ELKTON, MARCH 14, 1874.

Our neighbor, The Democrat, has had a serious experience in deciding which side of the women temperance movement to espouse. He feels carefully round on both sides of the fence to determine whether the ground is yielding, but seems still undecided. The amount of travail and penance in sight of the rum ring has been great on the part of our neighbor for the little faur pas made in assisting the Elkton the whisky ring who own the Democracy of ashamed of the past.

The logic of the last article in The Demecrat on that subject is the most puzzling of any of its class, to determine what that great authority on morals, religion and tippling is driving at. The farthingales, meaning the praying ladies, are "gone for" savagely, and the forbearance and chivalry of the bar-room keepers are extoled to the clouds, if not to the skies, for not making the gutters run with the blood of these praying mobs in petticoats, who use such violence to shut up the grog shops as praying and singing in the barrooms if the proprietors will permit them, if not, in the street within hearing.

'This question is a moral and religious question. As such it must be treated," remarks The Democrat. That appears to be the opinion of the ladies, too, for they do nothing but pray and implore. "Our blessed Lord was accused of keeping company with publicans and wine bibbers,' quoth The Democrat. His accusers were the Pharisecs, Jewish Priests and other high diguitaries. It is fair to presume that "our blessed Lord" prayed with the "publicans and wine bibbers," and the women appear to be copying His example, alteration? while The Democrat cries out like its prototypes of old that this praying with "wine bibbers" is stirring up sedition. History seems to be repeating itself .-While the women following Christ's example are praying with the publicans, The Democrat follows that of the High Priests and Pharisees and accuses them of mob law and inciting the people to violence. Paul's advice to Timothy is quoted, too

Paul was eminent as a theologian, but it is evident he was not much of a doctor, for the Timothys which have been using his prescription for fifteen or sixteen hundred years might be numbered by the tens of thousands and yet never one of them has been cured. It is astonishing how many Timothys we have afflicted with pains in their stomachs and many other infirmites, who are constantly trying Paul's prescription, but they continue to grow worse, and not one of them gets well, or even better.

tention, and are generally admitted to be instance, and this may be the reason why instance, and this may be the reason why the "farthingales" are endeavoring to break up such "shops," and The Democrat ought rather to commend them for their good work. GOVERNOR GROOME.

The Bultimorean has out done all its likeness and an elaborate sketch of the albeit is strikingly unlike his Excellency, but the biography is complete and exhaustth sides three generations. That part of the biography which will most interest, perhaps amuse the Governor's Elkton friends relates to the passions, and is couched in the following delicate language:

the past taken a Governor. But those who had closely observed the courteous and restrained manner which is usual with the young Governor when in the society of members of the gentler sex, and his fond though sad ways with children, are not disposed to impute his bachelonhood to him sex fault, but we inclined to believe there. as a fault, but are inclined to believe that extra gun of this make which we would as a fault, our are inclined to believe that soll on very reasonable terms. Or send for vista of his past life, his path crossed that catalogue giving styles and prices, to Parof some lovely woman, who could if she would, let all know the reason why he has never taken his place among the benedicts. This may be mere fancy, but if Governor Groome remains much longer unmarried, there will be few among his many friends, who will not receive it as the most plausible explanation of his bachelorhood."

Leave was granted Mr. Earle by the Senate, to introduce a bill for the improvement and renovation of the tobacco region of the State. This seem necessarily to be a curious bill. How to improve and renovate worn out or worked out land except by manuring it has not yet been discovered. Does Mr. Earle propose to purchase manure on railroads. for those lands by a bill to take money out of the State treasury for that purpose?

The House has passed an important bill to regulate Building Societies. A bill has been reported in the Senate increasing the salary of the Judges of the Orphans' Court to \$10 a day. ANNUAL STATEMENT

RECEIPTS AND DISBURSEMENTS

Board of School Commissioners of Cecil County. FOR THE YEAR 1872-3.

The School Commissioners of Cecil county would report that the schools of our county have been kept open during nine months of the past year. As regards their efficient working, they have not declined; on the contrary, we think that they have advanced in this respect. Several new School Districts have been created, by the division of old ones, in order more felly to meet the wants of the pupils. Such is now the condition of the various School Districts, that there will be no necessity for much change in the future.

The teachers of the Schools seem to be carnest and diligent in their work; and by means of Teachers' Associations, and a free interchange of views in reference to their work, are qualifying themselves for a more thorough discharge of their duties. We think the Institute held under a good influence over the teachers in glying a fresh impulse to their minds, and by giving more enlightened views of their duties and responsibilities.

We have built, during the year, four new school houses, and greatly altered and repaired several others; so that with a few more new houses the whole county will be supplied. It should be stated that all the houses are built in the best manner, after a careful examination of various plans, and in accordance with the wants of the districts in which they are built. It will be seen by the Annual Report, that the Colored Schools of the county are placed upon the same footing with the others in all respects. They are well conducted; the School Board insisting that the teachers of these schools shall be fully connectent for their work.

The present School law is working well, and do ng an efficient work in our county for the education of the young, and qualifying them for the active duties of life.

RAW BONE.

To the Experimental Farm Club, West Grove, Pa.

GENTLEMEN: -I herewith submit you a report upon the fertilizers sent to me by J. Carter, as ordered by you:

No. 1. Waring's Pure Ground Bone.

This is exactly what it purports to be, and is entirely free from adulteration. It con-Bone Phosphate of Lime, . . 45.78: 20.97 P. 2: O. 5. Organic and Volatile Matter, . . 37.91, and 3.28} Nitro. Carbonate of Lime, . . .

> 100 S. P. SHARPLESS, State Assayer.

The Bone for the above analysis was forwarded by the Superintendent of the Eastern Experimental Farm, without our knowledge, and was taken from a shipment in the ordinary course of business to another party. The most satisfactory guarantee of the purity of our Ground

Bone, is that our mill is open at all times to the thorough inspection of our customers.

Some farmers have thought it necessary to purchase other fertilizers, fearing that Ground Bone is too slow in its action. The general experience of our customers, however, seems to show that when ground as fine as ours is prepared, it acts with satisfactory promptness. The following letter from a well known and reliable citizen of Lancaster county, Pa., which appeared in the Oxford Press of 12th Mo. 3d, 1873, without any agency on our part, is to the point: FULTON, LANCASTER COUNTY, 11th Mo. 31, 1273.

We use the best machinery now known for pulverizing Bone, and offer our grade of

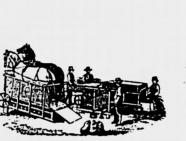

s a substitute for even the best of the various manipulated articles in the market, and

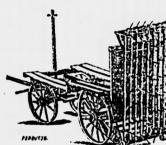

This Extra Fine Bone is not obtained by sifting it out of the other, but is made by passing it through the mill a sufficient number of times to reduce it to the required degree of fineness.

Extra Fine, \$2.50 per ton additional.

2) In sending orders please state whether the ordinary grade or the Extra Fine is wanted. When no distinction is made we will send the ordinary grade. Samples of either grade seat on application.

BOOTS, SHOES, HATS AND CAPS,

LEVIS,

EDITOR PRISE:—As you wished a report about my wheat crop of 1872, I will give the following: From one acro the yield was 46 dozen sheaves, which when threshed yielded 36 busies and 12 pounds of wheat. On this acro 800 pounds of Waring's taxes had been harrowed in, and 11/2 bushels of white wheat drilled. It was somewhat injured by fly in the tail of 1872. One acre shoulded the above, and treated in the same new except without the bone, yielded 122 dozen, making 16 bushels and 8 pounds to the acre. Difference in favor of Waring's ground bone, in my experience, of 20 bushels and 4 lies, to the acre. By delucting price paid for bone it leaves a gain of \$12.10 per acre, when wheat 6 \$1.50, in favor of putting on the bone. These experiments we have tried for our own and others' advantage. We have tried other fertilizers and received but little in return for our great contage.

ECMITERA EFENED ESONES as positively containing a larger per centage of manurial value than any dissolved be or super-phosphate that can be made at an equal cost.
