POND'S EXTRACT MARYLAND EYE & EAR INSTITUTE. 66 N. CHARLES ST.,

BALTIMORE, MD. This Institute has been established and is conducted upon the plan adopted and found so eminently successful by similar Institutions in Europe, as for example that of Professor von Graefe, of Berlin, of whom the surgeon in charge is a pupil. The success and public favor which have greeted it from its inauguration, have been so encouraging, that we have been induced to ex-tend its accommodations from time to time, and now can confi ently claim that no institution in the country can offer more suitable provisions for the comfort, care

and convenience of its inniates.

As this was the PIONEER ESTABLISHMENT in the SOUTHERN STATES and is now in the fifth year its existence, it may be not inappropriate to refer to the fact that since its inauguration nearly FIVE THOU-SAND OPERATIONS HAVE BEEN PERFORMED, including FOUR HUNDRED AND FIFTY CATARACT OPERATIONS, the statistics of which compare me favorably with any on record.

The EYE and EAR INFIRMARY and FREE DIS-PENSARY, located at No. 77 Saratoga Street, are open PENNARY, located at AO. A Farange Circle treatment and mediclas FREE OF CHARGE. Those whose con-dition requires a remaining at the INFIRMARY with be treeted FREE in the Institution, by BRINGING a PERMIT from one of their County Commissioners.

THRASHER AND CLEANER,

We claim for the DIAMOND STATE HEPARATOR: Simplicity, Darability and Capacity to do good work in all tinds of grains, and with any kind of power, from 2 or 3-horse tread, 4 or 6-korse sweep power, or a 4, 5 Choise

2nd. The Riddles are constructed differently from any machine in the market. The double motion of the Fau, so manner in which the grain strikes the Riddles, makes its cleaning grain entirely free from straw, &c., and per-cily fit for market. feetly fit for market.

3rd. It has an Adjustable Concave and Feeder Duster, which protects the feeder from dust. This may hime has only two belts, is easily Landled, and runs lighter than any other machine built, doing the same amount of work. It can be run from either side of the machine, either by gear or belt.

These machines are built of the lest material, are well finished, strong and durable. When parties want a machine to thresh and clean from 15 to 50 bushels of wheat per hour, according to their power, we solicit an examination and trial of our machine, fully believing it fills all the requirements so long needed by farmers, viz: a machine that can do 600D WORK under all circumstances, and sold at a LOW PRICE. This machine is well adapted to threshing cloverseed.

We are also manufacturing Single and Double-Geared Horse Powers, the celebrated Pratt Horse Rake, Cultivators, Wool Scourers, Feed Rollers, and other Woolen and Paper Machinery. Agricultural Engines, mounted on wheels, from 3 to 12-horse power; when desired, we put Locomotive Smoke-Stacks, with Spark-Arrester, on this engine; where Break Doublefrees and Neck York are wanted, extra \$25.
