SWEET POTATOES.

month, and as late as the 20th of June, sweet potato slips may be planted in moist weather, or after a rain-from the 10th to the 15th of this month is, perhaps, the best time. The light soils are best suited to them. They are planted in hills, conical in shape, and feet apart, the ridges being three feet apart, the hill two by three feet. If the land be not fertile, put stable manure, a fork full where the hill is to be, and make the hill over it. If to be planted on the ridge plan, open a shallow furrow and put in the manure as usual with the Irish potato, then back two deep furrows over the manure, level the top with a rake or make a hard pat with the hoe every two feet on top of the ridge, and plant a slip which has attained a growth of five or six inches. In planting bury the slip to the first leaf. In ten days pare down the sides of the ridges or hills, loosen the soil about the plants and plow or shovel out the middles of the rows Keep all clean from grass. As the vines run, now and then, with a stick turn them up, to prevent their taking root, for each joint will soon put out a rootlet and grow into a mass of stringy potatoes, unfit for use, if not prevented by this means. As soon as they nearly cover the hill, turn the vines on top of the ridges or hills, plow deep and well, with mould board next to the ridges or hills; then with the hoe give them a good hilling, and turn back the vines. In a week, run the cultivator down the middle of the rows, and the work is done, except occaionally loosening the vines on the sides of the ridges or hills to prevent rooting .-They will soon cover the whole ground

WATERMELONS.

keeping of Irish potatoes in stoops.

J. V. K. Wells, near Milford, Del., has the reputation of raising immense crops of melons of splendid size and superb quality. The editors of the "Peninsular News," thinking it would prove acceptable to their readers, have taken the trouble to learn Mr. Wells' method of culture, and presents them as follows:

"His patch contained nearly five acres, and last Winter it was an old acres, and last Winter it was an old sedge field, worn out land that had sedge field, worn out land that had the trial was carefully made. By putbeen uncultivated for several years, Ocean Guano was worked into the surface soil over each hill. The seed were planted about the first of May and when they were well up, strong and vigorous, he removed all but one plant vigorous, he removed all but one plant sults of crossing with particular breeds, broads which the was allowed to grow under a good cultivation with the oe and harrow, until the vine began to set its fruit. Each vine was then prevented from setting but two melons by pinching off the blossoms, and the vines themselves were pruned by pinching in the terminal end. When these two melons had attained a size of six or eight inches in diameter, one or two more were allowed to set, and all other blossoms remorsely removed until these last ones were well advanced toward maturity. After the first two were ready for market and the second two had attained the diameter of six to eight inches, another one or two were allowed to set, and in this manner the vines were kept in bearing all the season, but at no time was any vine allowed to carry more than four melons, and in some instances but one or two. By this treatment the productive vitality of the vines was all directed to producing large sized melons. This is the only method by which the enormous melons of twenty to forty pounds can be produced. If the vines are allowed to set all the fruit they will, the size cannot be great; but if each is allowed only to hear one or two melons it will have

enormous size. The variety grown by Mr. Wells are the GIPSEYS."

This delicious and valuable plant can be planted, and ought to be, from now white, or one of almost any other white, and is until first of August. But May is a good time for the early crop and July for the late crop. It can be raised with not much trouble, unless the season be very dry and much watering is required. Dig trenches four feet apart, one black or spotted breeds. In the south, ed. Dig trenches four feet apart, one foot deep, and spade wide, the bottom of the trench dig up and cover an inch or two with well-rotted stable manure, ters and other white breeds, unless or barn yard manure; sprinkle with salt and chop it and intermix well with the soil in the bottom of the trench, and let it remain a week before setting the plants. After a rain, draw your plants, trim the roots and broken and decayed leaves, cut the tops off nearly half the length of the stem and plant in trenches six inches between the plants, water freely, cover the trenches with bushes for a few days from the sun; water every evening until they most valuable cross, to choose the start to grow. Keep the earth loose sow from the larger breed invariably, about the roots and shave in the sides of the trenches as the plants grow, taking care not to fill in as high as the top of the crown of the plant. Never let it suffer for moisture. Sometimes use liquid manure in the trenches, not on the plants, the same also with water made brackish with salt. It is a plant native to sea coasts. An acre in good

celery is worth usually \$1,000.

This plant should be grown by every-body likes it and it sells high, and it is very valuable for its medical curative this as of only secondary value or as qualities. Those who habitually use it. fully appreciate its virtues, one of whom, who is reliable, thus speaks of attached to it. its great value as a recuperator of

"I have known many men, and women too, who from various causes had become so much affected by nervousness that when they stretched out their hands they shook like aspen leaves on windy days, and by a moderate daily use of the blanched footstalks of celery as a salad they became as strong and steady in limb as other people. I have known others so nervous that the least annoyance put them in a state of agita-

not in season." Dr. C. W. Benson, of Baltimore, has also discovered that the extract of Celery and Chamemile, combined in a feet apart, the ridges being three feet ousness, but headache, either billous, dyspeptic, nervous or sick headache. There is no question as to its efficacy in relieving nervous complaints in their various forms : Dr. Hall uses it successfully in kidney affections, and certainly no pleasanter remedy can be found in the whole Pharmacopia of Medical

REMEDY FOR THE CUT-WORM IN CORN FIELDS.—As before our next number, says the "Practical Farmer," some of our subscribers may have to plant their corn, we give them the remedy which here has always proved effective for the cut-worm, viz.: a tablespoonful of salt on the hill AFTER it is planted, but BEFORE it is up.

BREEDING SWINE. Under this head a writer in the American Stock Journal" gives some seful advice on crossing breeds. A cross from two good pigs, from breeds that have a good local reputa tion in the place you wish to breed, if the place as well as the people are progressive, will almost invariably result in a litter of porkers that will give quicker and better results, than from what is known as pure blood or thorough-bred; but, as regards breeding purposes, after you have bred the original boar to the third generation, and the few weeds which spring up are not so valuable. If the prize givers can be hand-pulled. It is a crop that can be hand-pulled. It is a more quickly and easily gathered, sells higher in market, pays better every way. Yields well, ordinarily from two hundred and fifty to four hundred bushals of marketable potatoes, leaving as valuable for breeding continued good stock as the pure bloods, which may, in general appearance, be slightly inferior, general appearance, be slightly inferior, els of corn, for preparing hogs for the but are, in reality, much superior as imkilling pen. They seem to make a hog provers of stock. So the best plan for grow and fatten at the same time. We a large breeder of swine, and, of course, consider them far more profitable than small breeders can use their option the Irish. They can be kept sound in regard to the matter, is to keep one. nearly all Winter under a proper course of treatment, which is similar to the sows, and one or more boars of pure blood also, as a breeding stock or stud, from which to get the desired cross, and then raise these crosses for sale; by so doing you will obtain better results than if you bred, raised and sold the pure blooded pigs, unless you could dispose of them. dispose of them at good prices to others who wishes the stock of yours as a breeding stud; but, if you raise swine on a large scale, or a small scale either, the demand for stock pigs is rather uncertain, and if sold in the open market they will return as much for feed and attention as the crosses will, as fully determined and repeated-

and abandoned to sedge and persimmon bushes. It was a sandy loam soil.—

Will pure the bushes out of it and plowed will pure at full maturity sooner and the first eross; and the sedge under about six inches deep early in April. With the rake-harror so you can breed until the third litter, it was then thoroughly pulverized and further than which it is best not to go, it was then thoroughly pulverized and afterward laid out in squares six by eight feet. At the crossings of the cross further reduced are often constituted by the cross further reduced by the cross further reduc rows he scooped out the farth with a hoe and put in a large shovelful of well-rotted barnyard manure. This was covered with the hoe and just before planting the seed a handful of Pacific the fourth generation. But to the inquickly showing least neglect; although sometimes strong and healthy pigs may be the result of reducing the cross to the fourth constant and the fourt the fourth generation. But to the inexperienced, and, in fact, to all breeders, I say stop at the fourth generation

gave the best and most desirable

Now, a Chester White sow, a breed that for health, good size, and a strong, hardy constitution, being capable of thriving under general common management, has become so renowned and popular, and deservedly so, put to a Berkshire boar will produce a very desirable cross, for they will continue hardiness and healthiness with a moderate size, will readily take on fat and ALSO, Wooden CUCUMBER PUMPS, flesh, and early arrive at maturity. By putting the Berkshire boar to the first litter or cross you will obtain a greater infusion of the blood of the boar, and

produce a litter of excellent pigs, which will fatten early and readily. The crosses with black spots on them, which they will have when a Berkshire

or other dark or black boar is the sire,

are objected by some breeders on this account; but, when they are sold, dressed, or in a lot to the butcher, this is not taken as any evidence of inferiority, as long as they are healthy and in good condition for butchering. As popular taste has sought after pure white hogs, the Berkshire and its crosses are not desirable for amateur purposes vitality sufficient to carry them to an or for a breeding stock where a pure white pig is desired; but as the color of the hair does not make any difference in the price of such breeds for breeding purposes, although, I must myself admit, that a sleek pure-bred Chester covered with a smooth, soft coat, is a very fine animal to look at and to have; but for profitableness, I would not confine myself to the white sorts, as they the Berkshire and its crosses will used as stock for crossing, when they are indeed very valuable and desirable.

An Essex and Chester cross produces fine porkers. Some breeders consider it advisable to have a Chester boar and an Essex sow to produce the best cross, but I do not agree with them here, but think the reverse the best, and conducive of the best and most desirable results. I will always consider it best, when you desire the and the boar from the smaller breed, as it has almost always resulted in obtaining much more reliable and valuable pigs, much finer and hardier and in every way more desirable, than if the system was reversed, that is selecting the boar from the large and the sow from the small breed. I think much finer horses could be raised if this item

having no real, practical value, whereas it has or should have great importance I consider it conducive of much better results, to cross the white breeds with the black, and vice versa, than to cross two different breeds of the white or two different breeds of the black .-Of course this conclusion is modified or Interesting to Grain Growers. changed by circumstances, such as cli- The Analysis of Wheat and Straw show: mate, care, management, &c doubt there can be, and are valuable

tion and they were in almost constant prominent breeds. They demand, natperplexity and fear, who were also urally, the very best care and treateffectually cured by a moderate daily ment, to fully develop their real worth, use of blanched celery as a salad at meal time. I have known others cured ble, while, if indifferently treated, or From the first to the last of this anoth, and as late as the 20th of June, weet potato slips may be planted in moist weather, or after a rain—from moist weather, or after a rain—from season, and onions in its stead when the season, and only its s

Casho Machine Company,

NEWARK, DELAWARE,

MANUFACTURERS OF THE UNRIVALED PATENT

"DIAMOND STATE"

THRASHER AND CLEANER, AND OTHER FIRST-CLASS MACHINERY, MILL AND FACTORY WORK, &C.

We claim for the DIAMOND STATE SEPARATOR: Simplicity, Darability and Capacity to do good work in all inde of grains, and with any kind of power, from 2 or 3-horse tread, 4 or 6-horse aweep power, or a 4, 5 5-horse 1st. It separates the straw from the grain perfectly. The oscillating movement of the Corrugated Shakers makes its separating the simplest and most complete of any machine in the market. It has no rakes or beaters. It will not throw over or waste grain, on account of an Improved Straw Agitator.

2nd. The Riddles are constructed differently from any machine in the market. The double motion of the Fan, the manner in which the grain strikes the Riddles, makes its cleaning grain entirely free from straw, &c., and perfectly fit for market. recity it for market.

3rd. It has an Adjustable Concave and Feeder Duster, which protects the feeder from dust. This machine has only two belts, is easily handled, and runs lighter than any other machine built, doing the same amount of work. It can be run from either side of the machine, either by gear or belt.

These machines are built of the best material, are well finished, strong and durable. When parties want a machine to thereh and clean from 15 to 40 bushels of wheat per hour, according to their power, we selicit an examination and trial of our machine, fully believing it fills all the requirements so long needed by farmers, vis: a machine that can do GOOD WORK under all circumstances, and sold at a LOW PRICE. This machine is well adapted to threshing cloverseed.

MACHINERY.

We are also manufacturing Single and Double-Geared Horse Powers, the celebrated Pratt Horse Rake, Cultivators, Wool Scourers, Feed Rollers, and other Woolen and Paper Machinery. Agricultural Engines, mounted on wheels, from 3 to 12-horse power; when desired, we put Locomotive Smoke-Stacks, with Spark-Arrester, on this engine; where Break Doubletrees and Neck York are wanted, extra \$25. Truck Wagons for Separators and Machines, mounted or not, as preferred.

THE CASHO IMPROVED TREAD POWER:

ALL MACHINES WARRANTED AS REPRESENTED. AW Persons ordering Machines will please be particular to mention the kind wanted-Belt or Geared-also to be shipped. STRAW STACKERS furnished when desired.

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the na-tive herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of VINEGAR BIT-TERS!" Our answer is, that they remove the cause of disease, and the patient re-covers his health. They are the great blood purifier and a life-giving principle, on perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of Vixiona Bittrian in healing the sick of every disease man is heir to. They are a gentle Purgative as well as a Tonic, reliaving Congestion or Inflammation of relieving Congestion or Inflammation of the Liver and Visceral Organs in Bilious Diseases

The properties of Dr. Walker's VINEGAR BITTERS are Aperient, Diaphoretic, Carminative, Nutritions, Laxative, Diuretic, Sedative, Counter-Irritant Sudorific, Alterative, and Anti-Bilious.
Grateful Thousands proclaim VIN-EGAR BITTERS the most wonderful In-vigorant that ever sustained the sinking

No Person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and vital organs wasted beyond

Billous, Remittent and Inter-

mittent Fevers, which are so preva-lent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their year tributaries, throughout our watches, their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive derangements of the stomach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to Dr. J. WALKER'S VINEGAR BITTERS, as they will speedily remove the dark-colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

Fortify the body against disease by purifying all its fluids with VINEGAR BITTERS. No epidemic can take hold

of a system thus fore-armed Dyspepsia or Indigestion, Head-ache, Pain in the Shoulders, Coughs, Fightness of the Chest, Dizziness, Sour in the Mouth, Bilious Attacks, Palpitain the Mouth, Billous Attacks, Papita-tation of the Heart, Inflammation of the Lungs, Pain in the region of the Kid neys, and a hundred other painful symp-toms, are the offsprings of Dyspepsia. One bottle will prove a better guarantee of its merits than a lengthy advertise-

Serofula, or King's Evil, White Swellings Ulcers, Erysipelas, Swelled Neck, Scrollifa, Or King's Evil, White Swellings, Ulcers, Erysipelas, Swelled Neck, Goitre, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old-Sores, Eruptions of the Skin, Sore Eyes, etc. In these, as in all other constitutional Discases, Walker's Vinkoan Bitters have shown their great curative powers in the most obstinate and intractable cases. For Inflammatory and Chronic Rheumatism, Gout, Billous, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these Bitters have no equal. Such Diseases are caused by Vitiated Blood. are caused by Vitiated Blood.

Mechanical Diseases.—Persons en-

mechanical Discuses,—1 crsons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, are subject to paralysis of the Bowels. To guard against this, take a dose of WALKER'S VINEGAR BITTERS occasionally.

For Skin Discusses, Eruptions, Tet-self, Libroum, Blotches, Spots, Pinnles.

For Skin Diseases, Eruptions, Tetter, Salt-Itheum, Blotches, Spots, Pimples, Pustules, Boils, Carbuncles, Ring-worms, Scald-head, Soro Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Itumors and Diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermifuges, no anthelminities will free the system from worms like these Bitters.

like these Bitters.

For Female Complaints, in young For Female Complaints, in young or old, married or single, at the dawn of womanhood, or the turn of life, these Tonic Bitters display so decided an influence that improvement is soon perceptible.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Ket be blood pure, and the health of the system will follow.

A CERTAIN CURE FOR Dyspepsia, Liver Complaint, Jaundice, Billiousness, Sick Headache, and Hab-itual Costiveness.

What is Life without the enjoyment of health? If you had the wealth of Creaus, and affected with Dypepsia, or its kindred diseases, you could not enjoy life. Dypepsia is a prevalent disease in the United Estates, brought about by our hattix and irregularities. The Materia Medica has been enhaused to find a remedy, and the skill of the most learned Physicians has failed to effect a cure. Notwithstanding this declaration, we unhesistatingly act; "MILLER'S DYRPEPSIN" is a certain cure for Dyspepsia and the many complaints incident thereto, It has been before the public a sufficient length of time to fully test its merits, and in every instance where it has been used according to directions, it has resulted in giring relief and effecting a cure. With each lotting in the control of the diseases named, and for which only we claim it as a specific.
