doubt but that there are over 3.-000 factories for making cheese, butter or condensed milk, in the United States; and the system has reached very considerable proportions in Canada, in Great Britain, and on the continent of

But timid men began years ago to fear that the business will be overdone, and that reaction will follow. In answer to this, we need only to remind them that this wonderful growth is not one system of manipulation of a raw product, to another—that this wonder-ful development, of which we were just now inclined to boast, is after all more another than the fields. The report says a more charming garden, tidier fields, better roads, and more personal than a first famous was an increase. apparent than real. During the period feet fences were never seen. The other since the inauguration of the co-opera-tive system, the increase in population in our own country has been more rap-id than that of the comments at id than that of the cows, while the means and inclination of the non-producing classes to consume larger quantities of all kinds of dairy products, have increased even more rapidly. Accouraging reason for assuming that we have nothing to fear on the score of over production, and that is in the increased demand for a higher grade of goods, which the co-operative system in any respect, it specks for it goods, which the co-operative system short in any respect; it speaks for it-has largely stimulated. It is a well-self. There is nothing here impossible has largely stimulated. It is a well-established fact, that the per capita consumption of dairy products is on the increase, and fully keeps pace with the improvements in the quality of the goods thrown upon the general market. The popular motto is, "get the best;" and in no other department of product. and in no other department of produc-tion is there so much inducement to make only the very first quality goods. No process has ever been discovered by which a second or third quality of butter can be produced at a less cost uhan the first, and the same is practically true of cheese-making, though there are some apparent exceptions in grow it at home or go without it, a some cases, where the milk is worked habit of the Yankee farmer, a rut of for both butter and cheese. If further the old fogyism which hates to adopt evidence is needed to sustain the position that there is as yet no apparent I modestly venture the opinion that not reason for fearing an excessive production, we have it in the present condition of the markets. Prices have been well sustained thorought the season just closing, notwithstanding the financial panic and the consequent disorganization of society in the manufacturing centers. It is believed, moreover,

Manifestly, then, we may, without prejudice to any interest, urge upon farmers favorably situated the cultivation and expansion of the dairy interest. Dairy farming, relieved of much of its drudgery and uncertainty by the co-operative system of working up the product, is adapted to a much range of country then has been believed in the Large sections of the older States, which have become practically exhausted of some of the elements necessary to the successful prosecution of former methods of tillage, may by the recuperative influence of dairy farming. be made to cheer the heart and swell the purse of the owner, as in the olden time of virgin fertility.

as at the present time.

Feeding Hens, Watering Cows, &c.

A subscriber, Dexter, Me., desires answers to the following questions through "The Weekly Times: 1. Will hens lay better by giving them warm milk and dish-water, or no milk nor dish-water, but fresh cold or

warm water? watering twice a day, or only once a

3. How much difference is there be- the Fall. Turn it which way we will, tween clover hay and herd's grass for our corn-growing is a mistake, and a food for cows?

REPLIES .- Milk is excellent food for fowls, The cascine, or curd, of milk is supposed, with good reason, to become changed to albumen during the digestive process in the stomach of animals. instead of increasing their value as the As eggs consist largely of albumen, food productive of this substance is of purchase of Western corn surely would great value to hens. But it is best to do. "Corn, never—corn fodder, alfeed the milk, not as drink, but mixed ways," say I. with corn-meal or other food to the consistence of thick dough. Dish-water is of no value for fowls, nor any other animal. Pure water for drink is better off their mane and tail, take half a tea-

stirred into it, makes an excellent drink for either cows or horses in the Winter season. Clover hay, if it has been cut when in blossom, is the best hav for cows producing milk. Herd's grass is O. S. Bliss, Secretary Vermont Dairy- a name given to both timothy and red suppose from the locality whence the inquiry comes) that grass is next in value to clover, while red-top (called herds' grass outside of New England) makes light and inferior hay.

ENGLISH PRIZE FARMING.

It is not from English farmers who merely rent their farms that we hear the complaint that their business is not DENTISTRY. derive but a tempoary benefit. At the DR. R. F. TULL, same time we own our lands, and in Royal Agricultural Society, might help to point out the weak spot. The farm JAMES BLACK GROOME,

which was awarded the prize was one (wheat, oats, or barley,) clover, wheat and oats, or peas and beans. The stock consists of 160 heavy long-wool sheep, or as many more as may be needed, to consume the roots; a large number of pigs, many of which are purchased for fattening, and not reared upon the farm; forty bullocks for fattening, and twelve horses. The labor costs \$8 per acre. All the manure made goes to the root crops, with 600 pounds of bone-dust and 400 pounds of superphosphate per acre in addition. The consumption of oil-cake and other purchased feed is immense; the bullocks eating six pounds a day while grazing, with seven pounds of meal per day added when finally fed on turnips; the manure is, therefore, very rich. The wheat is sown in drills nine inches apart, and eight to ten pecks per acre of seed is sown. This crop is horse-hoed, also hand-weeded. The cloverfields are sown with fourteen pounds of

white and seven pounds of red clover-seed per acre, with a little rib-grass (narrow-leafed plantain) mixed. This farm is said to have been evidently under profitable management, and on no other farm was there such an excellent lot of stock in the fields. Mr. Walgate has been a tenant on this farm for twenty-five years, and had built the greater part of the farm buildings himan accretion, but rather a change from self. One of the other farms was ad-

miration was a magnificient wheat-field. Now, in comparing the condition and management of these farms with that of the general run of our farms, there are a few leading points of difference. cording to the census of 1850, there were 3.61 persons to each cow, in 1860 ing of cattle and production of rich there wers 3.66 persons to each cow, and in 1870 there were 4.31 persons to each cow. In the meantime, we have built up a very heavy export trade in butter and cheese and condensed milk. (which takes the place of our corn) and But there is still another and more en- turnips, and a clover crop between the

Farm" papers, for the " American Agriculturist", gives the following reasons against Indian corn as a desirable crop for Eastern farmers: Corn! Indian corn is the Ignis

fatuus of Eastern agriculture; a relie of the days when our ancestors had to within five years anywhere in New England, New Jersey, or Eastern New York that has not cost more than it came to, that has not been grown at a positive loss; and I think it is time for men who call themselves "practical' to cast up the account and realize the fact for themselves. On one side we that the consumption has rarely been have the market value of a bushel of so close upon the heels of production, Western corn and the added extra value of our better article; call it if you please \$1. Nobody pretends that it pays to grow less than fifty bushels per acre, and for all the increase beyond that you must increase the items of labor and manure in proportion, so that it will not pay to grow 100 bushels. Remember that corn is an enormous feeder, and that a full crop can be grown only with an extravagant outlay for manure, and that even the moderate crop which can be grown on rich land without much manure takes from the ground material which would bring much more money if allowed to produce grass. I have never seen a state ment of the cost of producing a crop of corn for a premium in which the loss in fertility was estimated at anything like its fair value for the growth of

grass. Then take the question of labor. Labor is the mill-stone that threatens to pull us under; we can't do this and we can't do that because of the labor it would take and the high wages we must pay; yet we insist on growing a crop that costs more for labor than any warm water?

2. Will cows give more milk by labor that must be applied when we ought to be cutting our early hay in June, or attending to our root crops in grave one. It seduces us into breaking ip grass land we might better keep good by top-dressing; it consumes labor that we need at the same season for more important work, and it eats into our manure heaps like the dry rot

Horses Rubbing Their Tails .- To than cold at this season of the year. cupful of sharp cider vinegar, pour on Cows should be watered at least the spot where the rubbing is done, and twice a day when on dry feed. Little card it while pouring on, and it will be water and often is better than a large found that this simple thing will stop quantity and seldom with all animals. Tepid water, with a handful of bran looks of the tail in the sable. CARDS.

WILMINGTON.

Merchant Tailor, No. 211 MARKET STREET, (UP-STAIRS,)

Nov 8, 1873-1y WILMINGTON, DEL. IMPORTANT NOTICE.

As the long nights are upon us, when more artificial gut is necessary, it behooves all who require a good ILLUMINATING OIL

to examine it carefully and ascertain beyond the post bility of a doubt its perfect safety. It is an establishes fact that four-fifths of the ordinary Coal Od found in the market is quite inflammable and dangerous, frui-ing resulty at ordinary temperatories when brieght in contact with the flame of a light of match. During the Winter the new-papers almost slady record the fact of terrible suffering and death from the taking fire of Coal Oil by the breaking or upsetting of lamps. All danger of such results might be entirely avoided by the use of

PRATT'S ASTRAL OIL, free not only from the danger of explosion, BUT FROM THE DANGER OF THE OH. TAKING FIRE SHOULD THE LAMP BE UPSET OR BROKEN. We can endorse this Cil as EXTRA SAFE,

WITRA SAFE, with the fullet confidence, after an experience of over three years, during which period we have handled upwards of FIFTY-TWO THOUSAND OALLONS, which has been used in thousands of families with grad satisfaction, and from the use of which no accident has occurred, either directly or indirectly.

It is put up in One gallon, Five gallon and Ton gallon packages: each Can is closed with a metal-cap, bearing the manufacturer's stamp. A large stock just received and for sale, wholesale and retail, at the lowest rates, by the Manufacturur's Agents, E. BRINGHURST & CO.,

NEVER Known to FAIL. THOMPSON'S Fover and Ague Powders,

MEDICINAL.

FOR THE PERMANENT CURE OF CHILLS AND FEVER, DUMB AGUE, Or any form of Intermittent Fever

THE GREATEST DISCOVERY OF THE AGE!

upon the constitution as the above, and none more difficult to cure by the usual modes of practice. The FEVER AND AGUR POWDERS will effect a cure in cases of the long at standing as well as prove a preven-tire in the forming stages of the disease. Being purely Vegetable, they act with certainty on the disease, totally cradicating it from the system, and prevent a return at any future period. Why waste your money and health in trying every medicine you hear of, when THOMPSON'S FEVER and AGUE POWDERS have never failed to cure the CHILLS

Reasons why they Only should be

Used. THEIR REPUTATION IS ESTABLISHED.-Theu ands of testimonials have been received, showing that these POWDERS have performed miracles in curing mes of long standing, many of them considered here

THERE IS NO RISK IN TAKING THEM. They contain nothing injurious, and, therefore, conse none of the lingering diseases so often the result of the many nestrums of the day. Physicians recommend them as superior to Quinine or any other known remedy, for they leave the system in a healthy state, and the patient beyond the probability of a relapse.

BEWARE OF COUNTERFEITS .-- The gennine put up in square tin loxes, with THOMPSON'S FEVER and AGUE POWDERS stamped on the lid, and the signature of Thompson & Crawford on the wrapper. Me

MEDICINAL.

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the na-tive herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the uso are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of Vinegar Bitters?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of Vinegar Bitters in healing the sick of every disease man is heir to. They are a gentle Purgative as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs in Bilious Diseases

The properties of Dr. Walker's Vinegar Bitters are Aperient, Diaphoretic, Carminative, Nutritious, Laxative, Diuretic, Sedative, Counter-Irritant Sudorific, Alterative, and Anti-Bilious.

Billions, Remittent and Intermittent Fevers, which are so preva-lent in the valleys of our great rivers throughout the United States, es, ecially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkan-sas, Red. Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savannah, Ro-port, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during searons of unusual heat and dryness, are invariably accompanied by extensive de-rangements of the stomach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There, is no cathartic for the purpose equal to Dr. J. Walken's Vinegar Bitters, as they will speedily remove the dark-colored viscld matter with which the bowels are loaded, at the same time stimulating the secretions of the liver,

and generally restoring the healthy functions of the digestive organs.

Fer fify the body against disease by purifying all its fluids with VINEGAR BITTIES. No epidemic can take hold of a system thus fore-armed.

Dystansia or Indigestion, Head-ache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Tasto in the Mouth, Bilions Attacks, Palpitatation of the Heart, Inflammation of the Lungs, Pain in the region of the Kid neys, and a hundred other painful symp-toms, are the offsprings of Dyspepsia. One battle will prove a better guarantee

Ment.

Scrofula, or King's Evil, White Swellings, Ulcers, Erysipelas, Swelled Neck, Gottre, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, etc. In these, as in all other constitutional Discases, Walking's Vineran Bitters have shown their great curative powers in the most obstinate and intractable cases.

For Inflammatory and Chronic Rhenmatism, Gont, Billious, Remit-

the Blood, Liver, Kidneys and Bladder these Bitters have no equal. Such Diseases are caused by Vitiated Blood. Mechanical Diseases. - Persons en-

Rheumatism, Gout. Bilious, Remittent and Intermittent Fevers, Diseases of

Mechanical Diseases,—Persons engaged in Paints and Minerals, such as Plumbers, Typessetters, Gold-heaters, and Miners, as they advance in life, are subject to paralysis of the Howels. To guard against this, take a dose of Walker's Vixeoar Bitters occasionally.

For Skin Diseases, Eruptions, Tetter, Salt-Rheum, Elotches, Spots, Pimples, Pustules, Boils, Carbuncles, Ring-worms, Scald-head, Sore Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters.

of these Bitters.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermitages, no anthelminities will free the system from worms like these Bitters.

For Female Complaints, in young gold merical or single, at the dawn of worse.

For Female Complaints, in young or old, married or single, at the dawn of womanhood, or the turn of life, these Tonic Bitters display so decided an influence that improvement is soon perceptible.

Cleanse the Vittated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.
