Board of County Commissioners:
We appear before your Honorable Body
to state to you the condition of our schools, with an appeal to your generosity for a liberal levy in order that we may carry out the provisions of the School Law.

The number of different pupils that attended school in our county the past year was five thousand one hundred and sixty-three (5.163). Average attendance, two

exists. It exists in every county in the State. We are happy to state that the average in some schools is creditable to both teacher and neighborhood. There are several reasons for irregular attendance. several reasons for irregular attendance.
One cause is that teachers do not seek to make the school room as inviting and cheerful as it might be. We are confident where you find teachers who manage to interest their pupils in whatever they may be studying, the average attendance in such schools is better than the one who drags schools is better than the one who drags.

to remedy this evel.

We have in this county about one hundred teachers with an average salary of about three hundred dollars. We often hear complaints of teachers getting too and hear complaints of teachers getting too and hear complaints of teachers getting too the county in which the application is made, there must be attached the certificate of the Circuit Court of the county in which the Justice resides.

Farsons may sell salt to cure flesh in March, April and distributions for a while they would think teachers the worst paid people in the land. They have every person to please and when all is summed up they have in many cases nothing but ill-will of a neighborhood remaining. Our teachers (with few exceptions) have been diligent and faithful in the performance of their duties, anxious to excel, and ready to duties, anxious to excel, and ready to creeive any suggestions for the improvement and progress of their schools. We have settled with them promptly at the close of the terms, though often compelled to borrow money at a high rate of interest, which could be remedied if the Collectors of the respective Districts would be prompt in their payments to the County Commissioners that they might settle with us governed by law.

We are gradually improving the condition of our school houses, and building houses where most needed; but the condition of some of them is such as to come to the notice of the Grand Jury during the December term of Court, and wisely did they state it in their report. When towns the like Elkton or Port Deposit have such misterable executes for school buildings (and rented with some of them at high rents) it in their work of them at high rents it in their payments to the motice of the Grand Jury during the December term of Court, and wisely did they state it in their report. several reasons for irregular attendance.
One cause is that teachers do not seek to make the school room as inviting and cheerful as it might be. We are consident where you find teachers who manage to interest their pupils in whatever they may be studying, the average attendance in such schools is better than the one who drags his scholars through their studies merely to put in time. We fear the principal cause is with the parents in permitting their children to stay at home from school for causes which are very trifling. Whatever may be the causes of non-attendance or irregular attendance, let parents, Trustees, Commissioners, teachers and all others connected with the cause of public education, resolve that they will use every effort to remedy this evil.

We have in this county about one hundred teachers with an average salary of about three hundred dollars. We often hear complaints of teachers getting too much salary. If such complaints would exchange situations for a while they would think teachers the worst and properly in the college is the worst and properly in the college is the college of the county in which the applicant is not prevent and every year, after the page of the county in which the application is much salary.
